

DICK B. MILLER CO. ANNOUNCES THE OPENING OF A NEW TRUCK DEPARTMENT

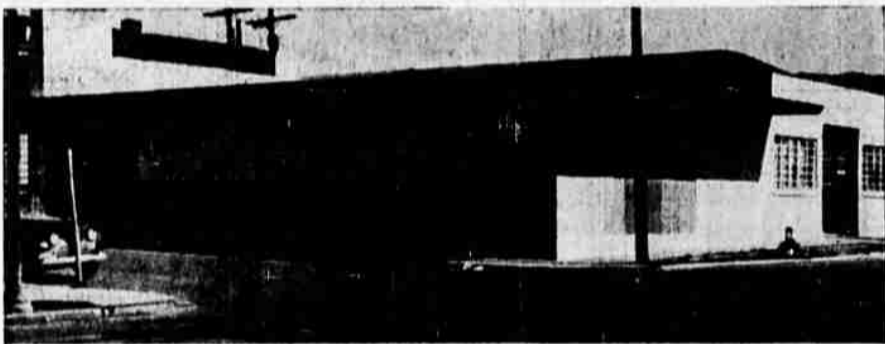

Here in 1937

Here ...

And Here in 1946!

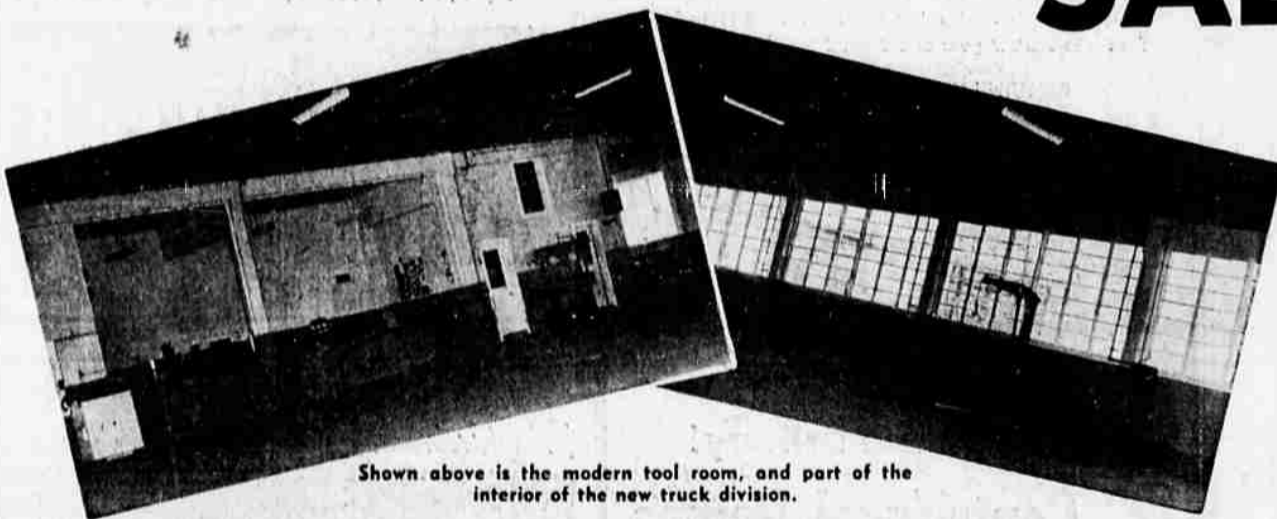

We've grown with Klamath! We know that the patronage of the people of this area has made that growth possible, and we sincerely appreciate that patronage and thank YOU for it. We will continue to bring you the very best possible in automotive and truck service.

It is with a great deal of pride that we announce the opening of our new truck department. We waited a long time before accepting the International franchise, since we wanted a location adjacent to the business district that would be convenient for our customers, and yet have complete truck facilities. This new location at 11th and Klamath with its 8900 Square feet of floor space meets both requirements. We will continue to handle Oldsmobile and Cadillac sales and service at our 7th and Klamath location.

Our policy has always been: Personal attention by members of the firm. We want you to be satisfied. We don't forget you as soon as you have bought a car. We have always tried to give you the best in service, and our finance rates have always been lower than established rates. Now, our two locations will enable us to serve you better than before!

HERE'S WHAT INTERNATIONAL SAYS:

International Harvester Company, Motor Truck Division, since the war has been working toward a much stronger dealer organization throughout the United States. The appointment of the Dick B. Miller Company as their representative in Klamath County brings this fact down to one of local nature.

The Harvester Company has been a manufacturer of motor trucks since 1907, in which year they produced but one model. Today their line covers every type of truck from 1/2 to 45 tons.

The Klamath Falls area for many years has been a very lucrative outlet for their products. However, they realize that no product of any make is satisfactory to an owner without the proper parts and service facilities to keep the truck rolling.

The Dick B. Miller Company has followed company requirements and constructed a modern motor truck sales and service station. It will be the most completely equipped motor truck repair base between Portland and San Francisco. Truck repair jobs of all kinds can be handled.

The International Harvester Company is happy to have a part through its new dealer to help in the expansion and improvement of this very fine community.
