YMCA HEAD URGES RECREATIONAL PLAN

TULELAKE — The appalling increase in juvenile delinquency in recent years in both urban and rural areas and the insistent need for a planned recreational program for young people as one means of combating the problem was the theme of a talk given before Rotary members at luncheon Wednesday by Carl Metzger, newly appointed secretary of the YMCA for this area. Metzger was accompanied to Tulelake by Rudy Abrecht, Marysville, area supervisor. The speaker was introduced by Sam Anderson of the Rotary club. Metzger stated that the number of delinquent juveniles in California has increased from 50,000 in 1943 to 80,000 this year and of this number only about 15 per cent are salvaged for dependable adulthood.

Floyd A. Boyd, Eugene Kile, principal of the Tulelake high school and Rev. Hugh Bronson will serve as a committee to investigate possibilities for establishing a one night a week recreational program for boys and girls of high school age in Tulelake. Rotary club members agreed that such a program is a community need.

Your car needs this NEW WAR BORN MOTOR OIL

From wartime research comes a new Golden Shell with oxidation inhibitor

If you could see the inside of your engine, you'd know why it's important for a motor oil to resist oxidation. You'd see hard-working, close-fitting moving surfaces with clearances considerably less than a hair's breadth. Yet between those almost-touching surfaces you'd discover a thin, protective film of oil. Or perhaps you wouldn't. Perhaps you'd see, instead, a thick, gummy substance on the oil screen. That would be sludge... the result of oxidation. Sludge that prevents sufficient oil from getting into places it's needed. Sludge that is the first step toward lubrication failure and a big repair bill. To retard sludge formation in new Golden Shell Motor Oil, a war-born ingredient is added during

When the putty around your window panes gets brittle and chips off, it has oxidized... succumbed to the same destructive force which causes iron to rust, left-over paint to harden, rubber to crack. Your motor oil, too, is subject to oxidation unless it's protected. That's why new Golden Shell motor oil has an oxidation inhibitor made right into it.
