

# DAIRYMEN ASK HIGHER PRICE ON BUTTERFAT

(Continued from Page One)

with the present demand and price for feed, and with buyers in the country seeking cows for herds in California and elsewhere, there is no practical reason why they should stay with a continuously losing proposition. Some of them said they had stayed in so far only because of loyalty to the country and the community. Losses running into thousands of dollars were reported.

It was reported that 76 milk cows were bought and shipped out of the Klamath milkshed last week.

### Criticize OPA

There was general criticism of the OPA at the meeting, with speakers expressing the opinion that the OPA ceiling did not take into consideration all the factors involved in the dairyman's cost situation. Some opinion was voiced that the persons who set the ceiling did not know enough about the dairy business.

The meeting, however, lacked the bitterness which has reportedly characterized similar gatherings in other Oregon communities where dairymen at this time are generally agitating against OPA ceilings. The Klamath dairymen said they did not want to take any radical action, but insisted relief would have to come or disposal of milk cows was bound to follow the start of feeding in September.

### The Dailies Viewed

It was reported that at the Dalles, where dairymen had asked for relief, the butterfat ceiling was raised from 85 cents to 95 cents.

The Klamath dairymen considered asking for \$1.10, but it was decided to cut the request to \$1 as the absolute minimum figure, and to oppose any compromise on a lower price. Lee Holliday, who presided at the meeting, was authorized to appoint a committee to work with distributors in seeking relief from the OPA.

### Allen Statement

David Allen, price specialist for the local OPA office, made the following statement Thursday concerning the Klamath milk price situation: OPA will consider an adjustment of the price ceiling on milk only on the basis of a specific and authenticated showing that a continuation of the present ceiling will result in a shortage of milk, and that this shortage will be corrected by raising the price.

### Show Hardship

Producers would also have to show that financially they are suffering substantial hardship as compared with their position previous to price control. Allen said that no adjustment could be made on the basis of hearsay. He said the OPA office here has forms available upon which cost statements may be formally given. A comparative profit and loss statement must also be given and OPA offered its help in preparing such statements.

### Allen added OPA is willing to hold a meeting on the matter.

### Pulp Paper Scarcity May Harm War Effort

NEW YORK, Aug. 12 (AP)—The American Newspaper Publishers association said today in an analysis of the paper scarcity that maximum efforts would be necessary "to avert not only a calamity to the pulp and paper industry of the United States and Canada but serious impairment of the war effort."

"The products of the industry have a much higher degree of essentiality than is generally recognized, especially in some government circles in both countries," the ANPA said in a bulletin sent to members.

# Cavalry Units Begin Maneuvers Sunday

BEND, Aug. 12 (AP)—Oregon State guard cavalry units will start summer maneuvers Sunday in the Metolius area at Allen Springs, Maj. H. C. Tobin, of Portland, said today.

The games will cover a mountainous and wooded area that reaches up to Mt. Washington, Mt. Jefferson and Three-Fingered Jack in the eastern Cascade, Major Tobin said. They will last two weeks.

# LANDS GROUP ASKED FOR TAX REFUND

SALEM, Aug. 12—The Oregon tax commission and county judges of two counties in which large military camps are located appealed today to a house public lands sub-committee for reimbursement by the government of taxes lost to the counties when the government takes over private lands.

Charles Galloway, chairman of the state tax commission, told the committee at a hearing here today that operations of county, city and other local governments are "seriously impaired" by government acquisition of lands. He said the government now owns 60 per cent of all land in the state of Oregon.

The state government, however, is not impaired because the state functions are financed by income taxes. But the schools, for instance, rely almost exclusively on property taxes.

# RIVER POLLUTION TO BE INVESTIGATED

BEND, Aug. 12 (AP)—The Deschutes river pollution case, subject of court action, will be submitted to the state sanitary authority for investigation and report.

This move was suggested by George H. Brewster, attorney for Redmond and three irrigation districts who charged that a newly constructed swimming pool here polluted the river.

The pool was constructed by the Bend school district, and is used by hundreds of school children and soldiers.

Bend and the school district have agreed to accept the findings of the sanitary commission.

# Milk Problem at Bend Still Unsolved

BEND, Aug. 12 (AP)—After a series of conferences between OPA and city officials, Bend's milk problem still was unsolved today.

Blair Stewart, OPA's district price officer and W. H. McCargar, representing the OPA food section, were closeted with city commissioners and others last night and today. The press was excluded from the city commission meeting last night, but it was learned that action was not taken on the proposed tax subsidy plan by which a tax would be levied on milk for the benefit of producers.

