Get this New Motor Oil that resists Oxidation

A development of wartime research that's good news for cars of all ages

PREVENTING oxidation of motor oil became a major military objective of U. S. scientists early in the war because sludge is not only useless as a lubricant, but dangerous. It goes up friction surfaces... keeps even good oil from getting in where it's needed... leads to mechanical breakdown.

Research discovered a way to retard oxidation and military vehicles got a new lease on life. Now this discovery is available to you in new Golden Shell motor oil with oxidation inhibitor. The inhibitor, added during manufacture, keeps your Golden Shell free-flowing and efficient.

Whether your car is a highway veteran, or practically new, it deserves the best oil

Time for Fall oil change Now... Get New

you can find. And this new Golden Shell is the best Golden Shell ever sold. It's ready now—wherever you see a Shell pump. Shell Oil Company, Incorporated.

Like an oxidized egg... oxidized oil is no good
A spoiled egg — rusted metal — brittle rubber — and sludgy motor oil — all result from a single destructive chemical reaction called oxidation.
