TAX PROPOSED BY TULELAKE CITY COUNCIL

TULELAKE — Taxation headaches held the city council in session until midnight Monday while those whom a newly proposed city tax ordinance will reach argued pro and con on the city's proposal to levy a one and one-half mill tax on gross business incomes. No decision was reached after several hours debate and the proposed ordinance was tabled until such time as a more complete study of the problem can be made. The proposed tax would increase the city's income by an estimated 40 per cent.

Future city improvements and the continuance of the present city upkeep program hinge on the proposed measure. The proposed tax ordinance is similar to the original document adopted by the council in the early stages of incorporation and similar also to those in force in most other municipalities of the state, and, according to city fathers, is the most equitable form of assessment.

City Attorney Tebbe, Yreka, and Councilman W. R. Moore, chairman of the committee serving on the tax issue, and his committeemen will continue study of the issue.

With $300 on hand for beginning the public playground program in operation, children of Tulelake may look forward to supervised play during the coming summer months. The project, one of a 24-point city improvement plan proposed recently by Councilman Moore, will be sponsored jointly by the city and the Tulelake Rotary club. Donations of $100 each were given by the Rotary club and the city and $50 each by the Tulelake Parent-Teacher association and the chamber of commerce. An additional $100 is needed to carry the project through.

A small building which has been used as a shop on the elementary school grounds has been offered for use of children who will be taught arts and crafts. Play equipment on the school grounds will also be utilized. The city park adjacent to the school grounds will afford a wider area for play.

HEALTH QUIZ

	YES	NO
Do you have poor digestion?	☐	☐
Do you feel headachy after eating?	☐	☐
Do you get sour or upset easily?	☐	☐
Do you feel tired—listless?	☐	☐

Now everyone knows that to get the good out of the food you eat—you must digest it properly. But what most people don't know is that Nature must produce about two pints of the digestive juice—liver bile—each day to help digest your food. If Nature fails, your food may remain undigested, lie sour and heavy within you.

Thus, it is simple to see that one way to aid digestion is to increase the flow of liver bile. Now, Carter's Little Liver Pills start to increase this flow quickly for thousands—often in as little as thirty minutes. When bile flow increases, your digestion may improve. And, soon you're on the road to feeling better—which is what you're after.

Don't depend on artificial aids to counteract indigestion—when Carter's, taken as directed, aid digestion after Nature's own order. Get Carter's Little Liver Pills today—only 25¢. You'll be glad you did.

KLAMATH FALLS OWNS 1305 LOTS

A report of city-owned property, read to the council Monday night at their regular session by Police Judge Harold Franey, showed that the city owns 1305 lots in Klamath Falls at a total appraisal value of $293,678.80.

Liens on city-owned property total $272,192.58. A sum of $194-420 has been paid out the past year in taxes and other expenses on the lots and $11,941.02 in due tax taxes, making a total of $116,361.93 actual taxes and expenses on property.

The entire city investment in property is $388,554.51, with a deficit of $94,875.71.

According to the report, a number of these lots have been allowed to go into county certificate for back taxes and the $11,941.02 is approximately the sum which will have to be paid the county before the lots can be sold. In many cases lots, according to the report, are not worth the city paying taxes on them. The city, however, has the right to pay off the county should the lots come up for sale.
