PROPER DRIVING HABITS WILL PROLONG THE LIFE OF YOUR CAR

**DOES YOUR CAR SUFFER FROM "STILLWEAR?"**

Mileage driven isn't the only measure. Even cars that are put away or used only for short distances need regular inspection and service. Too much idleness causes "Stillwear." To avoid this deterioration, thorough lubrication and regular checkups are recommended.

**Reliable MOPAR Batteries**

MOPAR Batteries are especially designed for Plymouth, Dodge, De Soto and Chrysler cars, and Dodge Trucks. Your dealer knows the correct battery to install when necessary. Consult him.

**MOPAR Underseat Heaters**

Out of sight... out of the way. No usable space required. Highly efficient, scientifically designed to direct flow of heat uniformly across front and rear compartments. Controlled from dash.

**Good Ignition is Important**

Improper spark setting means hard starting in winter. Worse still, it wastes precious gas. Start this season with clean and correctly adjusted points. Ask your service man to check up regularly on everything under your car's hood.

**Where There's Smoke... There's Trouble!**

If your car's exhaust pipe smokes excessively, you're probably burning up good oil. Worn piston rings are often the cause. New MOPAR piston rings should prove a good investment. They'll save both oil and gas. Consult your service man.
