

# Workmen's Compensation No Bar To Disabled Vets

In response to numerous complaints from widespread sections of the country that some employers are failing to hire disabled veterans on the ground that it is either forbidden or heavily penalized by workmen's compensation insurance contracts, J. Dewey Dorsett, general manager of the Association of Casualty and Surety Executives, today issued a sweeping denial that there is any provision in insurance policies or rates which would bar such erroneous statements.

## LEGAL NOTICES

**ADVERTISEMENT—Sale of Timber.** Klamath Indian Reservation South Chiloquin Logging Unit. Sealed bids, duplicate, on forms provided therefor, marked outside, "Bid, South Chiloquin Logging Unit," addressed to the Superintendent, Klamath Indian Agency, Klamath Agency, Oregon, will be received until 2:00 o'clock P.M. Pacific Standard Time, on July 25, 1946, for the purchase of merchantable old growth timber, estimated to be about one million seven hundred ninety five thousand 785,000 feet B.M., more or less of Douglas Fir and three million six hundred thousand 3,600,000 feet B.M., more or less of White Fir, on a tract within the Klamath Indian Reservation, Oregon, described as the "South Chiloquin Logging Unit," embracing approximately 2120 acres of timbered tribal land and 800 acres of allotted land, located in Sections 22, 23, 33, and 36, T. 33 S., R. 7 E., Section 12, T. 33 S., R. 7 E., Sections 5, 6, 7, 8, 17, and 18, T. 36 S., R. 8 E., excepting Sections 1, 2, 6, 7, and parts of Sections 4, 5, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, and including Sections 21 and parts of Sections 29, 30, and 32, T. 36 S., R. 9 E., N.M. The unit includes approximately 16,200 acres of timbered tribal land and 500 acres of allotted land. Each bid must state the price per thousand feet B.M., Scribner Decimal C. Log Scale, that will be paid for the timber cut. No bid will be considered for less than \$4.35 per thousand feet B.M. for Douglas Fir and \$3.35 per thousand feet B.M. for White Fir. Under regulation of the Office of Price Administration entitled, "Maximum Price Regulation 400—Western Timber," maximum prices have been imposed effective August 31, 1945, which limit additions to the maximum applicable bid prices. These are on file in the office of the Superintendent, Klamath Agency, Oregon, and may be referred to upon request. The contract will specify that all designated timber shall be cut and removed from the unit prior to April 1, 1950. Two copies of the contract, regulations, blanks for submission of bids, and other information, apply to the Superintendent, Klamath Agency, Oregon. Dated this 20th day of June, 1946, at Chicago, Illinois. Paul L. Fickinger, Acting Commissioner of Indian Affairs. Jn. 28; Jy. 5-12-19—No. 422.

# Flashes Of Life

**A HOT TIP**  
JOPLIN, Mo., July 5 (AP)—When an armed bandit entered the Western Union office here, a 21-year-old teleprinter operator, Miss Barbara Adams, sent a call for help out over the wires on her machine.

It was picked up by the Kansas City Western Union office which relayed it to Kansas City police. The message was flashed back by radio to Joplin police who reached the holdup scene only minutes after the gunman had fled with an undetermined amount of money.

# Funeral Held For Copeland

FORT KLAMATH, July 5.—Funeral services for the late William V. Copeland, who passed away Tuesday morning, June 25, were held Friday afternoon at 2:30 at the Walker funeral parlor at Prineville. Following the services, interment was made in the Prineville cemetery.

Attending final rites were the following relatives, Mrs. Harry Engle of Fort Klamath, Mrs. Eva Nichols of Portland, Mrs. Nora Souther, sons Richard and Nick of Spokane, Wash., all being sisters of the deceased; and Alvin Copeland, brother, who came by plane from Ketchikan, Alaska. Another sister and brother, Mrs. Gayle Mason of Tucson, Arizona, and Charles Copeland of Canada, were unable to be present. In addition to these relatives, Copeland is survived by his wife, Mary, and a son, Eddie, both of Redmond.

Copeland was accidentally killed while working on his ranch near Redmond, when aerrick he was moving came in contact with a high-voltage power line. He was born at Fort Jones, Calif., July 21, 1886, and came here with parents and family at an early age, having lived here for many years before moving to Redmond. While in Fort Klamath, he was employed for a time with the Oregon state highway patrol and was well known in Klamath county.

# Funeral Held For Copeland

**INFORMATION**  
OMAHA, Neb., July 5 (AP)—Chief Deputy Sheriff Hugh Cutler related that a woman reported that a prowler had attempted to enter her house and probably would return. But she rejected Cutler's offer to help.

"What I want to know," the woman asked Cutler, "will the law bother me if I shoot and kill him?"  
"Not if he is breaking into your house," the deputy told her.

