CIO Demands Price Probe

WASHINGTON, June 27 (AP)—The CIO asked congress Thursday for immediate action to prevent "collapse of our economy." It declared that thus far "there has not been a single step" to check rising living costs. Instead, the CIO contended, congress has "worked in the opposite direction." The labor organization urged immediate creation of a federal investigation board with the job of shedding light "upon the unwarranted levels of many prices." It said that "by the use of public pressure and exposure by profiteering, we may be able to force lower prices," and the CIO added, "increased foreign demands (for food, clothing and machinery) and crop failure continue . . . this will require that we re-establish price control and a rationing program."
