

Landing Craft Approach French Invasion Coast

Pinpointed in wakes of spray, landing craft approach a beachhead on the northern shore of France on D-Day morning as the allies thrust against Fortress Europe. This reconnaissance photo is one of the first two showing invading forces on the French side of the channel. (AP Wirephoto from signal corps radiophoto.)

'INVASION COAST' NETWORK—This map shows principal rail lines and waterways in the "invasion coast" section of northern France and the Low Countries.

Rain Aids Crops In State During Week, Bureau Says

PORTLAND, June 8 (AP) — Oregon crops and pastures were aided by rains over most of the state last week, the U. S. weather bureau said today. Accompanying winds, however, caused some lodging of heavy grain in western areas, halted haying, and damaged some cut hay. Not yet completed sheep shearing was delayed. The weekly crop-weather survey reported damage to grain

from the May 23 frost in eastern areas. Pastures in coastal counties are excellent, the bureau said, although eastern pastures require still more rain. Ranges and unirrigated pastures improved during the week.

Strawberries, gooseberries and a few cherries were being picked last week, and nuts were generally well set, the survey showed. Eastern potatoes, cut back by frost, began recovering. Klamath county, whose onions suffered severe frost damage, is replanting large acreages to other crops.

Harvest of lettuce and peas and sugar beet thinning was well underway. Corn planting continued, with early corn up but showing the need of warmer weather. Moderately cool weather prevailed most of the week. Top temperature was 84 degrees at Wasco; minimum 26 at Madras.

Removal of Cheese From Ration List Regarded by OPA

WASHINGTON, June 8 (AP) Removal of all so-called perishable types of cheese from rationing within the next few days is under consideration by the office of price administration. Conferences are being held with the war food administration to decide whether the step should be taken to speed perishable varieties into consumption to prevent possible spoilage. Cheese production now is at a peak, and industry reports show that the supply is beginning to back up.

The move would eliminate point values on such types as cream cheese, Neufchatel, Swiss, creamed cottage cheese, Munster, Limburger, brick, Breaux and Camembert. Cheddar cheese and varieties containing more than 30 per cent of the type would continue to be rationed, it was understood.

The current ration cost of all cheese is 10 points a pound. London's postoffice directory contains many odd and amusing names as Champagne, Butter, Cheese, Mutton, Fullilove.

P.O. Pin-Up

Jean Parker, above, curvilinear cutie of the screen, is the gal Army mail clerks in Italy say they would most like to play "Post Office" with.

PELICAN SUNDAY
