

## Portland Gets 109 New Firms

PORTLAND, Aug. 5 (AP)—The Portland area has obtained 109 new industries so far this year, the chamber of commerce re-

ported today, while other sources mentioned growing business activity in the state. Oregon's jobless declined from 58,000 in May to 37,000 in June, the U. S. employment service said. The number of persons hunting jobs through the USES offices declined 22 per cent. New industries in this region some already operating, some

awaiting materials—will supply 2500 jobs, the chamber said. Seasonal jobs in harvests and food processing plants were also credited with increasing employment. The USES said, however, that some of the lower unemployment rate was due to certain ex-shipyard workers—women, for instance, who need not work—no longer hunting for jobs once

their unemployment compensation ran out. In Multnomah county, the real estate boom, slackening a bit during late spring months, reappeared again. A total of \$13,300,000 of July sales were recorded, and the amount of downtown property sold this year covered a record expanse of 40 city blocks.

## Four Men Arrested In Counterfeit Case

PORTLAND, Aug. 5 (AP)—Four men were awaiting secret service questioning today in regard to the distribution of \$2000 of counterfeit bills in Pacific coast cities. Three men, two of whom detectives said admitted passing the bogus \$10 notes, were arrested Saturday after a tip-off from a liquor store manager who caught a counterfeit bill. The imitation federal reserve notes were believed made by a man now imprisoned in federal penitentiary.

A fourth man was arrested Sunday on a farm near McMinnville, and brought here for questioning in the case.

## USN Recruiter To Visit Here

Lt. J. E. Bayus, officer in charge of the navy recruiting station in Portland, will be in Klamath Falls, August 22 to 24 on an official inspection of sub-stations. While here he will enlist applicants interested in V-6 inactive naval reserve. Men with an honorable discharge and who have served at least six months during World War II are qualified to join the reserve. Anyone interested should contact the local recruit-

ing station in the post office so that the necessary enlistment papers may be prepared. Additional information on the V-6 program can be obtained from the navy office.

Bamboo is only a grass, but in Ceylon it grows to heights of 120 feet, with stalks one foot in diameter.

## Need Power? Man, What a Buy!

**REBUILT WHITE TRUCK MOTOR** 140-H. P. **SEARS ROEBUCK AND CO.**

for only... **495.00** Complete With Crate  
Available on Easy Terms  
U.S. GOV'T LIST PRICE . . \$607.50  
FACTORY LIST PRICE . . . \$1,175.00

Complete, Ready to Install  
NO EXTRAS TO BUY . . . .

Note Its Many Practical Uses

- Welding Machines
- Derricks
- Rock Crushers
- Big Air Compressors
- Motor Launches
- Stationary power for all kinds of farm and industrial equipment.
- Saw Mills
- Quarry Machinery
- Oil Wells
- Orchard Sprayers
- Fishing Boats

Same Engine Used in U. S. Armored Cars and Half Tracks

Truck owners, power operators, here's the engine buy of the year. A powerful White truck motor ready to install to replace that old worn engine. Proven and tested under grueling war operations to be the finest engine of its type. Even better than pre-war models. Come to Sears to see this power-packed giant, worth many times the price asked.

Direct from Government Warehouse. Packed in original weather-proof shipping crate.

**ACCESSORIES INCLUDED**

- Fan, Fan Belt
- Water Pump
- Generator
- Starter
- Complete Distributor
- Coil
- Fuel Pump
- Fly Wheel
- Complete Engine Wiring
- Spark Plugs
- Carburetor
- Oil Filter
- Oil Cooler
- Exhaust and Intake Manifolds
- Clutch Assembly (pressure plate & disc assembly)

**MOTOR SPECIFICATIONS: Model No. 160AX**

Rated Horsepower over 140 at 1200 R.P.M.  
6 cylinders; 4-in. cyl. bore; 5 1/4-in. stroke  
386 cubic inch displacement  
12-volt electrical system  
Fuel, Gasoline  
Clutch Housing size No. 3 SAE  
Will fit following White Trucks: Models No. 20, 22, 26, 140, 150.  
Can be installed in other trucks and tractors with minor alterations.  
Every Engine received a 3-hour actual load test on a dynamometer.

**Many-Use Hydraulift 104.90**  
David Bradley  
One man can easily, quickly lift 4000 lbs. to 48 inches from the ground. Heavy steel construction with channel iron base. Has a great variety of farm uses, or around garages. Get one today.

**David Bradley Scraper 125.00**  
Roll-Over Fresno Type  
One man can do many jobs! Loads and unloads without stopping. Strong heavy steel bowl 3/4 inches thick. For 2-plow or larger tractor.

FOR THE CONVENIENCE OF OUR CUSTOMERS  
SEARS STORE HOURS WILL BE  
9 A. M. TO 6 P. M.

## Here's Why...

You'll Have to Wait for New Electric Service to Your Home, Farm or Factory.

**ACUTE** shortages in production of transformers and other materials needed to extend electric service will delay the time when we can take care of new users of electricity. We're sorry, but the nation-wide situation is beyond our control. We want you to know the reasons why we cannot serve you right now—that is why we are listing here some of the important materials affecting new business extensions:

- High Tension Porcelain Insulators**  
All stocks critically short—factories' production filled into late 1947. Orders being accepted on basis shipment 12 to 15 months and upon availability of associated steel forgings which are bought out.
- Distribution Insulators**  
Very limited stocks available—some sub-standard materials and war surplus available.
- Copper Wire**  
Due to strikes which have just been concluded, the industry is far behind consumer demands. Orders are presently being taken on basis of 6 to 7 months shipment.
- Transformers**  
No improvement—small sized distribution transformers are almost completely unobtainable. Manufacturers are not even quoting delivery time, but anticipate upwards from 18 to 20 months. Larger distribution and high tension equipment is being quoted 12 to 15 months. Such used equipment as is available is usually found to be 30 to 35 years old and is being held at impossible prices.
- Poles**  
Standard butt treated cedar pole production nationally is running several millions below demands. Improvement in labor, prices and development of new access facilities to the more remote interior stands are required before any relief can be expected.
- Pole Line Hardware**  
Nominal quantities of sub-standard substitutes are available for deliveries in 2 or 3 months, or even longer, but in their desire to apportion that which is available.
- Hardware**  
Producers are reticent to accept substantial orders to any one consumer. Native species are obtainable; however, inability to secure proportionate quantities of treated studs on which to mount them precludes their popular acceptance.
- Crossarms**  
Inability of Pacific Northwest crossarm mills to cope with demands has forced the development of new sources. A satisfactory local arrangement has been worked out, assuring adequate quantities in the immediate future.
- Fuse Switches, Cutouts, Disconnecting Switches**  
All are largely combination copper-porcelain products and are directly affected by the acute porcelain shortage. We are not always able, despite our best efforts, to provide sufficient to meet current demand.
- Pipe & Pipe Fittings**  
Unprecedented demands for small steel pipes have exhausted stocks; mill deliveries are on allocated basis with sporadic deliveries. Cast iron pipe is likewise slow, deliveries often running 3 to 7 months, depending on size. Most C. I. fittings are reasonably available from independent foundries in the metropolitan areas.

We hope that production will soon hit its stride—that you won't have to wait too long for the convenience of electric service. We assure you that service will be provided just as soon as materials are available.
