

Georgia Solon Says Harry Is Planning FBI Gestapo To Break Race Prejudice

WASHINGTON, Feb. 6 (AP)—The bitter democratic feud over civil rights hit a new pitch today. Senator Russell (D-Ga.) contended that President Truman is planning an FBI "gestapo" to break down race segregation in the south.

Russell told a reporter the south's revolt against the president's call for new measures to knock down racial barriers "is more serious than any I have seen in my lifetime."

"This is true, the Georgian said, because southern democrats have interpreted the president's demand for an end of Jim Crow laws on trains and buses as the opening wedge in a fight to halt all race segregation."

"The president has made the flat declaration that he considers segregation to be discrimination and a violation of civil rights," Russell declared. "He wants to set up a commission and hire a lot of lawyers to fight segregation wherever it exists."

FBI Gestapo
"He has ordered the federal bureau of investigation to work with the department of justice civil rights division and says it is giving specialized training to its agents. This is nothing more or less than an FBI gestapo to break down race segregation in the south."

Russell's charges highlighted three other developments:
1. Chairman Taft (R-Ohio) called the senate republican policy committee together to pick a spot on the legislative schedule for an expected battle with filibustering southerners over one or more civil rights measures.
2. Senator Ball (R-Minn.) predicted that congress will pass no anti-job discrimination bill with enforcement provisions. Ball voted "no" when the senate labor committee approved such a measure yesterday, seven to five.
3. Reports spread that Gov. Fielding L. Wright of Mississippi would move at a Tallahassee, Fla. meeting of southern governors today to have them issue a call for an "independent" democratic convention to split away from Mr. Truman.

4. A democratic official said the party's national committee will "sit tight" to see what happens before it charts its course.
