

Today's Roundup

At a meeting we attended the other night, someone remarked that Klamath people to great things when they get together and cooperate wholeheartedly.

EPLEY

Trial Goes With Vote

CITY councilmen at their last meeting appeared to be toying with the idea of a public vote on parking meters at the fall election.

It seems to us that a parking meter trial—without cost to the city treasury—is an essential part of a popular vote on this question.

Spare Those Lights

A CITIZEN has called our attention to a serious situation at the sidewalk underpass on Main street and the S.P. tracks. This underpass is equipped with adequate lighting fixtures, but it is usually dark because vandals repeatedly have destroyed the globes.

News Behind The News

WASHINGTON, June 1.—Yesterday I furnished some proof in the strike news and behind it that the unions have accumulated power in the last 14 years which has led them beyond normal considerations of simple common human justice and created in them a state of mind in which no rights can exist except what they want, and I promised today to pursue the theme to a conclusion and a solution.

Human beings simply cannot handle power. The weakness is common to all. Power corrupts as it accumulates in the best and worst hands. It weakens the normal sense of justice, all the common human senses of fairness, and eventually power destroys itself.

This can be seen anywhere in history, new or old. The latest best example was Hitler, in world politics. He certainly destroyed himself by taking in too much territory, by expanding his power until it became a final frenzy of attack upon the world.

Summer Class Opens At Fremont School

Summer school, for students from grades one to eight, inclusive, will open at Fremont school starting Monday morning, June 3, at 9 a. m. This is a tuition school, according to Arnold Gralapp, superintendent of schools. Tuition rate will be established Monday.

the suburban areas. This is the second year the school has been conducted. It is especially for children who have been transferred here or those coming in late. Mrs. Jean Dickerson will be in charge and there will probably be one additional teacher, Gralapp said.

The subways, street cars and trackless trolley coaches of America consume more than 7,019,000,000 kilowatt hours of electricity a year.

mon military principles or a normal sense of justice. The same thing happened to Napoleon, Caesar, and many great leaders.

Power Develops Resistance

IN our own time the late President Roosevelt built himself up so much power, he could not use it. Domestically, the congress stultified practically every step he wanted to take after its defeat of his supreme court bill.

By the same processes in which business bloated itself to self-destruction of its great power in the decade before Roosevelt, the unrestrained unions have come now to the point of asserting a right to tax the people (Lewis in coal), to spend as much of their untaxed accumulations of wealth as \$47,000,000 to defeat Truman and \$2,500,000 to defeat congress (Whitney threat), to completely deaden the life of the nation by stoppages of the essentials of life such as food, fuel, electricity, transportation, telephones (strikes since V-J Day), to rule congress, the president, the nation.

This cannot be, and it will not be. If Mr. Truman and congress cannot stop it, the excesses of the unions will soon now lead inevitably to their self-destruction in one way or another. An absolute immunity from any and common justice cannot long exist for any group of citizens. There cannot be immunity from crimes of racketeering, campaign contributions, etc., exemption from taxation, immunity from suit, injunction or responsibility for contracts for a minority of organized groups, one group or all groups.

Minority Immunity Untenable

THE supreme court cannot long continue to hand down decisions granting immunity from all law to a minority of the people. This destroys common justice, therefore all justice. The politicians will not forever live in fear and confusion of the powers they have given away to an organized group, because they will soon have no government or power. Indeed, Mr. Truman and the congress are trying already to get some back. The zenith of union influence has constantly been declining as their excesses grew in the past six months.

The stressing of a few Christian principles would not hurt. Let the unions realize their responsibility for public service, as business has been required to realize them by law. Stress the rights of an individual to his responsibilities to his fellow men, the rights of the other fellow, the rights of the nation to work and growth. There can be no right above common rights, no superior group right to destroy or capture the people or nation, or to make them suffer, starve or die, or any superior right to deny them the right to work and live in peace.

What Is Fair?

EVERYONE really knows what is fair when brought to his senses. It is an abnormal state of group mind with which we are dealing, a state grown feverish with power and exhorted to excesses. Some laws need changing in common fairness, by courts and congress. But these changes will not do the job unless someone gets this nation back to accepting principles of common justice.

If the unions spend all their millions and buy the election, they will soon lose the country by winning their annual demands for ever more increased pay and privileges costly to economics, forcing prices too high for the average person to buy and live. Then will come dictatorship, not because anyone wants it, but because it would be a necessity, to meet the will of the people to continue to live.

