

# BLOCK LEADERS ASKED TO AID WAC ENLISTING

At a meeting of block leader council and precinct leaders of Klamath Falls and the suburban areas Thursday evening at the Little Theatre, Lt. Betty Herring, recruiting officer for the WAC here, asked the assistance of the Civilian Service corps in determining the number of young women eligible for joining women's army service.

She suggested a survey project to be put on by the block leaders. Lt. Herring stressed the fact that this is not in any way a high pressure method of enlisting women, but merely a method of finding where the eligible women are, so that they may contact her and obtain information about this branch of their country's service.

The group accepted this project and the work will be done probably the second week in September, or as soon as material is available.

Dr. Peter Rozendal, county health officer, presented another project for National Health week, September 12 to 18, which was also accepted and will be combined with the WAC survey.

After the meeting there was a general "get acquainted hour" at which time refreshments were served. Judith Brown of the civilian defense office was hostess.

The improved "K"-type airship operated by the navy has a gas capacity of 400,000 cubic yards.

First sheet asphalt pavement was laid in 1870 in Newark, N. J.

**TOO LATE TO CLASSIFY**

FOR SALE—Practically new 35 m.m. Arguo color camera. Phone 4220. 3232ft

WANTED TO BUY—8 m.m. movie camera and projector. Either Eastman or Philmo. Phone 3292. 8-31

VACANCY at 900 Owens. Water and wood furnished. 9-3

2-ROOM furnished apartment for rent. Inquire 230 Main. 9-3

# Mountbatten, MacArthur May Wield Jap Pincers

(Continued From Page One)

vious targets of the allied global strategy.

**Mountbatten In**

Into this picture comes Mountbatten as the new Southeast Asia commander. It gives the allies their greatest opportunity of compelling Japan to spread her air force over an extremely wide range to fend off attacks which can be timed to come from either end of the geographical pincers.

Any attack launched by Mountbatten on Burma would draw Japanese forces from MacArthur's end, or at least reduce the number of reserves available.

# IMMENSE RAID BATTERS JERRY FACTORY CITY

(Continued from Page One)

particularly coastal watchers who heard the unbroken, muted growl of bomber engines for more than two hours. There was wide unofficial agreement that the RAF never before had thrown so much at the enemy across the channel at one time.

Nuernberg, which has great diesel plants and motor and electrical works, plainly had joined Berlin on the list of German cities to get the Hamburg treatment. It was last hit August 10 and after that attack it was estimated that 45,000 had been made homeless and 2500 had been killed. It had been raided six times previously.

In the August 10 raid about 1500 tons of high explosives and incendiaries were dropped on the city.

**Canadians Used**

A Canadian group formed part of the Nuernberg force and two Canadian bombers were reported missing. Canadian Mosquito planes also participated last night in sorties over France and the low countries.

A third series of Jap bulletins—they were issued as thickly as on the day after the last Berlin attack—upped the figure of British plane losses to "at least 62."

**REDS PUSH HALFWAY TO POLISH BORDER**

(Continued from Page One)

Russians almost 500 miles from Stalingrad, where last winter's far-reaching drive began, and has carried them to a point more than half way from Stalingrad to the Polish border.

**Cross Psel River**

Red Star said the Germans withdrew across the Psel to the west bank of the river after the Russians forced them to evacuate Lebedin, 25 miles north of Zenkov.

After blowing up bridges over the Psel and leaving the Russians in control of the east bank, the Germans appeared to be attempting to erect a powerful defense line on the west bank.

**Poltava Exposed**

Russian occupation of the east bank of the upper stretch of the Psel exposed Poltava, German base 45 miles south of Zenkov, to a flank attack.

A German communique, broadcast by Berlin and recorded by The Associated Press, said German troops in the Kharkov area and southwest of Orel were engaged yesterday "in heavy defense fighting against superior soviet infantry and tank formations." The Russians suffered heavy losses, including 161 tanks destroyed, the communique said.

