

Farm Show Brings New Innovations

The growing interest of Klamath basin farmers is being turned on to the American Broadcasting company's public service feature, "The American Farmer," heard over local station KFLW every Saturday morning at 9:30.

Each week the program outlines and explains some new type of farm innovation. A disease-resistant corn, which will double the output formerly known, a machine that will eliminate frost in orchards and a "Chicken of Tomorrow" are but a few of the agricultural miracles and promises-of-the-future to be described.

Last October the broadcast took listeners to Guatemala for information on the new type of hardy-bred maize being developed in experiments in that country. In November the program traveled to the agricultural engineering department of Michigan State college to look over the frost control machine developed by them. Through its use, millions of dollars of damage to spring crops will be avoided.

The program, during 1946, presented 36 one-hour pick-ups from state and county fairs over the nation, national exhibitions, land grant colleges, and soil conservation demonstrations.

Among the various organizations covered by the broadcasts were the reopening of the 4-H club convention in Chicago, the Future Farmer of America Congress in Kansas City and regional meetings of various dairy improvement, farm credit administration groups and livestock associations.

Probably the greatest service that the program has given is its efforts toward promoting farm safety, for which it was awarded the National Safety Council award in 1946.

Snow Falling At Crater

No letup in the snow storm at Crater lake has been seen since it started Tuesday, and indications are that it will continue throughout today and Friday.

The snow depth now reaches 108 inches on the ground with a new fall of 14 inches from Wednesday night's storm.

Although roads are open, bad drifts make chains imperative for those still wishing to visit the park, according to the weather report received Thursday morning.

Temperature at 8:30 this morning was 15 degrees. Minimum Wednesday was 13, four degrees higher than the day before and maximum was 20 degrees, two degrees lower than Tuesday's maximum.

American farms average 193 acres in size; farm families average three or four children.

Creme-Whipped BALM BARR LOTION
39c 59c plus tax

See how just a tiny dab of fluffy white Balm Barr Creme-Whipped Lotion quickly relieves dryness, roughness, chapping. Never sticky or greasy. Thrifty, too.

OVER THE RAIL: "It's head up and tail over the dashboard—for the March of Dimes Friday night, I know several railbirds who have their parties made up and reservations in the bag... feed bag, that is. All cats, and everything, are on the house. That is, you pay and the crippled children collect."

Oregon Shorthorn Breeders Sponsor Prineville Sale

Range cattlemen throughout the west have been showing interest in recent years in the crossbreeding of Shorthorn bulls hereford cows. Many who have followed this practice report that they have heavier calves at weaning time and that the crossbreeds gain faster in the feedlot.

In recognition of this interest the Oregon Shorthorn Breeders association is sponsoring a sale of purebred Shorthorn sires and foundation females, to be held at Prineville, Ore., on February 27-28. Members of the sale committee state that they are bending every effort to make the sale attractive to range cattlemen. About one-half of the bulls will be placed in pen lots of three.

Consignments are from the top herds in Oregon and Washington and will include some prospective herd sires, Millard Eakin, Grass Valley, Ore., Shorthorn breeder who is sale manager, says that many of the pedigrees are outstanding, tracing, in many instances, to imported champions such as Calrossie Prince Peter, 1940 supreme champion of the great Scotland show and sale.

Some polled Shorthorns will be offered.

Those planning to attend the sale are urged to come on the 27th, in order to attend the show and the following banquet, at which M. E. Ensminger, head of department of animal husbandry, State College of Washington, will be speaker.

Fertilizer To Go To China

The distribution of ammonium sulphate from the RFC alumina plant at Salem, Ore., was terminated on December 31. This plant operated slightly over a year producing 33,000 tons of this material and 30,000 tons of this was distributed to the farmers in Oregon, Washington and Idaho. The plant is now operating under the U. S. treasury procurement and the output will be exported to China.

The loss of this material to Oregon farmers makes a further decrease in the available supply of commercial fertilizers to Oregon growers. Those who are familiar with the fertilizer situation believe that it will be about 2 years before fertilizer is back to normal. In 1946 Klamath county farmers received approximately 1000 tons of ammonium sulphate from the Salem plant.

Lumber Figure Shows Gain

SEATTLE, Jan. 30 (AP)—Pacific northwest lumber shipments increased 7.5 per cent during 1946 over the previous 12 month period, the Pacific lumber inspection bureau's annual report reveals.

Both Washington and British Columbia shipments were down, however, with Oregon's 44.8 per cent gain holding up its northern neighbors.

Oregon shipped 492,070,358 feet, compared with a 1945 total of 339,928,560. Washington's 1946 shipments dropped to 310,253,905 from 353,073,601 feet, and British Columbia ports fell from 747,032,352 feet in 1945 to 745,216,222 feet.

