

LARGEST FUEL OIL PLANT IN COUNTY HERE

Western Oil and Burner company has started construction of a fuel oil plant at S. 6th and Adams, just over the Viaduct, which company officials say will be the largest fuel oil plant in the county.

Features of the plant will include an office building, two large storage tanks, service shop and garage.

The office building will include a sales and display room as well as company offices, fronting on So. 6th. Lying farther back along Adams street will be the tanks, with a capacity of 250,000 gallons, loading racks, garage, warehouse and other service facilities.

The facilities will be patterned after the most modern fuel oil plants up and down the coast, company officials stated. A pipe line will be installed across Adams street, connecting the plant with an O. C. and E. spur track.

Western Oil and Burner company has offices in Sacramento, Oroville, Marysville, Medford, Ashland and Klamath Falls. Vice president of the firm, is here in connection with the construction program. Henry Allis is local manager and the firm is now operating here from headquarters on S. 6th and Washburn way.

Approximately \$25,000 is being put into the plant here.

NO. 1 WESTERN BAND TO PLAY AT ARMORY

Bob Wills and his Texas Playboys, appearing at the Armory Wednesday night, were recently proclaimed the number-one Western band by the magazine "Orchestra World," following a nationwide popular vote. When at the Mission Beach in San Diego, the auditorium in Oakland, Jantzen Beach in Portland, or the finest dance spots in the midwest, Bob continues to break all attendance records, according to Baldy Evans, local band leader.

Under contract to Columbia pictures, Bob Wills and his Texas Playboys keep the camera grinding. "San Antonio Rose," the song that rode the range with Bob to success, has sold over 3,500,000 recordings. He has been starred in a number of motion pictures including "Take Me Back to Oklahoma" and "Go West Young Lady."

Tommy Duncan is featured as vocalist.

Worden Landing Strip Completed

The north-south landing strip is now completed at the Worden flying field, on the Weed highway, and is ready for use. Planes have been using the east-west landing strip.

The new runway is 200 feet wide and a little over 1000 feet long. The strip was too low and unusable in wet weather. It has now been elevated so that water will drain off and can be used in any weather.

UMATILLA DAM PLANNED
PORTLAND, Aug. 7 (AP)—Construction of Umatilla dam is foremost on the U. S. engineer corps' plans for post-war work in the Columbia, Snake and Willamette valleys, Maj. Gen. Thomas M. Robins said today. The deputy chief engineer said the dam will require about 3000 men working three to four years to complete.

Oregon TB Workers To Hold Institute

PORTLAND, Aug. 7 (AP)—The third annual institute sponsored by the Oregon Tuberculosis association for private and public health workers and county association aides will be held at Pacific university, Forest Grove, August 13 to 17.

Executive Secretary Saidie Orr Dunbar said James G. Stone, national program development director, would instruct. Dr. James T. Spores, University Tuberculosis hospital; Dr. Edward T. Blomquist, state board of health control director, and Harold A. Bishop, state supervisor of physical fitness, will participate.

YANKS 'GO TO BAT' FOR JAP VFW REJECTION

SPOKANE, Aug. 7 (AP)—A wounded Japanese-American army veteran, PFC Richard H. Naito, whose regiment protested his rejection by a Spokane Veterans of Foreign Wars post and applied to Interior Secretary Ickes and war department officials in his behalf, said yesterday he was "amazed and gratified that my old outfit has gone to bat for me."

The action of the 442nd regiment, stationed at Livorno, in which Ickes and the war department were asked to use their good offices "in the fight against this type of prejudicial action," was revealed to Naito by Col. V. R. Miller, commander of his old outfit in Italy. Col. Miller also sent a letter to Dean Helbig, commander of Post 51, asking him to "correct this grave injustice to an individual and to a great American tradition."

Helbig said his organization was trying to start a Japanese-American VFW post in Spokane and added "we believe this is the best solution to the problem." He said that while Naito had been invited to join other posts over the country, any attempt to transfer such membership to the Spokane post would be passed upon by the same minority who voted against his original application.

Naito said he did not believe a separate VFW post would be "very much of a reward for overseas Japanese-American veterans."