**Fourth Push**

The new drive, resulting in the capture of Svensk, is the fourth major push undertaken by the red army since the summer offensive began July 5.

It was also announced in Moscow last night that Col. Gen. Andrei Ivanich Teremenko, hero of Stalingrad, had been promoted to the rank of full general.

# Cartoons to Assist Mexican Education

MEXICO CITY, Aug. 28 (AP)—The animated cartoons of Walt Disney are to go to work in the Mexican educational system, it was announced here today.

Disney, who was received yesterday by President Avila Camacho, said he will bring members of his staff from Hollywood to make pictures in collaboration with Mexican artists.

# Seabee Program to Be Heard Over NBC

A dramatic salute to the Seabees—the navy's construction battalions, whose mottoes are "Can Do" and "We Fight for What We Build," will be broadcast on the Cavalcade of America program over a nationwide NBC network Monday, August 30. Called "Dear Funny Face," the play was inspired by the heroism of a real-life Seabee.

Starring in the radio drama will be Alfred Drake, currently featured in the Broadway musical hit "Oklahoma," and Wendy Barrie, English-born screen actress.

# Bolivian Cabinet Quits Under Pressure

LA PAZ, Bolivia, Aug. 28 (AP)—President Enrique Penaranda's nine-man cabinet resigned in a body last night as a barrage of criticism was aimed at them in the chamber of deputies over suppression of a strike in the Catavi tin mines last December. Nineteen miners were killed and more than 30 wounded in the disorders which accompanied the strike.

# Seabee Program to Be Heard Over NBC

State Senator Marshall Corbett, who accompanied the highway commissioners and party on the trip, expressed his deep admiration for the present board.

Other speakers were R. H. Baldock, state highway engineer; Dr. E. B. McDaniel, president of the state automobile association, Federal Engineer Lynch and the three commissioners.

Others in the party were Herb Glazier, secretary of the commission; Bill Chandler, division engineer; Ralph Watson, the Oregon Journal; Joseph Devers, commission attorney; Sam Boardman, state park superintendent; Tom Davis, BPR engineer; C. B. McCullough, assistant state highway engineer; Joseph Gerber, Portland advertising man; Howard Smith, construction engineer; John W. Kelly, secretary of the state's post-war adjustment commission.

Railroad transportation was introduced into Japan by Commodore Perry in 1852.

# ALLIED BOMBS CHECK ITALIAN RAIL SERVICE

(Continued From Page One)

shot down, allied headquarters declared.

The worst beating was administered to the Germans by the Mitchells, which sent 16 nazi planes crashing to the ground out of a total of 40 to 50 fighters which sought to turn back the bombers and their P-38 escort.

Almost two dozen Fighters also pounced on the Fortresses which likewise were escorted by Lightnings.

In the Caserta attack, 35 to 45 Fighters came up to intercept the Marauders but they were driven off by Lightnings.

**Cost Nine Planes**

All the day and night operations cost the allies nine planes.

The Fortresses concentrated their attack on Sulmona, vital link in Italy's east coast rail line extending down to the heel and toe, in 12 minutes, dropping many tons of high explosives on the freight yards, munition stores, locomotive sheds, repair shops, warehouses, railway cars and the station.

(A German broadcast recorded by the Associated Press said nazi bombers raiding Algiers harbor Thursday night hit one warship and seven transports. Yesterday's allied communique reported this attack, but said there was only slight damage.)

# NIPPOS FLEE AS U. S. MEN TAKE HARBOR

(Continued from Page One)

American and Australian troops are infiltrating Japanese positions from the west and some have made contact with the enemy at the southwestern end of the field. A number of enemy pillboxes have been eliminated.

Air action was centered in the Solomon sector. In the vicinity of Vila, Mitchell medium bombers, Avenger torpedo bombers and Dauntless dive bombers for the second straight day attacked gun positions and supply barge hideouts.

**Kahili Bombed**

One hundred fifty miles above New Georgia on southern Bougainville, American four-engine bombers, escorted by fighters, attacked Japan's big air base of Kahili in a daylight raid last Wednesday. Four enemy fighters were shot down. There was no mention of American losses.

