groups in between. That's about all the detail we have as this is written.

(It will help in understanding the time element if you will remember that when it's today here it's TOMORROW in the Solomons.)

To get an understanding of the probable objectives of this obviously large operation we have started, you'll have to consult your map.

Here is the gist of it: Munda (which we are attacking) is 144 miles from the Jap Shortland islands base at Buin. Buin is 430 miles from Rabaul, which is the MAIN Jap base in the Solomons.

Kiriwina, the main island of the Trobriand group (which we occupied without opposition) is only 300 miles from Rabaul. It seems to be plain that we will establish an air field on Kiriwina.

We'll then be within striking distance (including short-range fighter planes) of Rabaul from two directions.

A GLANCE at the map confirms the Washington opinion that the Japs are likely to fight HARD, on a big scale, to STOP what we're STARTING.

As to that, of course, we can only guess. But the next few days, when we'll be waiting feverishly for every scrap of news, will be critical ones.

THIS new big-scale fighting in the Solomons dwarfs temporarily for us on the Pacific Coast the fighting in Europe—where today there is nothing in the way of significant new developments to report.

hold public office after their political philosophies were attacked by the chairman of the Dies committee.

**Funds Withheld**  
The house voted to withhold funds for the three, Goodwin Watson and William E. Dodd Jr., of the federal communications commission (FCC), and Dr. Robert Mors Lovett, government secretary of the Virgin islands. The senate overwhelmingly re-

jected the house action, and both branches have stood pat.

Major differences holding up passage of the other measures were:

**Agriculture department** (\$875,000,000)—House insistence on discontinuance of the government crop insurance program; the senate wants to continue it.

**War Agencies**  
War agencies (\$2,931,000,000)—The house voted to discontinue the domestic operations branch of OWI and cut out its entire \$5,500,000 fund, and the senate gave it \$3,561,499; the house wracked \$35,000,000 from the OPA budget and the senate restored the cut and voted additional funds. # Serving the Eyes... That Serve the Nation!

MODERN OPTOMETRIC SCIENCE SERVES FAITHFULLY ON BOTH FIGHTING FRONTS

At home and abroad, Optometric Science is proud to carry its part of the load. We home-front fighters are obliged to produce the goods needed for Victory... speedily and accurately—and this can be done only when eyes are sharp, ready, alert. Why take a chance? Get a complete, scientific eye examination NOW—and know your precious eyes are at par!

**ON THE HOME FRONT**—The eye health of the nation is vitally important—and optometrists, opticians and optical technicians... all those whose job is to help bring better vision... are working harder, longer hours to serve the visual needs of those on the home-front firing line.

**ON THE BATTLE FRONT**—One U. S. fighting man in seven wears glasses. So, wherever our forces go, a Mobile Optical Unit follows. These units, staffed in most part by technicians trained in civil life, are prepared to make new glasses, eye-glass repairs and lens duplications "on the spot."
