

PROGRESS ON PARK REPORTED TO COUNCIL

Residents of Klamath Falls were urged to look over improvements on property obtained this past year for Klamath Memorial park, the city's new cemetery, three miles southwest of town and overlooking Lake Ewauna.

R. E. Cantrall, council member of the cemetery committee, reported at Monday night's meeting that roads are now graded, curbs and gutters cemented, and workmen are cutting the contour of the ground to blend in with the curbing.

Lots to Be Sold
C. A. Dunn holds the contract for work at the cemetery and has the roads yet to rock and asphalt to lay. Cantrall reported that the lawn should be in by April 1 of the coming spring and when the lawn is up, lots will be sold. That should be about July 1, he observed.

Routine business took up the council's time Monday night. It was reported that John Raffetto advised the city dump grounds, visible from the Marine Barracks road, was ready for the bulldozer to push refuse into the pit, the fence was completed and ready to paint. The city is to furnish paint and sprayers with Raffetto doing the job.

Painting Planned
The Junior chamber of commerce, at the request of Bob Chilcote, was given permission to paint "Register to Vote" signs on the city curbs.

Alva Downs, city building inspector, told the council that September permits totaled \$12,778.40, an increase over past months. He announced that several larger jobs were in the offing and ready to go with the priority OK.

Lengthy discussion involving the animal pound commission ordinance took up quite some time. Policy and practice of the five-man commission was threshed out by the city fathers and it was finally decided that the commission would have power to hire the poundmaster subject to approval of the mayor.

Two Earthquakes Recorded Monday

SPOKANE, Oct. 3 (AP)—Two earthquakes—at 1:39 and 1:47 p. m.—were recorded by the seismograph at Mount St. Michael's yesterday.

Similar tremors were noted in Pasadena, Calif., several minutes later, indicating Spokane was much nearer the center of the disturbance than the California city, the scholastic said.

LIBEL CASE JURY CHOICE UNDERWAY

SPOKANE, Oct. 3 (AP)—Selection of jurors to hear the \$250,000 libel action brought by Joseph A. Albi against the American News company and its local distributors, continued today after the president of the Spokane athletic round table, through his attorney, had accepted for his organization "the honor" of being the sole cause of the repeal of a bill granting pensions to members of congress.

Albi contends in the action he was libeled by an article in Pic magazine dealing with the "Bundles for Congress" drive sponsored by the round table. A defense statement during questioning of prospective jurors that the bundles for congress drive was the sole reason for the pension bill's repeal brought an objection from Attorney Francis J. McKeivitt who represents Albi. But when told it was "so stated in the pleadings," McKeivitt "accepted the honor" with a smile.

BOARD ISSUES TEAM TRAVEL RESTRICTIONS

The Klamath Union high school board last night issued orders that no student taking part as a member of the high school teams in out-of-town athletic contests be permitted to travel to such contest in an automobile unless the car is driven by a licensed adult operator.

This action was taken as an aftermath of the accident in which Nicholas Demetrakos, a high school student, was killed near Chemult Saturday.

While Demetrakos and other members of his party were not traveling as members of the high school team, and were entirely on their own in taking the trip to Salem to a football game, the high school board members said they believed a statement of policy by the board would encourage parents to adopt the same policy with regard to youngsters traveling to games as spectators.

The order prohibits use of student drivers, even though licensed, from driving the cars that carry athletic squad members to games. In the past, some licensed student drivers have driven such cars, but no accidents have occurred.

Seattle Factories Given Orders For Reconversion

SEATTLE, Oct. 3 (AP)—Six small Seattle manufacturers have been granted the first spot reconversion orders in the Pacific northwest, the war production board announced yesterday.

Restrictions placed on the reconversion included limiting employment to less than 50 persons and use of no materials needed in the war effort.

Companies included two fishing tackle concerns, two manufacturing bed springs and spring mattresses, one oil burner firm and an electric water heater company.

NEW LUNG SURGERY TECHNIQUE TRIED

VANCOUVER, B. C., Oct. 3 (Canadian Press)—A new technique in lung surgery which the inventor, Dr. Otto DeMuth, believes will mean a 90 per cent chance of success in an operation once considered dangerous, will be demonstrated before the International College of Surgeons in Philadelphia.

The technique, used by Dr. DeMuth in an operation upon a Vancouver woman recently, calls for use of living tissue as a ligature after removal of a portion of the lung. The fresh tissue decreases the chance of hemorrhage, the doctor said.

The tissue is bound in larial style around the edges of the cut with a spindle-ended tube designed by Dr. DeMuth.

Dustless Home For Postwar Possible

PORTLAND, Oct. 3 (AP)—A housewife's utopia of a dustless home without the aid of either mop or dustring was advanced today as a postwar electrical development.

The Northwest Light and Power association, meeting here yesterday, watched a demonstra-

tion of the "precipitron"—a gadget which traps dust particles from the air and disposes of them.

The first electrical appliances to appear on the postwar market won't be new—but housewives will think they are, reported S. S. Brundage, Portland.

The gadgets—electric garbage disposal units, automatic laundries, home freezers, and regulated "indoor climate"—came

out in late 1941, Brundage said. "But so few models were made that they are not well known to the public," he added.

Bike Stolen—Wayne F. 1742 Menlo way, reported police that his bicycle, a S. Flyer, was stolen October

THERE'S NO DIFFERENCE

You can always be sure of this—the coffee in the Hills Bros. vacuum-packed glass jar and the Hills Bros. red glassine-lined carton is exactly the same blend of the finest coffees obtainable.

Our registered trade-marks, the familiar "Arab" and "Red Can Brand," which appear on both containers is our guarantee of this.

"Although there's no difference between the Hills Bros. Coffee in these two types of containers, there is a difference between Hills Bros. Coffee and other coffees. One of the reasons is because of the way Hills Bros. Coffee is roasted . . . a little at a time instead of in bulk. This exclusive Hills Bros. process—*Controlled Roasting—eliminates variations in flavor because it prevents under roasting or over roasting. The result is that every pound of Hills Bros. Coffee you buy has the same matchless flavor.

Since the Wartime Package is not vacuum-packed, for freshness' sake, buy only one package at a time.

"Now that's what I call good coffee!"
