

Two Held On Meat Charge

NEWARK, N. J., June 26 (AP)—City officials, announcing the arrest of two dealers for masquerading horse meat as hamburger, began a full-scale survey today to determine how many unsuspecting diners and hamburger stands had been selling horsemeat.

Dr. Charles V. Craster, city health officer, said the two men were selling lunchroom operators what they listed as "chopped beef" at 3 to 4 cents a pound below current prices. These were never shown at least a dozen were "100 per cent horsemeat or highly suspicious of being horsemeat."

In The Day's News

(Continued from Page One)

for new legislation that employers didn't like. But it developed then that NOT ENOUGH PEOPLE THOUGHT AS THE EMPLOYERS THOUGHT. As a matter of fact, the great majority of people then believed that employers had too much power as the laws then stood and HAD ABUSED IT.

It is just possible that when Mr. Green and his associates go out to drive the backers of the present labor bill out of public life they will find that a considerable segment of the present voting public believes that labor has had too much power in recent years and has abused it.

As to that, time and VOTING will tell.

Geographers To Change Names

WASHINGTON, June 26 (AP)—Re-naming of numerous places in Michigan, Colorado and Washington and one in Oregon was recommended today by the federal division of geography. If there are no objections, the recommendations will be accepted by the U. S. board on geographical names.

Oregon's only ruling was on the 250-yard-long stream flowing eastward into Pheasant creek in Douglas county. It is to be known as Seelye creek.

A large number of names in Washington were clarified. Among them was naming an 11-mile stream flowing into Grande Ronde river, Menahce creek—not Wenatchee or Venatchee as sometimes called.

Wheat Prices Drop Slightly

CHICAGO, June 26 (AP)—Corn declined last in the session after establishing a new record high on the board of trade today. Wheat and oats also were generally lower, although at one time oats had fairly substantial gains.

At one time July corn reached \$2.03 1/2, a new all-time peak. All deferred deliveries of the yellow grain established new seasonal highs. Some profit-taking and reports of a less aggressive demand in the cash market created the late downturn.

Only small amounts of hedging entered the wheat pit, but this was sufficient to ease prices in view of limited demand. Private advices said the commodity credit corporation had purchased no wheat at Kansas City yesterday.

Wheat closed 1/2c lower to 1/4c higher, July \$2.17 1/2-3/4, corn was 1/2c lower to 1/4c higher, July \$2.01 1/2-2.01, and oats were 1/4c lower, July 97 1/2-98c.

Some Stocks Extend Leads

NEW YORK, June 26 (AP)—Quiet strength of oils, a number of which touched highs for the year, together with climbing inclinations of special stocks, partly offset labor pessimism today and enabled most leaders to extend their recovery.

White plus signs predominated, assorted pivots edged into the minus column at the close. Transfers were in the vicinity of \$60,000.

At the offside at the last were American Telephone, Chrysler, Republic Steel, Douglas Aircraft, Kennebec, Air Reduction and Philip Morris.

Railway bonds edged forward.

Response Shows Many Knew Wandering Photographer

By VAN HEMERT
Last Saturday The Herald and News ran a story about a Norris Goode, a visitor to Klamath Falls, who had lived here briefly way back in 1911. Goode had particularly wanted to find out about an incident which had occurred here 36 years ago. He had seen a photograph set out from Klamath Falls in the winter of 1910-11 for Crater lake, to take winter shots of that Oregon beauty spot, but was not heard from again. Goode had to leave for the east before a proper investigation of the disappearance could be made and had not returned until his present visit.

Response to the mystery story was immediate. Many persons phoned and wrote this office to give information on the incident.

Results of these phone calls and letters have thus far shed no positive light on the man's identity. All, however, agree the man somehow plunged to his death in the waters of Crater lake.

Mrs. William Crandall, 215 Eldorado, reported that she remembered Goode. She described him very well and explained he stayed in her combination hotel-boarding house during his stay here. She even remembered he occupied room 11. But she could not identify the photographer.

O. C. Rice, 124 N. Laguna, reported he was living in North Lake county, near Silver Lake, in the summer of 1910. He recalled that a wandering photographer was in that part of the country that summer, who took portraits of many of the people in the region. He was almost positive this man was the same one who disappeared in the winter of 1910-11. Recalling reports from that period, Rice was sure the man was presumed to have fallen into the lake when a shelf of snow upon which he was standing gave way. Evidence of a slide was found by a search party. However, Rice could not recall the name of the photographer or whether or not his body had been recovered.

S. A. Frakes, 711 N. 3rd, agreed with Rice that the photographer had fallen to his death in the lake. He thought his name was either Bowask or Bawisk. Frakes' memory brought up a few more facts concerning the incident. The man's equipment was found at three different places: a camera and a tripod at the crater's edge, and other items of equipment Anna Springs and in the basement of Crater lake lodge. As with Rice and Mrs. Crandall, Frakes could not recall whether or not the man's body was ever found.

Until the receipt of positive information, the only conclusions to be reached are that the man was killed, that his body was never found and that he remains anonymous.

4-H Club Winds Up Summer School

CORVALLIS, June 26 (AP)—Nine hundred 4-H club members were winding up the final day of the annual 10-day summer school today with award winners to be named at the final assembly program.

Columbia River Fight Gains Heat

WALLA WALLA, June 26 (AP)—Proponents of all-out Columbia and Snake river development took the stand today to renew their testimony urging rejection of the proposed 10-year moratorium on new dam construction in the lower river areas.

The opposing faction, those favoring the moratorium to permit studies pointed toward increased fisheries, testified yesterday before the Columbia basin inter-agency committee's hearing.

The committee is composed of representatives of federal agencies involved in river development and will make recommendations to a higher committee in Washington, D. C.

Sorry—No Eggs Again Today!

That's what Oregon and Washington housewives may soon be told if our poultry flocks continue to diminish at the rate they have been. We now have 1 million less chickens on Northwest farms than last year at this time.

The Department of Agriculture urges poultry growers to increase their flocks in 1947 and help alleviate the critical egg shortage. See your Triangle dealer now for latest effective feeding developments.
