USO Pages An Apple Peeler

Anybody here one of those gadgets you hitch onto a table and peel apples?

There might be one in an attic somewhere and, if so, the USO could use it to a much better advantage. Seems the boys enjoy apple pie and peeling apples takes up a lot of time. The pies are served without charge at the snack bar.

An apple peeler would be highly acceptable at the USO. Just call, and they'll come and get it.

POLES RULE PENDULUM
Your pendulum clock that works so perfectly in the United States would have to be regulated if you took it to Central America. The nearer the equator, the slower the pendulum swings, the pull of gravity being stronger at the earth's poles.
