

TWO KILLED IN TRUCK CRASH AT LAKEVIEW

LAKEVIEW — Two persons are dead and one injured in a truck-pick-up accident the afternoon of June 23 on the logging road of the Crane Creek Lumber company, 23 miles southwest of Lakeview, on Dry creek. Dead are Hubert Alton Haggard, 18, native of Oklahoma, and Roy Eckhardt, 53, of Willow Ranch. In the hospital at Alturas is Luther Clark of that city.

A pick-up truck, driven by Clark, had stopped at the bottom of the hill at the approach of a bridge over Dry creek. According to John Haggard, brother of Hubert Haggard, who was an occupant of the pick-up, the driver had stopped to let a band of sheep pass across the road. The shepherd's version of the accident was that no sheep were within 200 feet of the truck at that time. A logging truck, driven by John Walker of Lakeview, came over the hill and crashed into the pick-up, hurling it 27 feet down the bank from the bridge.

The Haggard brothers and Roy Eckhardt were riding in the back of the pick-up and Robert Meyers and Clark in the front seat. John Haggard, thrown clear of the vehicle, escaped without a scratch, while Meyers was only slightly bruised. Clark is in the Alturas hospital with a broken leg and other injuries.

Improper Influence Not Suspected in Oil Contract Case

WASHINGTON, June 26 (AP)—Abe Fortas, under secretary of interior, maintained today that "there is absolutely no basis in facts before us for suspicions or charges of collusion or improper influence" in the now-cancelled contract between the navy and Standard Oil of California for

joint development of the Elk Hills petroleum reserve. In a letter to the house public lands committee, now investigating details of the contract and its abrogation, Fortas wrote that "the sole issues are of law, business and public policy." He said, however, that the contract was against the interests of the United States, and raised a "serious question of business judgment."

WHY QUALITY RECAPPING LASTS LONGER

WE EXAMINE THOROUGHLY... Every square inch of the tire is inspected inside and out to determine whether it is fit for recapping or not. If you wait till your tires wear down too thin, they cannot be recapped. This wastes good rubber and mileage.

WE BUFF THE OLD TREAD... This smooths out the uneven spots and roughens up the rubber. This makes a good, even surface, ready for the application of the special rubber cement that will bond the new tread to the old.

WE APPLY NEW TREAD... The "camelback" is applied to the sticky surface and rolled down under pressure to squeeze out any air bubbles that could cause trouble later on. This "camelback" is made from reclaimed rubber processed from scrap rubber.

Ted

WE GIVE IT A "CURE"... This bonds the new tread to the old. Great skill is needed in maintaining rigid curing-controls. Such recapping, using wartime materials, will give good service if air pressures are kept up to 32 lbs. and speeds kept down below 35 m. p. h.