When Illinois territory became a member of the Union on December 3, 1818, it lacked 19,742 of the population stipulated for statehood by the Ordinance of 1787.

# SPECIALIZED JOBS OPEN TO WAC RECRUITS

Now open to WAC personnel are 406 out of 628 specialist jobs now filled by enlisted men, it was learned Thursday from Lt. Betty Herring, WAC recruiter here.

Based on a recent report more than 1,000,000 enlisted men are employed on these 406 jobs. In order to make available as quickly as possible the skill and aptitudes of WAC enrolled members, that organization will concentrate at present on 155 of the jobs now held by enlisted men.

Any local woman between the ages of 20 and 30 years who might be interested in any of these specialized jobs can secure further information by contacting Lt. Betty Herring at the WAC headquarters in the Memorial building or by calling 7383.

# Accused Baby Kidnapper's Marital Status Puzzles

(Continued From Page One)

he said, was a divorce decree granted by Circuit Judge Donald E. Long.

Bailey said his office records showed a certified copy had been issued after the case was closed. Certified copies, he said, could be obtained by anyone for the usual fee with no questions asked because the copy is valueless except to show that a certain case is on file.

### Easy Job

It would be easy, Bailey said, to erase the names on a certified copy form and insert others.

The woman's story that she was wounded in the bombing of Pearl Harbor was challenged yesterday by the Long Beach man, whose name was given as Harry (Woody) Morgan. He said he was married to her at that time. She married Sgt. Jesse Wright, now stationed at Camp Adair near here, last October.

### Injured in Fall

Morgan said she was injured in Honolulu but in a fall from the back porch of their home a week after the raid.

Weinrick disclosed that he had asked Honolulu police to check on Mrs. Wright's activities while she was in that city.

Morgan said his wife left Hawaii shortly after the bombing and that he has never been officially notified if she has obtained a divorce or an annulment of their marriage.

District Attorney Harlow Weinrick said Mrs. Wright told him after her arrest on a child-stealing charge that she had been married to Morgan but had obtained an annulment after three days.

### Said Wounded

She also told Weinrick that she had been wounded by shell fragments on the head and neck while working as a teletype operator at Hickam field during the Pearl Harbor attack.

Army authorities at Honolulu told The Associated Press yesterday they had no record of Mrs. Morgan having been employed there.

Sergeant Wright, who was led to believe he was a father, had told reporters that he thought

rolled ahead through fresh German tank divisions that had been rallied in a desperate effort to halt the advance.

Perfect coordination of soviet tanks, infantry, artillery and aviation was an important factor in the high-speed rush to envelop Kharkov, Red Star, army newspaper, reported.

Soviet infantry and artillery were waging battle against nazi strongholds while tank forces by-passed garrison towns to sever communications and capture settlements in the hills around the enemy bases.

### In Suburbs

East of Kharkov, where red army forces were fighting their way tenaciously into the city's suburban districts, the Germans were reported felling cherry and apple trees to construct pillboxes among the ruins of the villages.

The drive on Bryansk from Orel pressed forward through 70 more villages yesterday and drew steadily closer to the main objective. Despite bad weather, squadrons of Russian bombers rained destruction on the retreating Germans.

Two German armored trains operating on the railway east of Karachev were assisting fresh German tank and infantry units as they made numerous counterattacks in an effort to stem the soviet drive.

### Advance Through Mines

(A British broadcast, recorded by CBS, said the Russians were less than 12 miles from Karachev, "advancing through deep minefields and meeting stubborn resistance all the way."

(The German high command said the "great defense battle" was continuing in the Belgorod area, without mentioning the threat to Kharkov, and declared that soviet attacks southward of Orel were frustrated. It said the Russians lost 102 tanks in yesterday's fighting.

### First Since Kassel

It was the first raid by British-based U. S. heavy bombers since the attack on Kassel, July 30, and it was one of the few times that Americans lost more planes than they shot down.

Marauder bombers, escorted by Spitfires, attacked an enemy airfield at Poix in France and Typhoon bombers struck at air-dromes at Courtrai in Belgium and Merville in France.

"Good bombing results were reported at all three targets," the communique said.

The widespread daylight operations followed night attacks on the Ruhr and Rhineland by light Mosquito bombers.

