Wanted:
Men who'd
like to work
with trains

If you'd like to help run trains . . . to work with the conductor and engineer . . . if you'd like to go places and do a job which is really important, you'll want to look into this job of Brake-man with Southern Pacific. We train you for it in a few days (and you're paid while training). The pay, by any standard, is very good. It's an interesting job . . . with men you'll like. And with a company with plenty of work ahead supplying men still overseas and then bringing them back home. If you're steady, reliable . . . a man who looks ahead and who wants a real connection with a big, progressive outfit, this should be your job. Fine pension plan. R.R. pass privileges. Medical services. Many extras. Many other skilled jobs open.

400 MEXICANS EMPLOYED IN SPUD HARVEST

At the present time there are 400 Mexican nationals in Klamath county working under contract with the Klamath Potato Growers association. Contracts terminate October 25 and although most of the harvesting is over, several growers still busy gathering their crops asked an extension until November 1, when they expect all harvest work to be completed.

Request for an extension was denied due to the fact that return transportation to Mexico has already been arranged for October 27, and could not be cancelled.

Growers are asked not to pick up Mexican laborers from the camp Friday morning as they have been doing, the county agent's office stated. Growers housing laborers at their ranches are requested to bring the Mexicans to the Merrill camp Friday morning.

The Mexicans must be processed, pick up their checks, sign termination papers, pack their belongings and receive transportation instructions. It is imperative that they be on hand for this procedure Friday. R. C. McCambridge, assistant county agent urged.

Historical Anecdotes Recorded at Meeting

Historical anecdotes, each relating to some pioneer event in this immediate vicinity, were recounted last night at the meeting of the Klamath Historical society.

Some fascinating yarns of old pioneer experiences were spun, taking up the major portion of the evening.

Officers for the coming year will be elected at the next meeting of the society which will be held in November. Mrs. Irene Foster and Mrs. Buena Stone were appointed to the nominating committee.

FIRST POSTWAR CAR SHOWING SET HERE

The first post-war car showing will occur here Friday and Saturday at the Balsiger Motor company, which has a new Ford to be put on display on those days.

Elmer Balsiger, head of the firm, and Vernon Moore, sales manager, who recently inspected the new car at the Richmond Ford plant, said the public is invited to view the post-war machine at any time on Friday or Saturday.

Improving—Ralph E. Benoist, foreman for Ewauna Box company, whose foot was shattered in a hunting accident Sunday, is improving at Hillside hospital.

In Medford—State Police Officer Dalford J. Reed is in Medford this week taking a radio examination.

THE RIGHT TRACTOR FOR THE PARTICULAR JOB

THE proverbial Jack-of-all-trades was master of none. The modern world of science and technology passed him by.

The same principle applies to farm tractors. The tractor that does a wide variety of jobs unsatisfactorily can't possibly produce the greatest results at the least cost in any job.

But that's what the farmer—particularly the small operator—has got to do to meet postwar competition: he's got to produce the most food possible with the least effort and, consequently, at the lowest cost.

The farmer with 10 acres in truck crops needs one kind of tractor. The farmer with 100 acres in wheat alone needs another kind—or, as is usually the case, two or more different tractors. The tractor which does a good job on the Great Plains may be useless in the

rice territory. And so it goes. Conditions of climate, the lay of the land, and the character of soils in the different parts of this vast country, together with wide variations in the nature of crops and the size of operations, combine to produce wide differences in the requirements for tractors. Harvester's policy is to meet all these requirements.

That is why Harvester's postwar line includes a great variety of Farmalls and other specialized tractors and attachments rather than a single tractor with a single system of tools. Every tractor in the line was developed after scientific research and testing under actual operating conditions showed the specifications needed for efficiency and economy.

Every Harvester-built tractor is the right machine for its particular job.
