

# RESPONSE TO CLASS HERE IS REPORTED GOOD

An excellent response to the Spanish America course offered by the Oregon state system of higher education, was reported last night by Superintendent of Schools L. Gralapp. Fifty-five interested persons enrolled for the first lecture and this is almost a record for the course. There is room for very few more, it was reported.

The class has voted to meet at 7:30 p. m. in KUHS, room 300, for the remainder of the course, Dr. Warren D. Smith, Ph. D.,

head of the department of geography and geology, University of Oregon, conducted the first lecture tonight, Tuesday, at 7:15 p. m.

Second lecture is slated for March 12 and 13, "Current Political Trends and Policies," and the speaker will be Americo Usandivaras, M. A., a native of Lima, Peru, member of the staff of Missouri State Teachers college, but now working with the office of coordinator of Inter-American affairs, Washington D. C.

Third of the series will be held March 19 and 20 with Clifford Maser, Ph. D., head of the division of business and industry, professor of business administration and economics, Oregon State college, lecturing on "Economic Geography and Trade Relations."

Last of the series will be given March 26 and 27, when "Latin American Art" will be the topic on which W. S. Baldinger will lecture. Baldinger, Ph. D., is associate professor of art, University of Oregon.

This course carries two term hours of college credit for each student successfully completing the work, and taking the examination. The credit feature, however, is entirely optional with the student and those wishing may enroll for study only, it was announced.
