Turn In Used Cooking Fats!

asked MARY MARGARET MCBRIDE,
Famous Radio Commentator

One of the finest jobs ever done by American housewives has been in saving used fats! Since 1942, over 800 million pounds have been salvaged. But, as Secretary of Commerce W. A. Harriman points out, the job still isn't over. "Not only the United States, but the whole world still lacks adequate supplies of fats and oils. And we in America are particularly short of industrial fats." These industrial fats, or their products, are needed to make many things we use every day. The used fats you turn in will help tide us over until supplies are normal.