TULELAKE POLICE HOLD MEXICANS

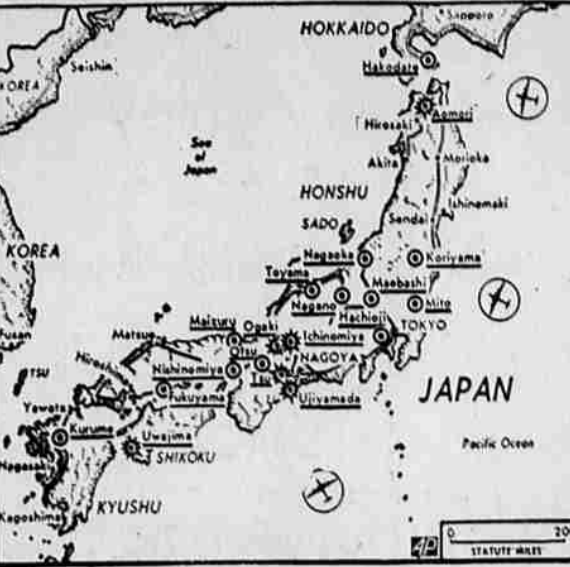

TULELAKE—Two Mexican nationals employed by the Southern Pacific are being held in the city jail on charges of attempted rape. The men were picked up at 1 a. m. Monday, and are being held on an open charge. Names of the men will not be released until an interpreter can be obtained.

Della Moore, 28, Merrill, charged with drunken and disorderly conduct is being held for investigation and Lillian Fansler, 40, Klamath Falls, is being held on an open charge after her arrest Sunday night.

David Bishop, 28, Klamath Falls, paid Police Judge Irving Capek \$15 after being charged with being drunk on city streets.

Flat paint is made in much the same way as the high class glossy enamels, except that it contains less varnish and more turpentine than ordinary enamel.

More Japanese Targets Listed in Advance

Bullseye symbols locate cities that have been listed as future B-29 targets, including eight new ones added to a list previously announced by the 20th air force. Bomb burst symbols locate six cities on the original list of advance targets that have already been hit by the Superforts. (AP wirephoto map).

Atomic Bomb And Sun Draw Power From Same Source

By HOWARD W. BLAKESLEE, Associated Press Science Editor
NEW YORK, Aug. 6 (AP)—President Truman's statement that the atomic bomb is made of the force from which the sun draws its power explains the principle of this new explosive.

The sun's power is the sun's heat. For years scientists have known that this heat could not come from ordinary fires like any known on the earth's face. The sun wasn't big enough to have lasted the billions of years during which there is plenty of evidence it has been burning at the present rate.

In ordinary fire, molecules of wood, coal or whatever else is blazing, separate. As they come apart, the energy which held them together is released in the form of heat, light and other rays, like X-rays. Even a hot fire gives off a bit of X-rays.

The sun burns not by separation of molecules but by two much more intensely hot methods. One is the atoms that form molecules separating from each other. This kind of separation releases incredibly greater amounts of heat and energy than molecule separations.

But an even greater source of sun power is the fact that the atoms themselves come apart to some extent. These atoms are made of electrons, protons and other electrical and non-electrical particles. Electrons and other particles fly off the atoms. This kind of separation releases even greater energies (including heat and all other sorts of rays) than the separation of atoms from each other.

Not all these inter-atomic forces are yet even known. Some are so powerful that they have only been guessed at. The popular phrase, smashing the atom, describes this sort of atomic disintegration where the atom itself flies apart.

For many years, scientists have been able to disintegrate atoms in laboratories. There were no explosions, because billions of atoms would have to go off at one time, even to equal a firecracker. The reason is that atoms are so exceedingly tiny.

It has been clear to scientists for nearly a half century that if they could get enough atoms in a piece of solid matter, or even gas, the size of a pea, to break up, all at once, the explosion would be terrible.

President Truman's announcement gives no clue to the method of producing the atomic bomb. The steps which were sen-

B-29 CREWS IN TINIAN, GUAM FINISH TOUR

By The Associated Press
Two groups of crew members from Oregon, based at Tinian and at Guam, have finished their tours of operational duty and are due to return to the United States, the war department announced Tuesday.

Those at Tinian are veterans of the 58th bombardment wing. Return to the United States will mean completion of a round-the-world tour started in 1944 when they left for India. All were members of the first B-29 unit activated in April, 1943, at Tucson, Ariz., and later trained at Great Bend, Kans. They pioneered B-29 operations from India and China before the wing was transferred to Tinian in April.

