

WHEAT MARKET LESS ACTIVE IN PORTLAND

PORTLAND, Jan. 11 (AP)—The cash wheat market here last week was less active than the previous week and did not follow the advances in midwestern wheat futures markets, the war food administration said today.

Supply and demand appeared to control the Portland market, which maintained a generally steady tone. Prices on most classes were unchanged from a week ago, but ordinary soft white bids were down one-half cent a bushel.

While mills eagerly sought wheat with 11 per cent and higher protein, demand was only moderate for ordinary types and qualities. Requirements for ordinary types had apparently already been filled by most mills in connection with recent flour sales to government agencies.

Wheat offerings at country points were somewhat freer, trade reports showed, but supply of higher protein qualities was only moderate to light. Feeding qualities of wheat were in steady demand from mixed feed manufacturers.

Portland had 148 cars of the 395 at Puget Sound and Columbia river terminals, where receipts were lighter for the week. California buyers were moderately in the market for protein types of hard white and hard red winters.

DAIRY CONVENTION SLATED FOR OSC

The state-wide interest in the relationship of dairy sanitation and milk handling methods to the control of undulant fever will be reflected in the program of the 51st annual convention of the Oregon Dairymen's association at Oregon State college January 15-17. The main program will start Tuesday, January 16, following committee sessions on Monday, according to programs just distributed by Roger Morse, secretary of the association and extension specialist in dairying at OSC. Among eight to 10 principal speakers on the session programs, at least half will touch on some phase of the disease-control subject. Speakers listed include E. L. Peterson, director of the state department of agriculture; P. M. Brandt, head of the animal industries division at OSC; Dr. R. B. Staub, Portland physician; Harold Ewalt, assistant extension dairy specialist at OSC; Charles A. Smith, Medford, chairman of the Oregon Dairy Products commission; F. J. Meier, Corvallis, president of the Oregon Dairy council; and Ada R. Mayne, manager of the council.

Roseburg Market Wage Schedule Set

SEATTLE, Jan. 11 (AP)—Retrospective to last September 21, the regional war labor board announced today, is the following wage schedule for a 48-hour work week in the meat markets of Roseburg, Ore.

Journeymen meatcutters, .9375; journeymen sausage makers and slaughter house workers, 1.033; third year apprentices, .79; second year apprentices, .655; second and six months apprentices, .58; first and six months apprentices, .50.

NEW kind of ASPIRIN tablet doesn't upset stomach

When you need quick relief from pain, do you hesitate to take aspirin because it leaves you with an upset stomach? If so, this new medical discovery, SUPERIN, is "just what the doctor ordered" for you.

Superin is aspirin plus—contains the same pure, safe aspirin you have long known—but developed by doctors in a special way for those upset by aspirin in its ordinary form.

This new kind of aspirin tablet dissolves more quickly, lets the aspirin get right at the job of relieving pain, reduces the acidity of ordinary aspirin, and does not irritate or upset stomach—even after repeat doses.

Tear this out to remind you to get Superin today, so you can have it on hand when headaches, colds, etc., strike. See how quickly it relieves pain—how fine you feel after taking. At your drug-gist's, 15¢ and 39¢.

Report on County Farming Program Slated for OSC

A report on another outstanding year for the Klamath county agricultural conservation association will be presented to the state conference of Oregon AAA committeemen at Corvallis January 18-20.

Representing the county association at the conference will be Ray Loosley of Fort Klamath, acting chairman of the county AAA committee, Roy Beasley of Merrill, acting vice-chairman; Jesse N. Drew of Bonanza or Jack Ratliff of Malin, acting member and Ted Dunwoodie, assistant secretary.

Weekly Market Trend

Editor's Note: The following market information is supplied from material obtained over the government leased wire in the office of the extension economist at Oregon State college. The material in the form of a weekly summary of trends in the livestock market, not intended to replace day by day market reports.

PORTLAND MARKETS
North Portland livestock markets were active on Monday, January 8. In the cattle division, steers and heifers reported strong to 25 cents higher. Beef cows were up as high as 50 cents. A few leads of good to choice fed steers brought \$16.25 to \$16.50. Hogs were fully steady with good to choice slaughter hogs weighing from 170 to 270 pounds selling at the ceiling price of \$15.75. The lamb market was active with prices 25 to 50 cents higher. Good to choice woolled lambs brought \$14 to \$14.75, with choice lambs as high as \$15.

MID-WEST MARKETS
A near record run of cattle for January occurred at Chicago Monday, January 8. Many were carried over. Midwestern markets were somewhat irregular with cattle and calves mostly lower, hogs active, and sheep and lambs mostly around steady.

HOG OUTLOOK
The recent government pig crop report shows a sharp drop in the number of sows to farrow this spring. At 22,000 the Oregon estimate is down to 67 per cent of last year. In the whole country, however, the number is expected to be 93 per cent of 1943. Last fall the number of sows farrowed in the United States was estimated at 68 per cent of the 1943 fall, and 49 per cent in Oregon. The national goal for spring pigs in 1944 was set at 102 per cent of 1943 and the Oregon goal at 97 per cent of the 1943 spring pig crop.

