COMBINES SEEN WEED SPREADERS

Because of the limited number of combines in the Klamath Basin area for the grain harvest, it is possible that operators from the area around Medford may bring in machines to do custom harvesting, Assistant County Agent Bob McCambridge said today.

He warned growers who employ these men to be cautious about the spread of noxious weeds which can occur from bringing in machines from another area where the weed is prevalent. Weeds are occasionally held over in machine parts, and serious damage has been known to occur by this method.

"It will be wise of Klamath county farmers who employ outside equipment to make sure that the machine is clean and free from weeds before they allow the machines in their fields," McCambridge said.

Weeds which can be brought in in this way are yellow star thistle, puncture vine, wild morning glory, Canada thistle, and white top.

CHINA WANTS BILL OF RIGHTS, SAYS DIP LUM

After the war, China wants a real Bill of Rights for the world, Dr. Kalfred Dip Lum, commissioner of overseas affairs for the Chinese republic, stated at a public meeting Friday night at the high school auditorium.

"If Germany cracks up like Italy did, the war in Europe will be finished in another year," declared Dr. Dip Lum. He predicted that another six months to a year would be needed after the end of the war in Europe to finish up the war in the east.

"Resistance and reconstruction" is the slogan of the Chinese people now, the American-educated commissioner said. He told how highways had been built in months after it had been predicted that it would take years for their completion. Women and children work on the roads, without salary, to protect their country from the invader.

"In our country, we have no unions, no strikes. In time of crisis, the people sacrifice as much as possible," Dr. Dip Lum explained.

Japan now controls only spotted areas in China, and within ten miles of a "conquered" area, Chinese life and government prevail. Chinese guerrillas harass the invaders, tearing rails from railroad tracks, and substituting realistic clay rails in their place.

In the ten years before the outbreak of the war with Japan, China made more progress than any other nation in the world, particularly upon educational lines. Now, even with a war going on inside the country, Chinese youths who wish to continue their education in high schools and universities are allowed to do so.

The China of today has a constitution based on that of the United States, and emphasizing the principles of Dr. Sun Yat Sen, the founder of the republic; national independence, political democracy, and economic welfare, Dr. Dip Lum explained.

Post Office Cleared In Short Time at Practice Air Raid

Workers employed in the post office building had a surprise practice air raid Friday morning, and managed to clear the building in one and one-half minutes. Object of the practice raid was to see if the air raid work had been organized correctly, and to determine the length of time necessary to clear the building. There are about 100 persons employed in the building. The next practice raid will be held at night, under blackout conditions, when about 10 persons are in the building.