This group, which has completed 35 missions, includes Master Sgt. Bart Kirk, flight engineer, Eugene, and Capt. Robert B. Stevens, pilot, Portland.

The Guam group, which has finished its tour of operational duty and has become eligible for rotation to the United States, includes: St. Sgt. Robert McCarthy, tail gunner, Coquille; 1st Lt. Robert L. Koenig, pilot, Woodburn; 1st Lt. Donald L. Endicott, precision instrument specialist, Portland; 1st Lt. Lloyd E. Roach, airplane commander, Pendleton.

Mex And POW Labor Harvest Oregon Crops

PORTLAND, Ore., Aug. 7 (AP)—As the northwest harvest season nears its peak by the middle of August, 15,677 German prisoners of war and Mexican nationals will be in Oregon, Washington and Idaho fields, the department of agriculture reported here today.

The men are working in all phases of the harvests. The department's labor office broke the figures down by states as follows: Oregon, 1250 prisoners of war, 803 Mexicans; Washington, 300 prisoners, 5508 Mexicans; Idaho, 1260 prisoners, 3556 Mexicans.

opened for atomic power. The energy released by an atom breaking in two was thousands of times greater than the energy when just a few pieces were chipped off.

This new situation started the United States and Britain on a hunt for atomic power and atomic bombs.

Up to that time no atom had ever been really smashed.

When uranium atoms split in two, as the German woman predicted, a whole new world

Plywood Executive Takes Seattle Job

W. E. Marander, general superintendent of the Kalpine Plywood company and with the company since its start here in October, 1938, will leave for Seattle next week where he has accepted an executive position as assistant manager of the Jules Engineering company, exclusive distributors of the General Motors marine diesel engines.

Marander came to the local plywood plant from the US Plywood company in Seattle. His place will be taken by Elsworth Kline who worked for the firm in 1938 and 1939. He has since been with the Cascades Plywood company at Lebanon, Ore.

ONTARIO BLAST ROCKS TWIN CITIES

PORT ARTHUR, Ont., Aug. 7 (AP)—At least 13 persons were killed today by an explosion which wrecked storage elevator No. 5 of the Saskatchewan Wheat Pool, Ltd., one of the largest at the head of the Great Lakes.

The blast rocked the twin cities of Port Arthur and Fort William shortly after 10 a. m.

At least eight men were killed and several persons injured when a huge explosion wrecked the Saskatchewan pool elevator No. 5, one of the largest at the head of the Great Lakes today. The blast rocked the twin cities of Port Arthur and Fort William shortly after 10 a. m.

All four walls of the elevator were blown out. The bodies that were found were 200 feet from the building.

The elevator is located near the Port Arthur shipbuilding yards about three miles from the center of the city.

All available ambulances and emergency medical squads were sent to the scene.

BANKS REPORT LAND BUYING HERE ACTIVE

Much activity in land buying has been seen here recently, banks and credit associations report. Farmers are increasing their acreage and business men are investing in farms and ranches as a sideline to their regular livelihood.

George C. Manning has purchased the Zimm Baldwin ranch of 1360 acres at Lakeview. He is moving his family to Lakeview and expects to take possession of the ranch December 1.

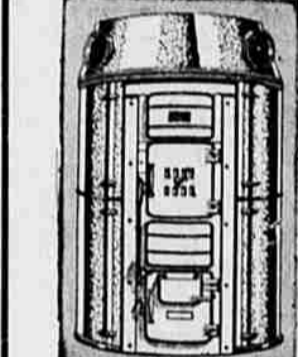

C. E. Evers is moving to the Willamette valley on account of his health, and his wife, Dorothy, has resigned her position as secretary of the Bonanza Irrigation district which she has held for a number of years. Lloyd E. Hassett, of Merrill, has purchased the Evers farm of 260 acres at Bonanza, and will take immediate possession. His purchase includes all livestock, equipment and crops.

PROTEST OPA RULE
PORTLAND, Aug. 7 (AP)—Suits filed in federal court by three Astoria, Ore., firms protest an OPA suspension rule. The Elite cafe, the Economy market and the Mat & Foods Sales company, all Astoria, were given 30 to 60 day orders halting sales of rationed foods.
