ALL GRAINS TAKE BIG PLUNGE

CHICAGO, Feb. 5 (AP)—For the second consecutive day all grains, as well as soybeans and lard, broke the limits permitted in a single session on the board of trade today.

Wheat was down 10 cents, corn and soybeans 8 cents, oats 6 cents and lard $2 a hundred pounds.

At their bottoms, losses in wheat ranged from 32¼ to 40⅝ cents from seasonal high levels, in corn from 28⅞ to 39⅞ cents, in oats from 17½ to 23 cents, in soybeans from 71 to 72½ cents and in lard from $7.72 to $8.13 a hundred pounds.

In most grain contracts the seasonal peaks were made on Friday, January 16. The peak on May wheat, however, was made November 28, 1947, while that on May oats was established January 23. The peaks in lard were made on November 28, 1947, while those in soybeans were scored on January 15 and January 16.

Prices opened on sharp declines today. A small-scale rally then developed. It was followed by a selling wave about mid-way in the session, sending quotations down to their daily limits. Every now and then a sale was made above those limits in oats and lard, but no real rally developed.

May wheat closed at $2.66⅝, May corn $2.31⅝, May oats $1.06⅝, March soybeans $3.70 and March lard $21.15.

Stocks Go To 7-Month Low

NEW YORK, Feb. 5 (AP)—Further weakness of commodities was reflected in another slide for stocks today with the market average touching a new bottom since last June.

Dealings, active in the forenoon, quieted somewhat after midday as mild recovery attempts were assayed. While extreme losses were reduced here and there near the close, recessions of fractions to 2 or more points maintained a wide majority with virtually all groups affected. Transfers ran to around 1,200,000 shares.

Conspicuous on the downside most of the day, a number at 1947-48 lows, were U. S. Steel, Youngstown Sheet, Bethlehem Steel, Chrysler, General Motors, Goodyear, Goodrich, U. S. Rubber, Allied Stores, International Harvester, Deere, J. I. Case, United Aircraft, Schenley, American Woolen, International Paper, Eastman Kodak, Johns-Manville, Union Carbide, Du Pont, Dow Chemical, Westinghouse Electric, American Smelting, Warner Bros., Gulf Oil, Standard Oil (N. J.), Union Pacific, Southern Pacific and Santa Fe.

Swede Women Work In Field

Instruction in home economics and domestic science in Sweden includes considerable training in agriculture, as women there work in the fields and take care of the cows and poultry in addition to work in the home, Ruth Wallensteen, of Linkoping, Sweden, told extension workers at Oregon State college recently.

Miss Wallensteen, whose position in her province corresponds roughly to the state home demonstration leader here, visited Oregon State in the course of a seven-months' tour of this country to study labor saving equipment and American extension methods.

While the visitor thinks American farm women can live "softer lives" than those in her country, she mentioned several advantages there that are not known here. Cooperative laundries and bakeries have become popular with Swedish homemakers, and the government provides free summer vacations for women having two or more children under 14 years of age.

A social domestic help plan is also in force there through which some 2000 trained women are hired by the government and made available to low income families for housekeeping, practical nursing or child care during emergencies.

Good Forage Will Result In Reseeding

An increase in forage production will result when native grass and sod-bound blue grass pastures are reseeded to mixtures of improved varieties. New pasture seedings with approved mixtures will also outyield older established pastures.

A list of improved pasture mixtures carrying AAA payments is available at the county agent's office. Three or four grasses and one or two legumes usually make up a pasture mixture, depending upon conditions.

Alta fescue is one grass that is adapted to most conditions in Klamath county. It will grow on virtually any soil, wet or dry, acid or alkali. Alta fescue is a long-lived, high yielding, bunch type grass that sends its roots deeper into tough soils than other grasses. Consequently it builds humus and improves wornout soils.

Smooth brome is another grass that could be used in most mixtures planted in the county. On wet lands, meadow foxtail, a most palatable grass that sheep and cattle relish, could be used to good advantage. Other grasses that may be used, depending upon conditions, are English rye, orchard grass and meadow fescue.

Suburbs To Hold Major Meet Friday

The Klamath Suburban league will meet at Shasta school Friday at 8 p. m. in what officers of the league say will be one of the important meetings of the year.

Questions of policy with reference to proposals coming before the electors during 1948 will be discussed and it is probable committees will be named to study and report on measures, especially proposals affecting the suburbs.

The county zoning proposals to come before the voters in May has drawn more fire than perhaps any other at this early date and the forecast is that the proposed zoning controls will be a hot issue at the coming primary election. The Suburban league has as yet taken no action with reference to the zoning proposal.

It is expected that representatives of the suburban fire district will make a progress report on the new fire station and proposed equipment. Questions with reference to the new fire department will be gladly answered, according to fire district officers.

League officers urge every member to be present.

Navy training manuals are available to all. Much help will be extended to any individual who really wants to learn, in connection with the study of navy training courses.

A steam turbine operates on the same principle as a windmill.
