### Two Cases Of Polio Reported

Two cases of infantile paralysis were reported to the Klamath county health department for 1945, both late in the year. The first case was a six-year-old boy whose home is in Klamath Falls. Dr. Peter Rozendal, county health officer, stated that the case was an old one before it was reported to him and that the boy went through the acute stage in November. He suffered a weakening of the abdominal muscles and of one leg. Dr. Rozendal said. The boy was taken to the Shrine hospital in Portland on January 2. The other case was a four-year-old girl, living in Stewart-Lennox addition, who also went through the critical stage in November. Dr. Rozendal said. The little girl had a considerable weakening in one leg and arm he said. She was taken to the Doernbecher hospital in Portland recently. The flu outbreak continued throughout the state with a total of 307 cases reported to the state board of health for the week ending December 29. One hundred of the flu cases were in Josephine county and 68 in Clackamas. Klamath county was near the bottom of the list with eight cases reported.

### Kaiser Auto Six Cylinders

DETROIT, Jan. 10 (AP)—Kaiser-Frazier corporation announced today that its projected low-priced Kaiser automobile will be a full-sized light-weight six-passenger vehicle, with a 117-inch wheelbase, 85-horsepower, six-cylinder engine and front wheel drive. The car, scheduled for production at the former bomber plant at Willow Run some time in May, will carry its engine forward of the front driving axle, and its body and chassis will form a single unit. An innovation will be independent "torsionette suspension" on all four wheels. The springing action is achieved through the twisting motion of heat-treated steel bars. Hydraulic shock absorbers are included in the assembly. Other features include push-button inside door controls, wide-base wheel rims and four wheel brakes. Prices were not announced but it has been reported the vehicle will sell for around \$1000.
