from the all-Jap island of New Britain, containing Rabaul.

THERE'S quite a mystery in the news about what is going to happen to General Marshall, with intimations that he may be "kicked upstairs" into command of all British and American armies.

This writer, who has no inside sources of information, doesn't know what it's all about but has a notion that a frank, plain, clear statement of the situation, explaining the considerations BACK of the Marshall rumors

and talk, might do enough good here at home to offset any harm it might do abroad.

That, of course, is only one uninformed individual's feeling about it. It may be that military plans and dispositions are involved that CAN'T be told because of the valuable information that would thus be given to the enemy.

GENERALLY speaking, we should be TOLD EVERYTHING POSSIBLE, so that an INFORMED public opinion may be back of whatever moves our government may find it necessary or advisable to make in protecting the nation's interest. In a democracy such as ours that is extremely important.

On Leave—Ben Lemire of the U. S. navy, son of Mr. and Mrs. J. B. Lemire, 3356 Altamont drive, is home from Farragut, Ida., on a 15-day leave. Ben has finished boot camp training and has been promoted to Seaman 2/c.

GOOD NEWS FROM THE PRODUCTION FRONT

.. Now, for fighter and worker alike..

the "BIG PUSH" is on!

On the battlefronts and on the production fronts the drive for Victory sets an even greater pace

Even as this message is released, the fleets and armies and air power of the United Nations press in upon our enemies from all directions. In Europe the attack comprises (1) mighty American and R.A.F. air blows from Britain; (2) assault by sea, air and land from Africa and through Italy; (3) the irresistible power of the great Russian war machine.

Against Japan there are (1) air and land attacks through China and from India; (2) our relentless push up through New Guinea from Australia; (3) attacks by our fleets on enemy outposts; (4) recovery of the Aleutians as a base for possible future offensives.

Back the Attack
We can all join the "Big Push"—and we must!—by buying the War Bonds and Stamps that put more and better weapons in the hands of our brave fighters. Buy more War Bonds and back the attack!

the crucial months ahead call for utmost devotion to the job—for even greater efficiency and productivity from those of us left to work when so many have gone to fight.

Keeping Pace With Change

Successful production for war means change—change to match or surpass the improved weapons of our enemies—change to fit our weapons to new and constantly changing theaters of war—change to build improvements and new designs into our war production, based on the lessons of experience on the actual battlefields.

Of course, changes in production mean temporary setbacks in volume of output, involving, as they do, many problems of tooling, material supply and retraining of manpower.

Nevertheless, General Motors is meeting the demands of these changes, with all the difficulties they present, and at the same time continuing to push production higher and higher—now more than 100% above a year ago—each quarter higher than the last. Through improved methods and more effective organization of production we are giving our fighting forces more and more guns, planes, tanks and other war supplies.

We know our job is to give our armed forces "what they want when they want it."

The ultimate in production will depend on the country's decision on the balance between war production and manpower requirements for other purposes.

Every American can well be thankful for the demonstrated ability of our military leaders to cope with the changing requirements of this mechanized and global war.

And it should be equally gratifying to know

that American industry has also been able to adapt itself to these changing conditions. Cooperating with the military, American industry is performing the greatest production feat in all history.

The Job Ahead
The crucial months ahead will doubtless bring equal if not greater problems, as new strategies call for new equipment.

There must be no let-up in the war effort. There must be the utmost devotion to the job on the part of every man and woman in industry. We are acutely conscious of the need for increased effort, improved methods, greater efficiency and, above all, more effectiveness from available manpower.

As long as the "Big Push" is on along the battlefronts, the production push for more and better weapons will continue in General Motors plants—so that we may deliver, as we are now delivering, our allotted share of the overwhelming air power, fire power, armored power, mobile power and sea power which, on battlefronts the world around, already foretell the Axis' doom.

A SALUTE TO THE SPARS

During Klamath Falls SPAR Week
Sept. 22 to Oct. 2
Serve Your Country—Where Your Country Needs You Most!

SEMPER PARATUS

or "always ready," the motto of the United States Coast Guard, is exemplified by this alert member of the SPARS, Women's Reserve of the Coast Guard.

Today in every part of the world the men of the United States Coast Guard are fighting to preserve this great democracy of ours. And here at home in every Coast Guard station the Women's Reserve of the Coast Guard, "The SPARS," are doing the job that made possible the release of these men for service all over the world.

More women are needed by the SPARS. If you are between the ages of 20 and 36; have had at least two years of high school or two years business school; are not married to a Coast Guardsman; have no children under 18 years of age, and believe you can pass the required physical and vision tests, then you may be eligible to take your place beside these fighting women.

SPARS are sent to Palm Beach, Florida for their recruit training; receive \$200 worth of smart uniforms, and the finest training available; a chance to travel and meet the nation's finest women and receive the same pay and allowances as Coast Guardsmen of the same rating. Be aboard the Palm Beach Special on your way to serve your country when it leaves Portland October 12th. For further information contact SPAR representative in the Chamber of Commerce Building, 323 Main Street, Klamath Falls.