March Of Dimes Thief Sentenced

PORTLAND, June 1 (AP)—A three-year probationary term and a \$500 fine were meted Leonard J. Trythall, former Portland bank teller charged with embezzlement, in federal district court yesterday.

He was accused of taking money from the bank's March of Dimes collection.

SIDE GLANCES

"I'm sure you won't like her—she's the kind who tells you your faults right to your face!"

Frigid Jupiter Sparkles In Early Evening Skies

By J. HUGH PRUETT Astronomer, Extension Division, Oregon Higher Education System

Who can look into the darkening depths of the late twilight sky without feeling a sense of wonder regarding the brilliant object now so conspicuous high in the south. What is it? Where is it located in the great "out yonder" of sparkling ethers, sending that of the surrounding stars, real or only apparent?

STATIC

ABC got around to sending us another mat introducing members of their staff, so here it is. Mary Patton, a veteran of the radio game and a frequent star of the Fat Man program.

Klamath seems to be intent on keeping the griddle hot these days. First we cook up a good scrap about parking meters, which leads into all kinds of things, and now the annual summer blow-off for the natives, the rodeo, comes into the limelight for its share of community inspired bruises. Maybe it's something in the climate that causes it, I wouldn't know.

Had to go to Lakeview on a routine business trip and never saw the country in better shape, or had a more pleasant trip to our neighboring city. The recent rains have left water standing in every hollow, and turned the hills green again. Cattle have been moved back into the foothills, and you see them everywhere as you drive along. The horses, particularly those on the reservation, have shed their winter coats and make a pretty show standing knee deep in the grass. From Bly clear on to Drew's reservoir, the lupine is out, stretching clear up into the valley and flat till it looks like corn. Still, Lakerose is still the same; still friendly and eagerly anxious to help a visitor. They are all getting set for the big Hart mountain trip in July, and already there is a gleam in many an eye. Seems like everyone I talked to had just come in from a fishing trip—and most of them didn't do so well. Gordon Smith, ex-Klamathite, tells me he spent some two and a half hours digging himself and friends out of a bog they drove into in the middle of an argument (or did they say conversation?)

Speaking of fishing, it seems that the Herald and News and the Klamathite, along with George Stevenson, Barney Barnhisel, C. A. Henderson and Nelson Reed, went in search of the elusive fish for a few days, but didn't report much luck. The group tried all over Lake County and from here to Adel, without much result except that they had a swell time.

I see by the paper last night that slot machines are illegal in this state. What shock that must be to a number of people. Or is it?

BOYLE'S NOTEBOOK

By HAL BOYLE OSLO, June 1 (AP)—There is an old saying in Norway that "he who drinks alone gets a red nose."

If this were true few people here would sport a scarlet beak because the Norwegians are thorough believers in community drinking. Their custom of "skaaling," or mutual toasting, is deadly to the unwary newcomer but through generations the Norwegians have acquired a partial immunity.

In mixed company you never sip by yourself. You must ceremoniously lift your glass to your neighbor or friend across the table, say "Skaal," take a deep pull, lift your glass again in salute to your companion and then set it down.

The Norwegians don't go quite as far as the Russians, who insist that the entire glass must be drained at one gulp. You can take as much or little as you want. But the liquor is extremely potent. The chief alcoholic springboard at most parties is aquavit, a white or syrupy fluid which has the authority of a mule's heel and tastes like vodka flavored with kumquat.

Hostess Obligated To Drink The skaaling tradition has bred in Norway the world's hardest of hostesses. There is an unwritten rule that at all social gatherings of eight persons or fewer the hostess must skaal with each guest. In a land where womanhood is less buxom this custom might be disastrous, rather it is a cold world that shines for use only because sunlight is reflected from the clouds which continuously cover its surface. The temperature of the outer part of this visible covering is about 200 degrees Fahrenheit below zero.

Jupiter appears very bright because of its relative nearness to us and its size. It is now somewhat less than 500,000,000 miles distant. This planet's equatorial diameter is nearly 90,000 miles, yet this is exceedingly small compared with that of most of the real stars. Many of the insignificant little stars of the evening sky, if placed so near us as Jupiter, would far excel our sun in apparent diameter and brightness.

In order outward from the sun, the earth is planet number three and Jupiter is number five. The volume of this giant world is 1300 times that of our earth. It encircles the sun once in almost 12 years as compared with the Jovian day is only 10 hours long, the speed of rotation of the surface, especially near the equator, is excessive.

