Beauty IS YOUR DUTY
by RITA WHISENANT

Very important, these outstanding days, to give your hair the treatment it deserves in between trips to your professional beauty operator. I mentioned brushing last week... so let's take that for granted.

NOW, suppose you've shampooed your hair and here's a tip to follow while hair is still wet and before we set pin curls. Smooth on a little of the fragrant, solid, lanoline-type cream. Do try because once will be enough to sell you the idea for when your hair is dry and take either comb or brush, you'll see the difference immediately—in the luxurious of your hair, in its soft and complete manageability.

You've been plotting another treatment, and haven't yet been able to make it, use the cream by brushing it well dry hair ends and grown nearly vanished curls. It's amazing to see how easily the trouble makers can be rolled back into curl shape.

course the final word on hair care for everyone is a little of the cardinal rule: dare forget to brush your hair.
