WERE YOU THIS CUSTOMER?

Customer: May I place an order for blocks?

Us: I'm sorry. We are unable to take orders for blocks at the present time.

Customer: How about an order for slabs?

Us: No. Our dry slab wood is gone, and we are so far behind with green slab wood orders, we had to quit taking orders for the present. The supply is short, and the season is late, and we may be unable to get out all the orders on hand.

We do have pre-to-logs and coal, and can make delivery in a short time.

It is a typical conversation carried on all day at our door by telephone and at the counter. Have you understood why this situation exists in Klamath?

Blocks have been, and will continue to be a scarce item of supply. If you have some, you should use them carefully, only as kindling. Use other fuel for cooking and heating. Pre-to-logs, coal and slabs can all be used in all types of cooking and heating equipment, sometimes with just a slight adjustment. We were several months behind when stopped taking orders and at the present rate of supply will be some time before we will be able to again take orders.

Other reason for the shortage is our increased population. Rationing records show that 30% more fuel was delivered this year than last in Klamath Falls area. Our supply from the mills was less than former years, so we have no stockpile to draw from.

Let's all work together and see this thing through. No one needs to go cold or without cooking fire if they will adjust to the available supply.
