Today's Roundup

By MALCOLM EPLEY
Yesterday we picked up the telephone, dialed 5121, the Marine Barracks, and asked for Dr. Lowell T. Coggeshall.

ME—Hello, there. Have you won any honors recently?
ME—Well, there's some mention in my ice box.

Same Symptoms

The same symptoms are evident in the position of John Lewis. In coal first he got his wage increases on price grounds then developed something new called portal-to-portal to claim additional increases which could not be justified on price grounds and now is fomenting for foremen in whom he was never before interested.

Thus labor has dropped the appeal to the public for justice—the popular appeal which made the unions what they are today. It no longer takes the public into its confidence by announcing what it wants in many instances. In other cases, it assumes an unequivocal public-banned policy (New York elevator strike).

A patchwork handling of this condition can only lead to greater success for the unions along their present line. There must always necessarily be more and more strikes; more and more wage increases for any reasons; higher and higher prices. The situation thus will never get settled. On this current line it can never be stabilized.

Mr. Truman no doubt thinks he is playing as good politics as Mr. Roosevelt did with the same methods, but I do not think so. Mr. Roosevelt could get away with it economically because the situation was only starting then.

Now it has reached a zenith which means the unions have more control over economic policy of the nation than government. They can force the country into inflation against Mr. Truman's own policy. To deliver his controls to the pressures of union political action can have but one result—defeat of his economic policies and therefore of himself. If the unions continue without responsibility to the nation but only to their own causes they must inevitably force inflation to its upper limits and beyond into economic collapse and finally into socialism of either the Russian, German or possibly, but not probably, of the proposed American type.

Inflation means bankruptcy and the world knows no answer to that except arbitrary socialism—a dictatorship.

Such events would hardly bring Mr. Truman any political success or the unions in the long run, as the army would no doubt operate our dictatorship.

JAPS MISSED BOAT
But the fact that the Japanese missed the boat does not mean that the situation is any different. There are from 150 to 200 million people in the area. They have become an active part of a tremendous movement, stretching from Lybia to the Southwest Pacific, by which Moslem, Hindu and Pacific peoples alike are determined to shake off western domination.
