Being thankful on Thanksgiving Day as a matter of casual good feeling for your well-being is one thing but being thankful for the safe deliverance of your very life is something!

On Friday following Thanksgiving Day the John A. Thompson family had a horrible experience which they will never forget and for the safe ending of same they will always be thankful.

At the same treacherous spot about three miles out of Beatty, Ore., where a few years ago Earl Cliff of Lakeview pulled a car out of the Sprague river in which four persons were drowned, he on Friday of last week pulled the Thompson car out where it was completely submerged except for a portion of the top and is practically a total loss.

The accident occurred while the Thompsons were on their way to Klamath Falls at about 9 o'clock Friday morning. The exact cause of the car taking a sudden lunge to the right while traveling about 35 miles an hour in the middle of the highway is still a mystery.

It is presumed by Thompson that the brakes locked as he had had similar trouble before with the brakes. This locking of the brakes apparently caused the car to veer to the right forced by the drag and slope of the highway. Thompson cramped his wheel to the left but the tail end of his car swung to the edge of the steep, rocky embankment, paused at a precarious balance and tumbled over three or four times, coming to rest finally wheels down facing the highway, about a car's length out into the deep river. Thompson scrambled to the top of the car when the door, which he tried again and again to open, finally yielded, and reached down into the murky water to assist his family. His wife meanwhile was hysterically searching for her eight-year-old daughter as the car gushed full of muddy, swirling water. The girl had evidently been knocked out and was pinned beneath the cushion on the floor by the steering wheel. Her limp body was finally discovered and nearly lost in the stream as Mrs. Thompson tried to lift her out around the top of the car. Mrs. Thompson worked with her daughter on the top of the car in the shivering cold while Thompson finally flagged down a car for help. The girl was carried to shore through neck-deep water while her mother followed behind.

After considerable effort the girl revived and the unfortunate family was rushed to the Beatty store where a change of clothing was made and warmth and nourishment provided. It is believed by the family that the fact the girl was knocked out by a bump on her head was all

that saved her life as there was no water in her lungs.

Mrs. Thompson's parents, Mr. and Mrs. Earnest Robnett of New Pine Creek, were notified and they went to Beatty and brought the Thompsons home. Aside from bruises, shock and exposure the family sustained no serious injury. The car is a total loss according to report, and was not insured.

Editorial To Aid Needy

LAKEVIEW, Dec. 6—An editorial published in the Lake County Tribune on September 5, 1935, will bring a Christmas dividend to some needy Lake County families, it was learned by the Lake County Examiner this week. The Tribune and Examiner were merged in 1940.

The editorial concerned Thomas E. "Tom" Watson and his "old hat," for many years familiar objects around Lakeview. Watson died here December 3, 1942.

His daughter, Mrs. Harry Shum of route 1, box 436, Denair, Calif., wrote the Examiner that she had found the clipping while going through a collection recently, and

British Get Okay On "Frozen" Loan
LONDON, Dec. 6.—The United States has agreed that Britain can draw the remaining \$400,000,000 of the American loan, "frozen" last August by mutual agreement. Secretary of the Treasury Snyder announced this today in a letter made public here by the British treasury.

Unfreezing of the remaining credit, on which the British agreed to end drawing when they ended free convertibility of sterling August 20, will enable the United Kingdom to continue purchases in the U. S. "necessary to maintain its present austerity program," Snyder's letter said.

This will not, he added, "add to inflationary pressures in the U. S."
