STOCKS SLIDE AFTER DOING WELL EARLIER

By VICTOR EUBANK

NEW YORK, July 15 (AP)—Stocks backed away fractions to around 2 points on the home stretch of today's market after doing fairly well in the greater part of the proceedings.

Up to the final hour there were plenty of favorites in the new high division but profit selling on the lengthy drive to best average levels in nearly four years became a bit more insistent as the session drew to a close.

Volume picked up toward the finish and transfers were around 500,000 shares.

Prominent on the slide were U. S. Steel, Bethlehem, Chrysler, Santa Fe, Southern Pacific, U. S. Rubber, Goodrich, Montgomery Ward, Du Pont, Westinghouse and Allied Chemical.

Bonds were uneven and commodities generally somewhat lower.

FARMERS MAY NOW GET HARVEST LOANS

V. N. Freeman, field supervisor for the emergency crop and feed loan office, announced today that harvest loans are now available.

According to Freeman, the loans have been announced early, thereby permitting farmers who need funds to put harvesting equipment in shape, purchase twine, repairs, fuel and oil and other harvesting supplies to take advantage of the loans and not delay the harvest of the most vitally needed crops in history.

The loans are to be secured by a first lien on the crops harvested, draw interest at the rate of 4 per cent per annum, and are available to all farmers who cannot obtain funds from a production credit association or on reasonable terms from some other source. Loans for summer-fallowing, for planting winter grain crops, and for the purchase of feed for livestock are also available. The loan limit is $400.

Farmers in Klamath county may call at the county agent's office, Klamath Falls, to make application for these loans.

WHEAT

CHICAGO, July 15 (AP)—Grains were under steady and persistent pressure today, wheat and oats dropping more than a cent at times while losses in rye ranged to about 2 cents.

Hedging in wheat expanded and trade reports said producers appeared to be in a mood to sell as long as prices on the new drop remained above the loan level. Weakness at Minneapolis was a factor in unsettling the local market and crop reports for the northwest were generally favorable.

At the close wheat was 1-1c lower, July $1.44⅞, September $1.44¼, oats were off 1-1⅛c, July 71⅛c, and rye was down 1¼-2⅛c, July $1.08¼.

MORE MACHINERY FOR OREGON FARMS

Assurance that Oregon farmers will have more machinery for next year's food production job is seen by Albert L. Girod, chairman of the Oregon USDA war board's machinery committee, in the 1944 farm machinery order just issued by the war production board.

Production of machinery equal to 80 per cent of the 1940 output is provided in the order, are compared with 40 per cent production this year. All restrictions on production of repair parts have been removed also.

Girod points out that considerably more than twice as much machinery should be available to farmers in 1944 than this year. While a 40 per cent output was authorized under the 1943 program, only about half of the machines have been received.

Materials have been allocated and production under the 1944 program was started July 1—three months earlier than this year. Girod believes that more machinery will be available in time for seasonal needs, and that much of the delay in deliveries experienced this year will be avoided.

Allocation Program For Farm Wiring

WPB regulations (Order P-144) which provide farmstead wiring material for farmers certified by county USDA war boards as eligible for electric service have been extended until July 31. The order, which permits eligible farms to apply a AA-3 rating for up to 75 pounds of copper wire, originally expired June 30. It will be shortly replaced by an allocation program which will enable farmers to apply to the county USDA war board for a purchase certificate to obtain copper wire.

An infantry division in 1918 was equipped with machines of 3300 motive horsepower; today's armored division totals 400,000 horsepower.

Appointment of Brig.-Gen. Auby C. Strickland of the U. S. Army Air Forces as military governor of Pantelleria indicates the Mediterranean isle will become a key Allied air base.

Farmers to Get First Call on Gas

WASHINGTON, July 14 (AP) The petroleum administration for war today gave farmers in all 48 states the first call on available gasoline supplies.

An order directed suppliers in 31 states to give first choice in motor fuel deliveries to non-highway farm use requirements on the same basis as military requirements. This made nationwide an earlier order granting preferred status to farmers in 17 eastern states.

WFA to Support Potato Prices

With large supplies of new crop potatoes coming into market, the war food administration has announced that it intends to provide full support to market prices at previously announced levels. Support prices for Oregon for No. 1 potatoes are $2 a hundred, Klamath county basis, and $1.80, Malheur, with 15-cent increases as the season progresses.

OREGON SUN, RAIN MAKE GOOD CROPS

By The Associated Press

Continued sunshine with slight rain in most areas of Oregon gave the state more good crop weather during the week ending July 13, the weather bureau-department of commerce said today.

Temperatures ranged from 90 or above in central and eastern Oregon to below freezing at a few elevated stations. West of the mountains temperature highs mainly were below 90 although Medford reported that figure.

Small grains continued to develop rapidly and early corn is tasseling. Cane berries are being picked but only a few are available for local sale. The crop appears to be good. A few early peaches, apricots and apples are available. Cherry picking is well along. There is some loss from splitting and brown rot.

Cutting and stacking of the first clover and alfalfa are finished in many regions and some second-crop alfalfa has been cut. Cutting of oats and vetch for hay is under way and some wheat hay has been cut. Baling is in progress. Second growth hay is doing well. Irrigated pastures are good and unirrigated pastures are better than usual for this time of year. Livestock conditions are good.

Digging of the commercial crop of early potatoes in Malheur county is about to start. Most of the early lettuce in that area has been marketed. A large crop of canning peas is being harvested.

Crop Insurance in Effect This Year

Oregon wheat growers are assured that they will receive full protection of their federal all-risk crop insurance on their 1943 crops. Discontinuance of the program, ordered by congress, will have no effect on this year's insurance. Insured growers will receive prompt adjustment of losses on the 1943 crop.

Farm Battery Prices Placed Under Ceiling

Farmers need not pay more than the March, 1942 prices for farm batteries—for radios, telephones, ignition systems, fence controllers. Sellers asking increased prices are violating OPA ceilings, and should be reported to the war price and rationing board.