North of Bougainville, three Japanese destroyers were attacked by Liberators August 25 and one warship was hit squarely with a 500-pound bomb. Smoke enveloped the ship.

# Seabee Program to Be Heard Over NBC

State Senator Marshall Corbett, who accompanied the highway commissioners and party on the trip, expressed his deep admiration for the present board.

Other speakers were R. H. Baldock, state highway engineer; Dr. E. B. McDaniel, president of the state automobile association, Federal Engineer Lynch and the three commissioners.

# Klamath Bids for Extensive Post-War Highway Program

(Continued From Page One)

point near Klamath Agency to point near Sand Creek, eliminating Sun mountain grade.

2. Grade new location from Algoma hill to Barclay Springs, and widen and resurface from Barclay Springs to Modoc Point.

3-4. Locate and establish the routes through the Klamath Falls area from a point north of town to connect with the Merrill highway south and with the Weed and Greensprings highways at Weed junction west of town.

5. Widen and resurface north of Sand creek.

**Willamette Highway**

1. Standardize entire length of section from Oakridge to Goshen.

2. Further surfacing from Oakridge to Salt creek falls.

3. Further surfacing from Odell lake to Chemult.

**Lakeview Highway**

1. Finish the uncompleted improvements.

Here is the secondary highway program:

1. Standardization of highway between here and Hatfield, near Tulalake.

2. Standardize west side highway, No. 421, along Upper Klamath lake from Fort Klamath to Klamath Falls.

3. Standardize Midland market road.

4. Generally improve the Mack's store-Midland market road.

5. Grade and surface unfinished portions of the Malin-Poe valley road.

6. Improve road from Oleno through Poe valley.

**Through Routes**

City Engineer E. A. Thomas explained the first proposal on the city's part of the Klamath program is to get a definite location of the through-traffic routes.

Next, he said, is the long-awaited improvement of South Sixth street. He urged widening to four lanes, a separation-strip from Washburn way to the canal, adequate lighting, and a four-lane viaduct over the tracks.

Straightening and other improvement of the part of the west side highway within Klamath Falls was urged, as well as parking and improvement of odd strips and corners left by the various proposed improvements.

**North Entrance**

Thomas explained that it is expected a northern entrance to the city is to be built along Alameda street in Hot Springs, and thence along the east side of the canal and out into the Altamont district.

As a connection with this, the city planning commission has suggested a route be established from Esplanade street and Alameda, down Esplanade to Main, over private property to Klamath avenue, and out Klamath avenue to the Link river bridge. Widening and improvement of Eleventh street from Commercial to Upham, Third street from Klamath avenue to California, are included in the various suggested in-the-city projects.

**Admiral Board**

State Senator Marshall Corbett, who accompanied the highway commissioners and party on the trip, expressed his deep admiration for the present board.

Other speakers were R. H. Baldock, state highway engineer; Dr. E. B. McDaniel, president of the state automobile association, Federal Engineer Lynch and the three commissioners.

Others in the party were Herb Glazier, secretary of the commission; Bill Chandler, division engineer; Ralph Watson, the Oregon Journal; Joseph Devers, commission attorney; Sam Boardman, state park superintendent; Tom Davis, BPR engineer; C. B. McCullough, assistant state highway engineer; Joseph Gerber, Portland advertising man; Howard Smith, construction engineer; John W. Kelly, secretary of the state's post-war adjustment commission.

Railroad transportation was introduced into Japan by Commodore Perry in 1852.

# CLUB HEARS PROGRAM FOR SCHOOL YEAR

(Continued From Page One)

Arnold Gralapp, superintendent of the city public school system, spoke on the program for the current school year Friday at a regular noon meeting of the Rotary club.

Gralapp said that war educational requirements so far have shown that the basic subjects, particularly mathematics, are essential in the educational program as opposed to a strictly vocational training.