Range Grass Seeding Tried

An experiment to find out if depleted range grasses can be returned to forest lands by the simple method of sowing seed is under way at Weyerhaeuser camp 4, according to a report in the timber company's magazine "The March of Pine."

A seed spreader pulled by a caterpillar tractor is dodging around a 50 acre logged and slash burned area near the camp under the direction of E. M. Lindsay, assistant county agent. Whether or not this machine scattering method of seeding can replenish barren areas in a shorter time than nature is of interest to wardens and stock raisers. Foresters would like to know whether the grass will support tree growth, and what effect such plantings will have on the soil, the report said.

Lindsay stated that some of the grasses might show up next year and others in two years, but the effect on young tree growth will not be known for five years or more.

Practice Bomb Warning Issued

BEND, Jan. 30 (AP)—Police today warned residents that army aerial practice bombs picked up near military target zones and kept as curios are potentially dangerous.

The authorities reported nine-year-old Freddy G. Crouch was burned about the face when a projectile he was playing with ignited. The bombs were designed to burn and leave a smoke signal instead of exploding. Those undamaged may still be active, police said.

YMCA Shows Progress Here

Since its beginning in September, 1946, the Klamath county YMCA has enrolled a total of 108 members in its various groups and clubs, according to Cecil Kollenborn, general secretary, in his report to the board of directors of the local group.

Kollenborn said that the Grap organization for grade school boys, which started with eleven members, now has 22, and there are 67 youngsters at Altamont junior high who want a Grap-Y, but are at a standstill because of lack of leadership. The Hi-Y, for high school boys, now has a membership of 20, and are participating in the Victory basketball league in the city. Seven high school girls form the nucleus of the Tri-Hi-Y club, and plans for enlargement are under way. Thirty-one young business girls have formed together to comprise the Y's Menettes and Sponsors, clubs for YMCA purposes. The Y's Men's club, he said, has as yet only eleven members, but is becoming very interested and active in the organization.

Kollenborn also reported two basketball leagues formed in which eleven church teams are expected to participate, and six persons who are interested in forming a Phalanx club.

Including the nine members of the board of directors, there are 28 persons serving in administrative capacities in the city, Kollenborn said.

HIGH-PRICED SITTING
VANCOUVER, B. C., Jan. 30 (AP)—Mrs. C. A. Lind has offered \$50 for someone to sit with her little nephew, Joey.

The sitting must be done, however, while Joey is en route to Chicago sometime before March 7. Joey's mother is there and airline officials won't let Joey travel unaccompanied.

The child must be in Chicago by that date or he must wait to enter the United States to the quota system, Mrs. Lind said.

BACKACHE, LEG PAINS MAY BE DANGER SIGN Of Tired Kidneys

If backache and leg pains are making you miserable, don't just complain and wait about them. Nature may be warning you that your kidneys need attention.

The kidneys are the chief way of taking excess acids and poisonous waste out of the blood. They help most people pass about 2 pints a day.

If the 16 miles of kidney tubes and filters don't work well, poisonous waste materials in the blood. These poisons may start causing backaches, rheumatic pains, leg pains, loss of energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness. Frequent or scanty passages with smarting and sometimes burning are something wrong with your kidneys or bladder.

Don't wait! Ask your druggist for Doan's Pills, a stimulant diuretic, used successfully by millions for over 50 years. Doan's gives happy relief and will help the 16 miles of kidney tubes push out poisonous waste from the blood. Get Doan's Pills.

Retired Officer To Settle Here

SEOUL, Korea (Special to The News-Herald)—After serving in the army for 29 years and fighting in two wars, Major Jennings D. Lowman is going to retire. He will leave his present post with the seventh infantry division in Korea the latter part of January to make his home at 1327 Johnson avenue in Klamath Falls.

Major Lowman served as army recruiting sergeant in Klamath Falls from 1927 to 1934. While stationed there he acquired property and selected that city to be his home after completing his army service.

CHURCH NEWS

Choir Of West To Sing Here

A sacred concert of choral music of all ages, and from many parts of the world, will be presented by the "Choir of the West" from Pacific Lutheran college, Parkland, Wash., at the Klamath Union high school auditorium on Sunday, February 18, at 8 p. m.

Perhaps the most outstanding feature is an entire group of 16th and 17th century compositions. "Let All the Nations Praise the Lord," by the 17th century German composer Leisinger, makes use of the antiphonal singing between the women's and men's voices. Sixteenth century Italy contributes the "Benedictus" from the "Mass of the Pope Marcellus," by Palestrina, one of the most outstanding musical works of all time. From the 16th century England we have the jubilant "Hosanna to the Son of David," by Orlando Gibbons.
