

Private Milk Supply Blamed for Causing Undulant Fever Cases

Two cases of undulant fever reported from Bonanza last week were contracted from diseased

cows owned by the family stricken and not from any herd supplying communities in the county, according to Dr. J. C. Hunt, city meat, food and dairy inspector.

Undulant fever has not been reported in Klamath Falls for

about nine years, Hunt said. The disease acts something like typhoid, and a victim can have it for some time without being aware of it. The fever comes and goes, leaving the victim feeling well for about a month before another attack.
