Mortgage Burning Affair Held at Moose Lodge Here

Forty-six new members were initiated into the Loyal Order of Moose at the mortgage burning ceremony held at the Moose temple Sunday afternoon.

Four years of lodge activity and achievement of the order were marked by a two-day celebration the highlight of which was the burning of the mortgage on the hall.

Celebrating commenced Saturday night with a semi-formal dance held in the Moose temple with A. A. Wilkinson's orchestra. Prizes were awarded for modern and old-fashioned waltzes.

Gala entertainment continued Sunday morning with a breakfast attended by 300 members. Initiation of new members was followed by the solemn ceremony of burning the four-year-old mortgage, honoring the achievement of a few staunch and determined members, who excavated the basement for the new hall themselves, and increased membership to 537, besides paying off the mortgage.

A program of entertainment at the Klamath armory with a buffet supper for members and their families preceded one-half hour of additional entertainment over KFJJ.

Supreme lodge visitors present were William E. Heinke, 18, deputy supreme governor for the state from Eugene, and N. R. Smith, regional director from Seattle.

Supreme Court to Consider Freight Rate Equalization

WASHINGTON, March 26 (AP)—The supreme court today agreed to consider a complaint by the state of Georgia which seeks to force equalization of freight rates between the south and other parts of the country.

Justice Douglas delivered a 5-4 opinion explaining the court's decision. Chief Justice Stone wrote a dissent in which Justices Roberts, Frankfurter and Jackson concurred.

Governor Ellis Arnall of Georgia, in urging the court to consider the complaint, asserted that 20 major railroads had "restored to conspiracy and coercion" to prevent lower freight rates. He said they were operating an "illegal combination" against his state resulting in northern manufacturers, sellers and other shippers gaining an advantage over Georgia business concerns.

Railroad attorneys denied the assertions. They said the lines were required by law to "fix joint rates and file them with the interstate commerce commis-

sion"; recalled that Georgia already has a similar case pending before the ICC; and contended that to permit such rate cases would destroy the entire principle of ICC regulation of the industry.

Attorney General Biddle recommended that the court hear the complaint, on the ground that the anti-trust laws support the relief asked by Georgia. The railroads replied that the interstate commerce act gave the ICC "clear and explicit" authority to make orders concerning the types of agreement or conspiracy complained of by Georgia.

**1944
NET PROFIT
\$277.18**

1 Figures can be deceiving. In the financial news of this month, Union Oil's 1944 net profits were listed at \$8,932,994. Now \$8,932,994 is a lot of money. But what the figures fail to reveal is that this money was divided among a lot of people.

2 For Union Oil Company is owned not by one man, or two, but by 32,227 individual Americans. Divided among that many owners, the net profits averaged just \$277.18 per stockholder. Even this sum wasn't all paid out in dividends. \$4,266,724 of the net profits were plowed back into the business.

3 So dividends paid out averaged just \$144.79 per stockholder. In contrast to this, wages and salaries averaged \$3298.77 per Union Oil employee for the year. Even government received more from the company's operation than the stockholders. \$4,666,270 were paid out in dividends, \$6,127,200 in taxes.

4 This is not pointed out as a complaint, but rather to show you that while Union Oil Company today consists of about 169 million dollars' worth of buildings, oil wells, refineries, ships, etc., it is owned by ordinary Americans like you and your neighbor next door.

5 These owners live in all parts of the country—516 in Oregon, 801 in Washington, 706 in Illinois, etc. 341 are in the military services. 2913 are Union Oil employees. The average stockholder owns 145 shares. Some hold fewer, some more; but the largest owns less than 1% of the total shares outstanding.

6 So it is not the investments of a few millionaires, but the combined savings of thousands of average citizens, that make corporations like Union Oil Company possible. And without some such method of financing industry, American mass production, with free competition, could never have been achieved.
