Tips of Merit

ALONG with the fact that "a young man's fancy turns to love" this time of the year, lots of girls are looking over what's new in washing machines.

NOW these new automatic washers, like LAUNDERALL, are pretty slick to use. All you do is put in clothes, add soap, turn it on, and twiddle your thumbs while the work is being done.

THERE'S lots of girls, too that don't plan on spending that much money—they think that perhaps a plain "ringer-type" is the thing to buy. If you're thinking of a new MAYTAG, for instance, put your order in now because you still need to wait a little for delivery.

BUT here's another angle in this washing machine picture that lots of the girls don't know about.

There's another kind of washer that fits right on your laundry tray. The LITTLE GIANT saves more time than you can imagine—it's almost as convenient as these new-fangled automatics. As simple and easy to use as pulling the plug to let the water out.

JUST a telephone call is all that is needed for one of the boys to run right out to your place with a LITTLE GIANT under his arm and show you how it works on your own laundry trays. No obligation, of course.
