Bend Pilot Plant Will
Use Process Seasoning

By ALBERT HERMANN
In Charge Western Pine Laboratory
(Editor's Note: Yesterday, Mr. Hermann told of experiments in the Western Pine Laboratory at Portland in extracting water and resin from pine wood to save the cost of kiln drying.)

The process has been brought along in the laboratory in larger and larger sizes of equipment and in quantities up to 200 feet board measure in a single extraction. However, there remains between this small scale laboratory work and the plant required for full scale production, such a large gap that we should be foolish to attempt to bridge it all at once. The answer is the erection of a so-called pilot plant at Bend, Oregon with a capacity of 5000 ft. BM at a charge.

In this plant it should be possible, because of its very complete equipment with the necessary control and measuring devices, to work out the economics and design details for a regular commercial plant. The Bend unit is now under construction and barring unforeseen delays in delivery of equipment, large scale extraction should be under way by the middle of the year. So far as can be forecast at this time, about six months of work will be required to determine the feasibility or failure of the process.

I have mentioned thus far only the beneficial effects on the grade, appearance and paintability of the product. There are numerous other advantages to be credited to the process. Not the least of these is the production of 50 to 70 pounds of extractives per thousand feet of lumber treated. These extractives prove upon analysis to be quite different from those obtained from the Southern Pines either by the turpentine of living trees or by the extraction of stumps.

According to Dr. Anderson's analysis, Ponderosa Pine sapwood extractives show about 70% of fat, 15% of completely purified rosin, known to the chemist as abietic acid, something less than 5% of turpentine, 5% of unsaponifiable material and the rest free fatty acids. Extractions from heartwood and from stumps will probably show different percentages of the same materials. All of the products so far discovered in extractives have commercial uses right now and it is quite possible that the extractives secured will more than pay for the whole process. If this should prove to be true, the cost of seasoning our material, which now is something like \$3 per thousand feet, should be direct profit.

SHRINERS TO HOLD
CEREMONIAL HERE

Hillah temple's annual spring ceremonial will be held in Klamath Falls on Saturday, May 27, with Ed Ostendorf general chairman of the committee. The special issue of the Red Fax is devoted to the program which will bring several hundred visiting Shriners to Klamath Falls, and pictures stress the military theme. Registration is scheduled for 2 p. m. at the Willard hotel, with a business session at 4 p. m.; social hour, 4 p. m.; banquet, 6 p. m., all at the Willard. There will be a band concert by the Hillah temple band at KUHS at 7:30 p. m., followed by a reception and exemplification of ritualistic work from 9 p. m. on. This phase of the program will also be held at the school, Ostendorf announced.

Tulelake Rotarians
Hear Dr. Ferguson

TULELAKE—Dr. David Ferguson, retired army chaplain and now director of the transient labor camp here, was guest speaker at the Rotary club luncheon Wednesday. Dr. Ferguson was introduced by W. G. McClymonds, chairman for the day. His topic, "Our Allies, the British," dealt with the every day lives of the people of that nation. Guests for the day were Captain Earl Schaub of the California state guard, here to inspect the Tulelake high school cadet corps; Charles Rose, Tulelake, commanding officer of the local state guard unit, Carl Franson, Yreka, and Mr. Hayward, Newell.

LONG TERM PLAN
PORTLAND, May 25 (AP)—

A long-term farm mortgage plan, with loan maturities up to 40 years, was announced today by the First National Bank of Portland.

Quickly and efficiently loosens rusty bolts, threads and springs . . . Pt. **29c**

Recap Service
6.50 Inc. Fed. Tax
6.00x16
If your tires are in recappable condition we'll recap them in accordance with govt. specifications.

Wheel Bearing
29c Lb.
A fibrous, clinging grease. Famous Cross Country quality label assures your complete satisfaction.

Grade III Recapped Tire
10.15 Inc. Fed. Tax
6.00x16
Made on a selected carcass and capped with the finest materials. Fleet-Tested to give you the maximum mileage and satisfaction in this grade tire. Bring your certificate to Sears for service.

Transmission Grease
85c 5 Lbs.
Semi-fluid and fibrous. Reduces noise, will not leak through the gear case. Heavy duty quality.

Gear Lubricant
89c 5 Lbs.
Summer grade. Extreme pressure type for transmissions, differentials and steering gears.

Cup Grease
89c 5 Lbs.
For cars, trucks, farm machinery not needing high pressure grease. Forms a protective cushion.

YOUR OUTDOOR LIFE

FOR BEST CAMPING COMFORT . . .
SLEEPING BAG

14.95
(Usual Deposit: Carrying Charge)
Convenient short fold sleeping bag with full 30-inch slide fastener. Filled with 3 pounds of resilient virgin wool, stitched to prevent shifting or lumping. Filling is always evenly distributed and comfortable to lie on. Closely woven, water-repellent drill cover will stand up under all kinds of hard, outdoor wear. Folds into compact roll. Forest green color.