WOOL MARKETS
The broad demand for domestic wool continued into the new year. Although there is a little confusion among manufacturers as a result of differences in interpretation of recent WFB directives and amendments, there is little doubt in their minds that they will need enormous quantities of wool. During the week ending January 6 sales were made of heavy quantities of original bag fine wool averaging to good staple. Graded half-blood wools were also active. The demand for scoured pulled medium wools continued and some dealers are sold out up to three months ahead. Fine wool from Colorado in the original bag and running average to good staple with a shrinkage of 62 to 65 per cent sold at gross prices ranging from 42 to 44.5 cents a pound. Average weekly consumption of shorn and pulled wool on a grease basis for September 1944 was 18,300,000 pounds, compared to 22,000,000 pounds of domestic and 12,100,000 pounds of foreign wools. Total consumption of wool in 1944 through September was 732,700,000, which compares to 821,700,000 pounds for the same period in 1943.

Conservation and soil improvement work accomplished under the 1944 agricultural conservation program in Klamath county will approach a record level, preliminary records show.

Among the accomplishments are drainage of approximately 10,300 acres of cropland by construction of 27 1/2 miles of drain ditches under the program; the improvement of drainage and control of water on 9700 acres of irrigated meadow pasture; the leveling of more than 6500 acres of irrigated cropland and other reorganization work on irrigation systems affecting nearly 5600 acres; and application of sulphur on approximately 11,700 acres.

In addition to the practice program, considerable time was given to service to farmers through the other programs and wartime assignments handled by AAA committeemen. These included consideration of 627 applications for lumber for farm use and the distribution of 325,912 board feet of lumber among these applications; 859 recommendations to selective service on draft age men employed in agriculture; 906 applications for farm machinery, crawler tractors and trucks required priority recommendations; and 5401 applications for gasoline for all farm machinery and car use had to be acted on by the county farm transportation committee members.

CLOSING DATE SET FOR '44 FARM REPORTS

February 15 is the closing date for Klamath county farmers to file their 1944 performance reports. A producer must file a report for his farm on or before that date in order for the farm to be eligible for payment under the 1944 agricultural conservation program.

Failure to file the report for a farm will make the farm ineligible for program payments and producers will not be paid for any 1944 practices carried out under the AAA program.

The same closing date will apply to farmers turning in their receipts for clover seed and reporting their hay seed harvest.

Manufactured, the emulsified DD contains about 4 per cent of an emulsifier which causes it to mix with water.

DD is a mixture of two chemicals, by-products of the petroleum industry, and had given promising results in tests as a destroyer of nematodes on several crops. DD should not be confused with the new insecticide known as DDT.

Increase in Forest Appropriation Asked

WASHINGTON, Jan. 11 (AP)—An increase of 27 per cent over appropriations for the current fiscal year is asked for public land and forest management in the 1946 budget submitted to congress.

The agriculture department seeks \$26,228,000 for the administration and operation of the national forests, compared with \$25,465,340 for the current year. Both figures are exclusive of overtime pay.

More than 80 per cent of the increase is for forest highway construction, authorized in 1942 but for which no money has been provided. The remainder is largely for forest fire cooperation, timber sales and the mapping of national forests.

WLB Interprets Hiring-In Rate

SEATTLE, Jan. 11 (AP)—The regional war labor board today announced that, upon request, it had interpreted a previous award to mean that the hiring-in rate for men and women at the Western Paper Converting company, Salem, Ore., shall be increased by two and a half cents an hour, retroactive to June 1, 1943.

Sugar Beet Nematode Susceptible to DD

The sugar beet nematode has been shown for the first time to be satisfactorily vulnerable to a soil fumigant—emulsified DD. Tests were carried on by the Agricultural Research Administration, U. S. Department of Agriculture, in a sugar beet area of California where this highly resistant pest is well established.

The emulsified nematocide was mixed with water in a large spray-mixing tank and was applied to the soil plots which were surrounded by earthen dikes. As

You don't have to "Butter" DUMPLINGS

And they're so wonderfully light and tender made with Enriched Fisher's Blend Flour!

It's amazing what a batch of Huffy Fisher's Blend Flour dumplings can do for what otherwise might be just plain stew. Add dumplings—and you have a savory fricassee or interesting ragout!

And besides their "glamorizing" effect—Fisher's Blend Flour dumplings supply the nourishment and appetite-appeal of biscuits or bread—without requiring hard-to-get butter! Also, they add the meat-stretching values of Enriched Fisher's Blend Flour—important protein, B-vitamins, and iron.

So forget food frustrations. Try Mary Mills' new PARSLIED ONION DUMPLINGS. They're different, delicious, and nutritious—made with Enriched Fisher's Blend Flour!

Milled from a blend of selected wheats, Fisher's Blend Flour is consistently dependable for dumplings, bread, cake, pastry, and every flour need! Be sure—with always dependable Fisher's Blend!

FISHER'S BLEND FLOUR

At your grocer's in sizes to suit your need.

Mary Mills Parslied Onion Dumplings Serves 6 to 8

1 1/2 cups FISHER'S BLEND FLOUR	Sift and measure Fisher's Blend Flour. Sift again with baking powder and salt.
1 1/2 teaspoons double-acting or 3 teaspoons single-acting baking powder	
1 teaspoon salt	Cut in shortening.
2 tablespoons shortening	
1 egg	Beat egg; add milk. Add parsley and cooked onion. Add all at once to dry ingredients, stirring just to mix.
1/2 cup milk	
1/4 cup minced parsley	
2 tablespoons minced onion, simmered until tender.	

Drop by tablespoons onto gently boiling stew, keeping dumplings on food particles not in liquid. Cover kettle tightly and steam dumplings 25 minutes without lifting lid to "peek." Serve at once.
