# LUMBER OPERATIONS RETURN TO NORMAL

PORTLAND, Ore., June 5 (AP)—Lumber production had returned almost to normal in the Pacific northwest today with the return to work of crews of five CIO sawmills in Portland.

Seattle employers reported they were short handed because some men who joined in the walkout of some 40,000 industry workers had found work in other fields. The work stoppage was a protest against a labor board decision refusing requested wage increases.

The WLB, however, has agreed to reheat the wage demands, and both the AFL and CIO said they would be represented at the rehearing in Washington on June 12. A negotiating committee representing lumbering and logging workers in five western states was meeting here today to discuss the forthcoming hearing.

The CIO International Woodworkers of America has asked for a pay boost from the basic 90 cents an hour to \$1.02, while AFL seeks \$1.05 an hour.

**BEWARE OF PIN-WORMS**  
Wartime living conditions may be the cause of spreading Pin-Worm infection. Scientific reports in many communities have shown at least one-third of the examined children and grown-ups to be victims of Pin-Worms—often without knowing what was wrong!

**New Discovery Hailed By Doctors**  
After centuries of distress caused by Pin-Worms, a new and highly effective way to deal with this stubborn pest has recently been discovered. This scientific discovery, hailed by medical authorities, is a remarkable drug (gentian violet). It is the vital element in P-W, the new Pin-Worm treatment developed by the laboratories of Dr. D. Jayne & Son, America's leading specialists in worm medicine. P-W tablets are small and easy to take, and they act in a special way to destroy the creatures. So don't take chances with Pin-Worms. At the first warning sign, ask your druggist for P-W, and follow the directions. P-W means Pin-Worm relief!