# Fire Fighters Battle Huge Wyoming Blaze

BUFFALO, Wyo., Aug. 12 (AP)—Seasoned fire fighters led soldiers and ranch volunteers, some of them women, in a slow battle today against a violent fire which already has burned more than 7700 acres of timber in the Big Horn national forest.

More than 300 persons were on the fighting line of the worst fire in the Big Horn region in 25 years. Experienced men were flown here from Missoula, Mont., to join rested crews of soldiers and civilians.

# New Evidence Found in Robbery Case

TACOMA, Aug. 12 (AP)—Brigham E. Roberts, Salt Lake City district attorney, said today that he had found evidence that Frank J. Turner, 40, did not commit a crime for which Turner is now being held in Salt Lake City jail.

Turner was arrested last May on a charge of having robbed the Ambassador hotel in Salt Lake City on December 14, 1941.

The accused man, employed as a steamfitter's helper in a Portland shipyard at the time of his arrest, told police he could not have committed the crime inasmuch as he was in jail in Tacoma at the time of the robbery. He was identified as the robber, however, by the hotel bellhop and he was to have gone on trial for the crime September 7.

# Stalin Talks With Ambassadors While Churchill Travels

(Continued From Page One)

personal war conferences with the president produced the confident hope in Britain of Italy's quick surrender and a grand offensive against the Germans before the end of 1943.

Stalin's absence, however, brought some comment from the British press.

NIGARA FALLS, N. Y., Aug. 12 (AP)—Prime Minister Churchill of Great Britain left today for an unannounced destination after viewing Niagara Falls from the Canadian side.

Churchill crossed to the American side of the falls after an hour-and-a-half sight-seeing trip on the Canadian side of the cataraact.

He was accompanied by his daughter, Subaltern Mary Churchill of auxiliary territorial service, and a large party.

QUEBEC, Aug. 12 (AP)—A tapering off of allied war planning became apparent here today but with every indication it would reach a new and sustained peak when President Roosevelt arrives for conferences with Prime Minister Churchill of England.

# Bairoko Fight Demonstrates Jap Tenacity

(Continued From Page One)

the supply port for the airfield garrison although in actuality Bairoko was cut off from communication with Munda in mid-July by U. S. jungle troops. But with Munda's fall, Bairoko's military importance declined and, indeed, the area constituted a potential death trap.

American forces already had one jaw set against Bairoko, moving on it from the northeast after putting ashore at Rice anchorage on July 5.

With Munda's fall, another American force began advancing northward from the airfield. It deployed around a mangrove swamp. The right flank within a few days reached a point two miles southeast of Bairoko and joined the force which came down from the northeast, effecting an encirclement.

Despite this seemingly hopeless situation from the Japanese standpoint, the enemy has put up such fierce resistance against the force which deployed to the left of the swamp that today's communique from Gen. Douglas MacArthur reported it still was only half way toward its objective.

flected the thinking and wishes of the people.

"That's one thing I learned since the election," he added. One of the food administration's first acts after Nelson's arrival was to add the state secretaries and commissioners of agriculture to the state agricultural war boards.

# Taxation Interests Military Authorities

WASHINGTON, Aug. 12 (AP)—Secretary Morgenthau indicated today that military authorities have interested themselves in the administration's contemplated \$12,000,000,000 new tax program because they want tax levels kept low enough to preserve production "incentives."

# Work Stoppages Cut Coal Dealer Supply

WASHINGTON, Aug. 12 (AP)—Secretary of Interior Ickes said today that as a result of production losses due to work stoppages coal dealers will be limited to 90 per cent of "last year's requirements" of anthracite.

The solid fuels administrator said work stoppages had resulted in a loss this far this year of 3,500,000 tons of hard coal and that "we are going to have trouble to supply the demand."

# Father Draft May Be Slowed by New WMC Announcement

(Continued From Page One)

deferred in those jobs because no replacements are available for them.

Non-Fathers Called As the non-fathers' deferments were ended, they would be called for induction, thus enabling draft boards to fill their quotas without calling fathers, or calling fewer of them than has been anticipated.

There have been estimates that only about 300,000 fathers would have to be drafted this year.

### To Take Effect

The super-deferment designations are to take effect right after their expected announcement Sunday but the new non-deferred designations are not to take effect before about mid-September.

There will be four draft classes based on occupational lines. These, in that order of call for men holding them, will be: 1. non-deferred jobs; 2. jobs not appearing on any draft list; 3. jobs currently holding "essential" designation; 4. jobs on the super-deferment list.
