

Indictment Aftermath Of Shooting

(Continued From Page One)

On Thursday, November 17, at which time the younger of the two told her mother and others that Chandler laid hands on her body.

On that date, Mr. and Mrs. Monard Hugo Harris, the two Lane girls and Chandler, came to Klamath Falls by bus from Camp 4. The Lane girls had been permitted by their parents to attend a movie. When the four reached here, state police said, it is understood that Chandler offered to accompany the little girl and did so. Later Mr. and Mrs. Harris met the Lane girls at the bus depot and returned to Camp 4.

On arrival, the younger of the two started to cry and when Mrs. Harris questioned her, she said that while in the theatre, Chandler had become familiar with her. Mrs. Harris immediately went to Mrs. Lane and the women questioned the girls. The older of the two said she heard her sister say, "quit it" and "stop it," and soon after asked her to take her to the lavatory. There the younger girl told her sister that Chandler had made advances to her and she didn't want to go back and sit with him. The two were said to have left the theatre and gone to the bus depot.

Officers said Mrs. Lane did not tell her husband of the affair that night but on Monday, the next morning, she told the story to Lane and suggested it would be better for the two men, her husband and Chandler, not to work together. Lane was employed as a choker setter and Chandler as a cat skinner, the two making a team.

Harris then said to have gone to the woods boss, Bud Chidester, advising him that he no longer wanted to work with Chandler, but Chidester said he was not in the habit of changing teams and started away. At this point, Lane is said to have told Chidester the story concerning Chandler and the girls, and said he had already talked to Mrs. Lane and Harris and when asked why he did not go to the authorities, told the Harris family, "I'll take care of it myself." During the conversation with Mr. and Mrs. Harris, Lane is alleged to have said, "I'll kill the son of a b—"

On Wednesday, Thanksgiving Eve, Lane's brother-in-law, Lockwood, arrived from Arkansas and indicated the desire to "walk around a little and see what's going on." He was armed with a .22 rifle from a man named Ranes and on Thursday morning, Thanksgiving Day, got in touch with Chandler who agreed to go hunting with them.

The three left Camp 4 together, stopped at King Cole camp and it was near that spot that the shooting occurred.

Chandler fell from a bullet wound in the left side of the chest and died en route to a Klamath Falls hospital. Both men said they were shooting but that other hunters were also in the woods at that time.

First investigation indicated that Lockwood, while shooting at a coyote, had fatally wounded Chandler accidentally. This theory of the shooting has never been officially refuted. In the meantime, state police and Sheriff Lloyd Low started an intensive investigation and unearthed evidence that Lane had threatened the life of Chandler on the grounds that Chandler had molested the 11-year-old Lane girl.

Lockwood, the brother-in-law who arrived from Arkansas the day prior to the shooting, remains in the county jail serving a 30-day sentence on a charge of hunting without a license. The charge originally filed against Lane was using an improper hunting license.

In The Days News

(Continued From Page One)

ALUMINUM. The same will probably hold true of uranium. BUT that isn't all.

The scientists tell us that uranium (whose exploding temperature is 100 million degrees) can be used as a spark plug to set off other reactions that are even more violent than the uranium reaction.

There is a reaction, they say, between two atoms of heavy hydrogen that starts going at a million degrees and heavy hydrogen can be produced by the ton from ordinary water. Lithium hydride is an atomic explosive twice as powerful as the U-235 that is produced from uranium. Lithium hydride now sells for about \$12 a pound, but can be made vastly cheaper by mass production.

SO, you see, we can't find safety in present scarcity of uranium. Our only protection against the fantastic horrors of atomic warfare lies in whatever common sense human beings may be able to develop under the pressure of stern necessity along with each other OR ELSE.

Hit-Run Driver Damages Car

A hit-and-run traffic accident last night at Pine and 5th was reported to city police by Golda F. Keenan, 221 Hillside, owner of the car which was struck and damaged.

She reported that her 1936 Terraplane was parked on Pine near 5th, and was sideswiped by another vehicle which did not stop.

Charles Milton Spare, 4634 Bisbee, posted \$20 bail for a violation of the basic rule last night, Norman C. Karr, 1808 Summers Lane, posted \$10 for a violation of the basic rule and having no operator's license, and George C. Fischer, 1527 Wilford, was cited to appear in court for running a red light.

Seed League Names Geary

PORTLAND, Dec. 21 (AP)—R. E. Engbretson, Columbia county farmer, is the new president of the Oregon Seed Growers league.

E. A. Geary, Klamath Falls, was named vice president, and E. R. Jackman, Oregon State college, secretary-treasurer, at the close of the sixth annual convention yesterday.

The league recommended employment of a full-time weed control expert at Oregon State college, and proposed that county courts be required by law to provide funds for a weed control program when voted by districts.

The league also asked that all income-production property, public as well as private, be taxed and that the federal government pay states 2 per cent of the assessed valuation of national forest land.

Tremor May Be World's Most Violent (Continued From Page One)

havoaked area extended 340 miles at its longest and 60 miles wide.

Osaka, Japan's second largest city, reported 14 killed, heavy property damage and water three feet deep in some sections.

The famous cities of Kyoto and Nara, both former Japanese capitals near Osaka, appeared to have escaped any but minor damage. Both escaped bomb damage during the war.

Accidents Injure Two Local Men

Two workmen were seriously injured Friday afternoon and both were confined to Klamath Valley hospital today.

