

BROWNS LEAD SERIES TILTS WITH 6-2 WIN

(Continued from Page One)

Break Ice
The Cards broke the ice in the very first inning. One was out when Vern Stephens let Hopp's grounder get through him for a two-base error. Cooper scored Hopp with a single to left.

Wilks met his downfall in the first after two were out. Successive singles by Moore, Vern Stephens, George McQuinn, Al Zarilla and Mark Christian knocked him out and brought in three runs. Relief Fred Schmidt hit in Zarilla with the fourth when he wild pitched back in the fifth game with a run in the seventh but the Browns pulled away again in their half against Zarilla, who had taken the lead when Schmidt went out for pinch hitter.

WHATEVER may be SAID, this is the COLD POLITICAL FACT: Whether he SOLICITS it or not, FDR will get the vote of EVERY informed, determined and purposeful communist in America, because only through the New Deal and its CAPTIVE Democratic party can the communists hope to achieve their objective of one-man, one-party, totalitarian government in the United States.
The Republican party offers them nothing. ONLY the New Deal-captured Democratic party, with its politically-frozen, counter-advance Southern vote, offers the communists and their lack a POSSIBLE vehicle for success.

Jap Forces Attack Foochow

CHUNGKING, Oct. 6 (AP)—Japanese forces which invaded maritime Fukien province have reached the northwestern suburbs of Foochow, the Chinese high command said tonight.
The Japanese, who have occupied the important port before, apparently expect to take it again without difficulty. The landings in Fukien were announced by Tokyo early this week, and were pictured as part of an attempt to forestall American landings from the Pacific which would "sever our (Japanese) communications with the southern region."

THE OLD JUDGE SAYS...

"It sounds almost like a miracle, Judge... how did we ever do it?"
"American industry did it, Sally. When the Japs conquered the chief natural rubber producing centers of the world they thought they had dealt a death blow to our war effort. But, in less than two years, we are producing enough synthetic rubber in this country to supply all our military and essential civilian requirements."
"Our rubber experts knew how to make it but the most practical process at the time required huge amounts of industrial alcohol... far beyond the already over-

taxed capacity of our industrial alcohol plants. So, overnight, our country's beverage distillers stopped making whiskey and produced hundreds of millions of gallons of the vitally needed alcohol.
"As a matter of fact, Sally, a high government official said recently... synthetic rubber is from 6 to 9 months ahead of where it could have been if alcohol had not been available for butadiene production."
"We were really fortunate, weren't we Judge, to have a beverage distilling industry in existence... able to help perform this great wartime miracle!"
