

Geologist In Full Favor Of Crater Check

Dr. Howel Williams of the department of geology of the University of California and an authority on Crater Lake, has expressed strong approval of the plans of the U. S. geological survey to install a seismograph in Crater Lake national park in order to determine whether or not any earthquake shocks or ground tremors may indicate a return of volcanic activity. He recommends that this seismograph be established on the rim, if possible, or at least as close to it as can be done, for the closer the instrument is placed to the source of these tremors the more accurate and reliable the record will be.

He also suggests that aerial views of the lake be obtained whenever possible by anyone flying over it in a plane. The national park service is contacting Klamath Falls and Medford to secure cooperation in making reports on Crater Lake by anyone who may have an opportunity to view it during the winter months.

F. W. Cater, who has charge of the proposed seismograph installation, is a very able geologist and has had a lot of experience in snow country.

Authority for the use of Crater Lake lodge has been granted by the Crater Lake National Park company. The snow-cat tractor designed for traveling over snow with a payload has not yet been delivered, construction having been delayed by strikes. If plans to establish the seismograph on the rim of the lake are carried forward as planned, it is expected that the first snow-cat trips to the rim may be organized in about four to six weeks.

COLLEGIATE CONVENTION
EUGENE, Dec. 10 (P)—The Oregon federation of collegiate leaders will hold its annual convention at the University of Oregon campus January 11-12. President Warren Michael, La Grande, has announced.

Just Arrived!
AT WARDS

"RIVERSIDES didn't come on my car
I CHOSE THEM"

"... and I see a lot of my patients

are switching to Wards Tires, too!"

"Yes, they're Riversides. You see, I've owned a lot of cars in my day, and I've sure learned one thing about tires—Riversides give me less trouble, more miles! And I see plenty of people around this town figure tires exactly as I do."

This doctor is typical of the millions of car-owners who have switched to Riversides because Riversides mean more for your money; more mileage, more safety. (Today, Riversides are built 12% stronger than Wards prewar tires!)

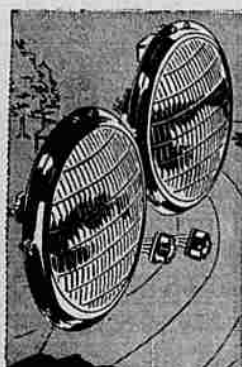

MORE MILES-OF-SAFETY ON RIVERSIDES..