# Cepheid Variable Stars Used As Measuring Rods

By J. HUGH PRUETT  
Astronomer, Extension Division, Oregon Higher Education System

Do we sometimes wonder if our scientists are merely guessing when they tell us of the inconceivably great spaces that lie between our little world and even the nearest of the sky-objects? There are methods, definite and reasonable to all who study them carefully.

Late last century, Harvard University established a splendid observatory at Arequipa, in the highlands of Peru. Through the unusually clear air above that 8000 foot elevation, powerful cameras photographed the Magellanic Clouds, those two hazy, white spots (invisible from our part of the world) which stand out like detached portions of the Milky Way about 20 degrees from the south pole of the heavens.

A little later, the Harvard astronomers discovered that hundreds of the Magellanic star-images were variable in intensity from one photograph to the next. They went from maximum light through a minimum and back to maximum again in a few days. The variations were exceedingly regular, exactly like those of the Cepheid variables among many of the brighter stars long-known. But the most remarkable discovery was that the greater the apparent average brightness of a Magellanic star, the longer its period of variation.

Since the Magellanic variables were so exceedingly faint, it seemed reasonable to assume that these star-clouds were entirely outside our star-system. And since the distance was very great, all the stars could be considered to be at nearly the same relative distance from us, and differences in apparent brightness could be closely connected with the differences in actual brightness, a possibility which distances differ greatly.

The law of Cepheid variation had been discovered. All that remained was to measure the distance and apparent average brightness of some near-by Cepheid. This was done, and the formulas connecting period, apparent brightness, actual brightness and distance completed.

This Magellanic light requires almost 100,000 years to reach us. The Cepheid method is now used to determine distances of "island universes" many times more remote—seemingly almost on the shores of eternity.

# Merrill Moose Hold Practice

MERRILL.—The Loyal Order of Moose of Merrill held its regular meeting, July 2, with all officers present.

The ritualistic team held a practice and is preparing to enter into competition with ritualistic teams from lodges all over the state at the state conference to be held at Tillamook in August.

The next regular meeting will be held Thursday, July 18, because official visitors from Corvallis find it inconvenient to be here for the regular meeting.

The Loyal Order of Moose voted to enter a float in the Klamath Basin potato festival parent brightness, actual brightness and distance completed.

This Magellanic light requires almost 100,000 years to reach us. The Cepheid method is now used to determine distances of "island universes" many times more remote—seemingly almost on the shores of eternity.

# Quake Alters Water Depths

VICTORIA, B. C., July 5 (CP)—Officials of the Canadian hydrographic department announced in Victoria last night that fresh soundings will have to be taken in waters off the coast of Vancouver island due to effects of the June 23 earthquake.

Game Commissioner F. Weir and A. A. Sherman of the dominion department of fisheries told of startling changes at Cowichan lake, near Duncan, B. C., where whole beaches have disappeared, leaving sheer drops to deep water. The general level of the lake is reported to have sunk 10 inches without affecting the flow of Cowichan river.

At Deep Bay, where a tidal wave caused the only fatality when a boat was swamped, the bottom sank from nine feet to 84 feet.

Where a beach once existed at the mouth of Cottonwood creek, soundings now reveal 100 feet of water. Former shallows at the mouth of Little Shaw creek now give soundings of 100 feet also.

Water depths will have to be changed on the majority of charts dealing with the Parksville-Cornox area, and fresh soundings will have to be taken by the Canadian hydrographic survey.

# Contract Awarded For Dam Building

WASHINGTON, July 5 (AP)—A \$2,771,887 contract for construction of a two-mile dam that will form the south end of a big reservoir in the Grand Coulee, ice age bed of the Columbia river, has been awarded by the reclamation bureau.

The contract went to Roy L. Blair and company and James weekly newspaper, has been sold by Ralph B. Bennett Jr., to George Lindsay and Ralph Hogan of Buhl, Ida. They formerly were with the Buhl Herald.

# Idaho Men Purchase Paper At The Dalles

THE DALLES, Ore., July 5 (AP)—The Dalles Optimist, a weekly newspaper, has been sold by Ralph B. Bennett Jr., to George Lindsay and Ralph Hogan of Buhl, Ida. They formerly were with the Buhl Herald.

Millions of man hours of work will be created directly or indirectly by the expansion; millions of dollars will be added to payrolls. This program, the largest in our company's history, is already under way and is going ahead steadily.

For it is our purpose to provide service for all who are now waiting just as rapidly as possible and to improve service in every way we can. We want to make the telephone more valuable and useful to everyone . . . to grow with the West and to help the West grow.

An ever-improving telephone service at the least cost consistent with good wages and working conditions for our employees and a reasonable return to the thousands of people who have invested in the business.
