

# July 25 Tentatively Set For Second Atomic Test

ABOARD USS MT. MCKINLEY, July 5 (AP)—Vice Adm. W. H. P. Blandy today set July 25 as the tentative date for the detonation of Bikini's second atomic bomb, this one "an attack against hulls." It will be exploded slightly under the surface of the lagoon.

A full-dress rehearsal was scheduled for July 19. The chief of task force one told newsmen he had scaled down his original estimates of a 100-foot tidal wave resulting from the subsurface blast. This would be enough to send green water over Bikini island.

Blandy expects some form of radioactive cloud to result from the spray blown up from the underwater explosion. Contamination of ships by the spray and by solid water tossed onto their decks are expected to be a factor in delaying their return for inspection.

The admiral in a reappraisal of the airborne drop termed it a "miss of appreciable dimensions" because of wind and other uncontrollable factors but asserted, however, that "nothing went wrong with this test to prevent it from being a complete success."

As greater refinements in calculations are made, he said, the airborne bomb will be shown to be stronger than first estimated and closer to the Nagasaki bomb in potency.

"It was not just a firecracker," Blandy declared.

The admiral said the test was a success because the target

fleet was arrayed to take care of the possibility of a miss. He cited ships heavily damaged as an example of how a good cross-section of a modern fleet can be affected—the Battleship Arkansas, the Heavy Cruiser Pensacola, the Light Cruiser Sakawa, a submarine and transports.

## Plane Service Normal Again

ST. PAUL, Minn., July 5 (AP)—Operations of Northwest Airlines, halted for more than 30 hours by a strike of mechanics, went back to normal today, following return to work of the men upon creation of an emergency fact-finding board to investigate the dispute.

The mechanics walked out early Wednesday when union demands for an 18 1/2 cents an hour wage increase and changes in clauses of their contract with the line were not met.

Joseph P. Ramsey of Washington, representative of the International Association of Machinists, an independent organization, said the agreement to return to work "is temporary in view of the president's order." Under the railway labor act, which governs airlines also, the board has 30 days in which to hold hearings and consider issues in the dispute.

The longer life is expected to result from the design that gives the battery a reserve of three times more water than the conventional type. The additional liquor capacity makes it necessary to refill the battery only about three times a year. It also lowers the average strength of the acid, Auto-Lite engineers assert, tending to give the battery longer life without reducing its electrical capacity.

## New Auto Batteries Now In Production

TOLEDO, Ohio, July 5 (AP)—The Auto-Lite Battery Corp. disclosed today that its recently announced longer life automobile battery now is in production in the company's six plants.

The longer life is expected to result from the design that gives the battery a reserve of three times more water than the conventional type. The additional liquor capacity makes it necessary to refill the battery only about three times a year. It also lowers the average strength of the acid, Auto-Lite engineers assert, tending to give the battery longer life without reducing its electrical capacity.

## Bareback Bronc Cuts Loose

Joe Bessler is shown here topping a rough one in the second section of the bareback bronc riding at yesterday's opening of the four-day rodeo. This ride is the one that got Joe second place, which he split with Bill Jones for the day money.

## Wire Tapping Stirs Solons

WASHINGTON, July 5 (AP)—Angry congressional criticism of "wire tapping" spurred prospects today of a full-scale inquiry into the practice of some government departments of recording telephone conversations with lawmakers and others.

Denunciations came from democratic as well as republican house leaders following the disclosure made at a senate war profits investigation earlier this week.

Speaker Sam Rayburn (D-Tex.) told newsmen of his great displeasure at such secret transcriptions, and Republican Leader Joe Martin (Mass.) termed them "a mean practice."

Meanwhile, an influential member of the special house committee set up to investigate "executive agencies which exceed their authority" said that group is considering a thorough investigation.

"There probably aren't many

congressmen who, at one time or another, haven't made legitimate requests of the government agencies in behalf of constituents. While innocent enough, these conversations can be made to look damaging when revived on a phonograph record later."

The lawmakers' wrath was directed primarily at the war department, which turned over to the senate war investigating committee the record of a conversation between Chairman May (D-Ky.) of the house military committee and an army ordnance officer in 1943.

The Phoenicians were a branch of the Semites, the same race to which the ancient Hebrews belonged.

## Wedding Bells To Feature County Red Cross Auction

There's a trilling, a minister and all the trimmings, but no bride and groom.

The latest event which will be featured at the Red Cross auction sale at the county fairgrounds July 14, is a wedding ceremony. The couple to be married has not yet been chosen.

A wedding ring, a new Silcox coffee maker, a \$10 merchandise order and a new post-war electrical appliance have been donated, and a minister has offered his services free of charge. Any minister in Klamath Falls may be chosen if the bridal pair desires, according to Frank Hurd who is in charge of the program along with Otto Smith, Red

## Better Trail Marking Urged By Bostonian

PORTLAND, July 5 (AP)—Bernard DeVoto, Boston author, urged today better markings for Oregon's historic trails. He declared himself particularly disappointed to see only an unlettered stone at the Clatsop site where Lewis and Clark wintered.

The nickname Bossy for a cow probably is derived from the Latin word for cow, or bos, also be brought at the time of entry to the fairgrounds.