He continued that in connection with the war effort, a war training program for upperclass boys in high school will start this year. Juniors and seniors will be given classes in welding, mechanics and shop work. Physical education will be stressed and swimming required.

Speaking of the harvest program for this year, Gralapp said that students would help with the harvest this year as last.

In a discussion of post war problems Gralapp said that it was estimated that there would be about 10,000,000 young men returning to civilian life when the war is over and that probably about 5,000,000 of these would not be trained for a job. He said that the aim of educators after the war would be to give these boys an education in both vocational and academic subjects to fit them for the demands of postwar industries.

Nelson Reed was chairman of the Rotary meeting.

# Sea-Air Power to Supply Big Punch

# EDITORIALS ON NEWS

(Continued from Page One)

leged interview with Hitler at which he got so stirred up that a heart attack followed.

His impending abdication is rumored.

We outsiders can't be expected to know what it all means, but it adds to the picture of confusion in the Balkans. The Germans don't WANT confusion there. They need to keep everything under control at this possibly vital point.

FROM MacArthur today comes this triumphant announcement: "All resistance has ceased (as of Thursday night) on New Georgia."

The Japs remaining at Balroko harbor fled in barges across the Kula gulf to Vila on nearby Kolombangara Island. Ten thousand Japs are supposed to be now on Kolombangara, with us hammering them from New Georgia on one side and Vella Lavella on the other and our air and surface naval forces cutting them off from supply and reinforcement.

It looks like 10,000 more little yellow men are due to die for the glory of the empire.

EVERY time that happens, it HELPS US.

Choosing death instead of surrender is hot stuff from the glory standpoint, but not wholly effective from the MILITARY standpoint.

The motto of the Marines at Guadalcanal was: "Let the enemy die for his country; we'll stay alive and FIGHT for ours." That's the better way.

AT the other end of our Solomons pincer, we're closing in on Salamaua airfield and are reported in contact with the Japs at one end of the field, where we're eliminating Jap pillboxes.

Speaking of pincers, a New Delhi (India) dispatch today refers to a big one we may have in the making—with Mountbatten driving into Burma as one jaw and MacArthur thrusting toward Truk as the other. That would be a variation of the old front and back door strategy, compelling the enemy to divide his forces.

Your map will tell you of its possibilities.

# WAR LOAN TO BE EXPLAINED MONDAY NIGHT

(Continued from Page One)

An important meeting at which the entire Third War Loan program will be fully explained by speakers from the state war bond offices has been called for Monday evening at 8 o'clock at the Elks temple. The event is open to the public and all interested persons are invited, regardless of membership in the Elks lodge.

E. B. Hall, general chairman of the Third War Loan drive, on Saturday urged a large attendance at the Monday night meeting, and particularly urged all Elks and all war bond committeemen and workers to be present.

With the close of the American Legion's August bond campaign, the Elks lodge will open the intensive Third War Loan drive. Headquarters will be established in the Wilson building between the Elks lodge and the chamber of commerce, and Mrs. Claude Davis will be office manager.

Klamath's quota for the huge campaign is \$2,518,000.

Hall said that there are already many favorable indications of interest in the campaign. A committee headed by Bill Martin of the Weyerhaeuser operations has made good headway in promoting bond purchases from retroactive pay, and the union at Kalpine is working effectively on this program.

# Kilgore Warns Against Post-War Monopolies Here

(Continued from Page One)

WASHINGTON, Aug. 28 (AP)—War-spurred development of various synthetics and substitutes for natural resources drew today a contention from Senator Kilgore (D-W.Va.) that the nation must guard against their control by monopolies which, he said, could "wreck our postwar economy."

As chairman of a senate military subcommittee studying technological mobilization, he announced that open hearings will begin in mid-September on patents, industrial research and prospective monopolies, with one phase of the inquiry centering upon the peacetime future of synthetics.

The first catapult known to have been employed for war purposes was used by Dionysius, king of Syracuse, in the year 399 B. C.

Six of every 10 Australians live in harbor cities.
