

BUY WAR BONDS

and

Protect Your Investment

In August, help deliver the "knockout blow" by buying war bonds. And in August help protect your investment by "Keeping Oregon Green"—another vital campaign supported in Klamath county by the AMERICAN LEGION. August is a month of great potential developments on the war fronts—it is also a month of gravest fire danger in our own forests. Your bonds will help make these developments break OUR way—your caution will help preserve our forests as a major national asset.

EVERYBODY is buying war bonds these days. And we are going to buy more and more. We know that bonds will help win the war, and we know that they are a mighty good investment. We are looking forward to the peace, and the things those bonds will buy.

TIMBER is one of the national assets that will help pay off those bonds. And forest fires destroy timber. So it's just plain good business to help in every way we can to put over the Wartime Forest Fire Prevention Campaign.

Here's another angle. If a man buys \$100,000 worth of bonds, we'd say that's fine. But if he also prevents a forest fire that would cost \$100,000 to fight, that doubles the investment, and makes a net of \$200,000. And that's mighty good business.

War bonds help win the war. Forest fires will help lose it. Timber is a vital war material. Fires destroy it. Forest fire fighting takes manpower away from other work. Smoke from forest fires makes aerial protection difficult, and helps the enemy.

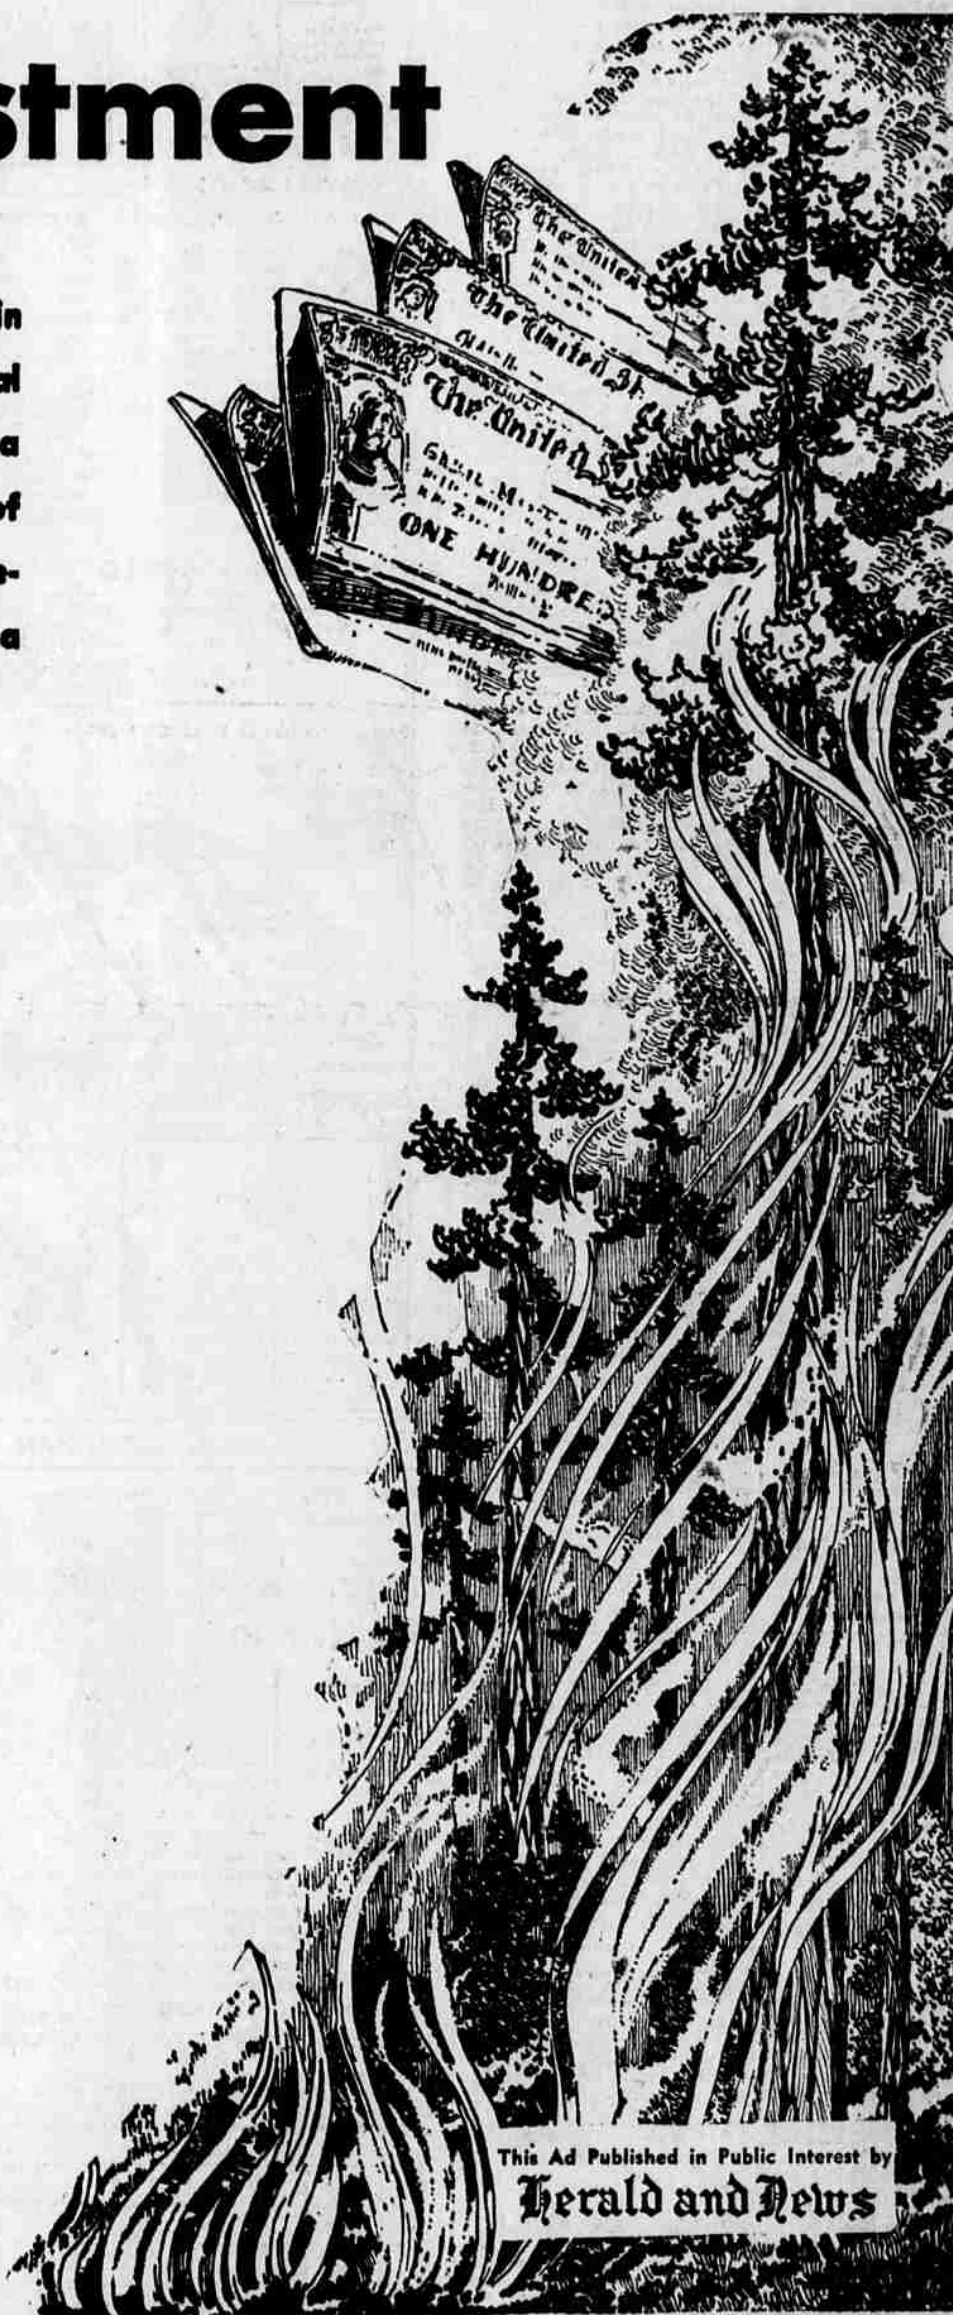

So any way you figure it, forest fire prevention is your business, my business, mighty good business. Let's be extra careful with every match, every cigarette, every spark of fire. Let's be sure they are dead out. Remember that forest fires cost money, destroy our resources, and delay victory.

Let's buy all the bonds we can, and all help to Keep Oregon Green.