It is now known that the atmosphere surrounding Jupiter contains large quantities of ammonia and methane, and probably considerable free hydrogen. The clouds may be particles of frozen ammonia. We do not know the nature of the surface beneath the clouds. Some suggest it may be liquid. Wildt of Princeton has estimated that the planet could have a heavy metallic center 38,000 miles in diameter, surrounded by a layer of ice 17,000 miles thick. Around all this, 8000 miles of cloudy atmosphere may complete the globe.

Through even small telescopes Jupiter presents a fascinating picture. The shapes and shades of the darker cloud bands are always interesting. The four larger moons, in appearance like bright stars, are nightly changing in position. At times one (some times more) is not in sight due to darkening by eclipses or disappearances behind the planet. The times of these occurrences are accurately predicted in the Nautical Almanac.

Good field glasses will usually show some of the larger moons. Large telescopes are required for finer details and the revelation of the summer seven of Jupiter's 11 moons, but only good eyes are needed for the perception of this gorgeous yellow light in the southern evening sky.

Indian Pays Fine For Car Vandalism

Bernice Riddle, Klamath Indian of Chiloquin, pleaded guilty to disorderly conduct in justice court last night and paid a fine of \$22.20 plus \$25.65 for damages done to an automobile owned by Lloyd English, 1140 Klamath.

She was accused by English of breaking out the windows of his car early last Wednesday morning while it was parked in front of his address, and was arrested by city police.

City Briefs

Graduate—Beverly Dalmer, daughter of Mr. and Mrs. Ed Damer of 930 Owens, who was graduated from Fremont junior high school Thursday, May 23, received the award given each year by the Daughters of the American Revolution to the girl who is outstanding in home-making and citizenship. Her father and grandmother, Mrs. E. F. Dalmer, came from Prineville to attend the graduation ceremonies.

Returns—Dick Hibbs of Hibbs Clothing company, has returned from a buying trip which took him first to Seattle and later to New York. Mr. and Mrs. Hibbs are leaving today, Saturday, for Los Angeles to attend June market week in the south. Mrs. Harry Hibbs of Greeley, Colo., arrived Friday to stay with the Hibbs children at 1405 Eldorado, during her son and daughter-in-law's absence.

Out Of Navy—Lt. (jg) Dean Leslie Jones, 4878 Thompson street, was discharged from the U. S. naval reserve under the point system on May 27.

Visiting—Elve Faganello Keen and three children of Springfield, are visiting friends. Mr. and Mrs. Sam Hardy of Klamath Falls.

Returns From School—Eliodie Doveri, daughter of Mr. and Mrs. Angelo Doveri, 435 High, has returned from Seattle college, Seattle, Wash., arriving on the early Saturday train. Mr. and Mrs. Doveri, who have lived at 707 Washington, recently purchased the old Silas Oberchain house at 5th and Washington, moving last week.

Son Born—Mr. and Mrs. Dick Donnellon of Indianapolis, Ind., are parents of a seven pound eight ounce son born May 24. Mrs. Donnellon is the former Patricia Canton, daughter of Mr. and Mrs. W. H. Canton of this city. Mrs. Canton left May 7 to be with her daughter and family.

Portland Marriages Hit All-Time High

PORTLAND, June 1 (AP)—Cupid's arrow hit the bulls-eye for an all-time record here in May, with 335 marriage licenses issued compared with a previous high of 434 in February, the county clerk's office reported today.

Returning servicemen accounted for most of the rush, officials said, and many of the couples will live in other parts of the county. Only 284 licenses were issued in May, 1945.

Doveri Gets Bridge Job

Angelo Doveri, Klamath Falls contractor, was awarded a contract for the construction of two concrete bridges on the proposed new stretch of The Dalles-California highway near Chiloquin, the state highway commission meeting in Salem announced today.

Doveri's bid of \$49,960.50, was the lowest of three bids submitted. L. C. Smitton, resident bridge engineer, Oregon state highway department, who arrived here late this morning from Salem, said one of the bridges would be across Spring creek about four miles north of Chiloquin and at that point a little state park will be laid out including walks for fishermen and pedestrians along the creek.

The second bridge is a highway overcrossing one mile west of Chiloquin and planned to carry traffic from Chiloquin west to the old highway. Work should start sometime this summer, depending on when materials are available.