Harry Dickerson, 58-year-old Ewuna Box company employe, suffered the loss of his right hand in an accident at the plant at 4:50 p. m. He resides at 203 Washington. It is understood that Dickerson was working on a saw at the time.

Foster Thornton, 57, 1801 Worden, fractured his hip when he is said to have fallen from a roof while doing some carpenter work at 3 o'clock Friday afternoon. His condition is reported good.

Ray Oscar Drace, no vehicle license. Fine, \$5.00.
Marriage License
AGER-JOHN. Audie Aggr. 24 farmer. Native of Oregon. Resident of Klamath Falls, Ore. Clarence M. Johns, 30 student. Native of Oklahoma. Resident of Klamath Falls, Ore.

Christmas Mail Reaches Peak

The height of the mailing season was reached here this noon when the post office overflowed with parcels and parcel senders. All four of the auxiliary windows were formed in front of each. Packages against the walls in the mailing room and large hampers filled with bundles littered the floor.

Postmaster Bert E. Hawkins stated that he expected today to hit the peak in Christmas mailing and Monday to be the top day for deliveries.

Hawkins reminded patrons that tonight the stamp and parcel windows will be open until 6 p. m. for their accommodation.

Egg beaters should be washed promptly after using.

Wash promptly after using. Wash promptly after using. Wash promptly after using.

Tule Board Still At Work

Bureau of reclamation officials and members of the Tulelake examining board are continuing their study of the records of the 86 winners in the homestead drawing today. The study is being made to determine the eligibility of the winners for the rich pieces of farmland. If any of the winners fail to qualify then the alternates take their places according to number, officials said.

It was emphasized by officials that anyone knowing anything previously undisclosed pertinent to the qualifications of any one of the persons under review should contact the examining board as soon as possible.

It is expected to be some time before the final list of winners is completed and the examining board finishes its business. Final allocation of the homestead will have to wait until then, it was stated.

Mexican Draws Liquor Charge

Two Indians and a Mexican, found huddled around a gallon jug of wine on the steps of the First Baptist church at 8th and Washington last night were arrested by city police in the prowl car.

The Mexican, Alejo Contreras, 45, is charged with using liquor to Indians; Henrietta Johns, 41, of Beatty, is charged with possession of liquor, and Cleve Hecocha, 33, of Beatty, is charged with being drunk.

Contreras told police that he bought the gallon jug of wine at the liquor store for the Indians. Officers in the car spotted them sitting on the church steps drinking.

Balloons May Be Plane Clue

SEATTLE, Dec. 21 (AP)—Army air rescue authorities from McChord field today were investigating six balloons found in the woods above Enumclaw, west of Mt. Rainier, on the chance they might be clues to the marine corps transport plane, missing with 32 men since December 10.

Marine corps officials at San Diego, whence the plane was flying to Seattle when it disappeared in bad weather, informed army authorities the transport was not known to have carried such equipment.

Ranger Melvin McCullough, who reported the find at a St. Paul and Tacoma Lumber company camp, near Mowich, said five of the balloons were pink and one was gray. All but one was deflated when the cluster was found. Blown up, they have a diameter of about three feet.

Grain Market Still Dropping

CHICAGO, Dec. 21 (AP)—Mills bought wheat futures today following overnight sales of a fair quantity of the bread wheat to Mexico, but this was unable to stem the decline which started with the agriculture department's announcement that a record-breaking winter wheat crop was indicated.

Wheat was down around a cent most of the session and ended off lower. Both feed grains were adversely affected by indications that winter wheat crop was better than was expected as large as desired. There was a good shipping demand for corn, sales totaling 250,000 bushels.

December oats, in which trading ended at the close, finished on a split quotation, 43 1/2-44. This was 1/4-3/4 over yesterday's closing price, finished lower to 1 cent higher, January 42 1/2-43. This was 1/4-3/4 over yesterday's closing price, finished lower to 1/2 cent higher, January 41 1/2-42. Deferred oats contracts were 1/4-1/2 higher.

Mexico purchased 5,000,000 bushels of American wheat overnight. The grain trade was buoyant, but not inclusive. It was reported Belgium had inquired for American corn, but that purchase had been postponed.

CHICAGO, Dec. 21 (AP)—Salable hogs 1000 (estimated); total 1200 compared Friday week ago, 1.75-2.00 lower with hogs 2.25-2.50 down; normal up at close 22.00. Choice 1.00-1.25; medium 1.00-1.25; heavy 1.00-1.25; light 1.00-1.25; total 1.00-1.25. Choice 1.00-1.25; medium 1.00-1.25; heavy 1.00-1.25; light 1.00-1.25; total 1.00-1.25.

Stock Market Uneven Today

NEW YORK, Dec. 21 (AP)—Profit taking on four straight recovery weeks today kept the stock market in a slightly uneven position although assorted favorites managed to display a certain amount of strength. Early gains running to a point or so evaporated in a number of cases as the session proceeded and mixed tendencies persisted near the close. Transfer for the two hours were in the neighborhood of 60,000 shares.

The list still had to contend with some belated selling for income tax purposes but this was offset by replacement purchasing. Bidding also was based on the more optimistic labor picture and the hope that reinvestment demand would bring a good rally at the year-end and early in January. The thought of a possible recession, with its attendant spirited the trimming of accounts here and there. Liquidation, though never heavy, was noticeable.

Closing quotations, however, were:
