Grain Futures Drop Slightly

CHICAGO, Feb. 25 (AP)—Best prices were not maintained at the close in grain futures trading today when profit cashing entered the pits toward the end, after new highs for the season had been established in all deliveries except May wheat and the nearby contracts of oats and corn.

Wheat advanced steadily from the opening on reports of a higher cash market at Minneapolis which at one time was quoted as much as 5 cents a bushel higher. The deferred deliveries exhibited greatest strength on buying, said to be by investment interests. Lack of moisture over the southwest winter wheat belt was a contributing factor.

Corn pushed upward on persistent buying, traders discounting the announcement by the commodity credit corporation that it was out of the market for the present.

The basis for the spot corn market were held steady.

At the close wheat was 1¼c higher to 2½c lower, March $2.37½-2.38½. Corn was ½ to 2c higher, March $1.43½-¼. Oats were ⅝c higher to 1½c lower, March 80-80¼c. Barley was 5c higher, March $1.25½.
