HEADQUARTERS, 13th AAF, SOUTHWEST PACIFIC—A Malin, Ore., flier was in the attacking formation when 13th AAF Liberators, in a bold, daylight raid, opened their drive against Japan's Palau islands base.

S/Sgt. Donald Ratliff, Malin, was radio operator on one of the giant Liberators of the 13th's "Bomber Barons." The raid marked the launching of a 13th AAF campaign to reduce the strongest Japanese base remaining as protection for the Philippines, 500 miles away.

Making the long overwater flight without fighter cover, the Liberators set huge fire on Palau. Enemy installations were severely damaged by the bomber crews reported on their return.

The assignment to knock out Palau was given to S/Sgt. Ratliff and the other 13th AAF fliers, after the veteran air force had neutralized Truk and Yap to the east. The 13th began its offensive in the battle of Guadalcanal and defeated the Jap air power at New Georgia, Bougainville, Rabaul and Kavieng.

Public Warning!

BEWARE OF PIN-WORMS

War-time living conditions may be the cause of spreading Pin-Worm infection. Scientific reports in many communities have shown at least one-third of the examined children and grown-ups to be victims of Pin-Worms—often without knowing what was wrong!

Watch out for the warning signs that may mean Pin-Worms in your child or yourself: the tormenting, embarrassing, itchy, the uneasy stomach, bed-wetting, nervous edginess, finicky appetite.

New Discovery Hailed By Doctors

After centuries of distress caused by Pin-Worms, a new and highly effective way to deal with this stubborn pest has recently been discovered. This scientific discovery, hailed by medical authorities, is a remarkable drug—gentian violet. It is the vital element in P.W., the new Pin-Worm treatment developed by the laboratories of Dr. D. Jayne & Son, America's leading specialists in worm medicines. P.W. tablets are small and easy to take, and they act in a special way to destroy the creatures. So don't take chances with Pin-Worms. At the first warning sign, ask your druggist for P.W., and follow the directions. P.W. means Pin-Worm relief!

RESERVE CONVERTED INTO PAYING FARM

PORTLAND, Sept. 26 (P)—It took just a year to convert a swampy 50-acre duck reserve into a diversified farm that's expected to yield \$50,000 this season.

Porter W. Yett, Portland contractor, said that, in view of taxes, he decided to desist supporting the ducks out on Sauvie's island. Agriculturists suggested a "planned farm"—holding 100 acres idle each season, and rotating crops on the other 400.

Some of the results to date: \$20,000 from 100 acres of potatoes; \$12,000 from 100 acres of barley; \$3,800 from an acre and a half of turnips.

"It didn't take long to put in the seed," Yett said, "and the most marvelous soil imaginable did the rest. My total investment—something like \$40,000—will be returned in this first year's crop."

The experiment has drawn visitors from as far as Iceland and New Zealand.
