

Here's a posed picture of a group of men who were the forerunners of Klamath's civic leaders of today.

It was Linkville, not Klamath Falls, when this picture was made back in the early 'eighties. The leaders of the town were grouped for the old-time photograph in front of one of those lavishly illustrated old-fashioned backdrops.

The picture belongs to Clyde Brandenburg, Klamath Falls old-timer, and the card attached to the faded print reads: "Outstanding citizens of the early '80s."

Seated in the picture are John Farbs, saloon-keeper; Rube Hatton, county clerk; Charlie Parrish, county clerk; Fred Cliff, carpenter.

Standing are Mark Childers, G. W. Smith, the county judge; A. L. Leavitt, who later became circuit judge and city attorney.

The picture is old and faded, but a copy of it was made by Wes Guderian, Herald and News photographer, for use of Photo-Engravers Ernie Hedlund and Tom Patty. These technicians want it known that those scratches were on the original.

KU Students Speakers At Rotary

KUHS speech students under the direction of Howard Holt, speech instructor, were featured on the Rotary club program Friday noon at the Willard hotel. The four students

recently took part in the state-public speaking competition. Jim Owens delivered the oration, "Double Edged Sword," dealing with democracy and communism. Nadine

Yockey gave poetry readings selected on the subject of love. Rex Mills, after-dinner speaker, was introduced for the subject, "One Night of Love," but his talk dealt with the home manufacture of

toothpicks. Don Palllette talked on "The River That Flowed Upstream." This was based on Link river, and won state recognition for him in radio speaking.

High school candidates for queen of the 20-30 club track meet were introduced by Charles Blackstone. They are Betty Pinniger, freshman; Sandra Moore, sophomore; Beverly

Young, junior, and Trudy Bennett, senior. Red Busman was chairman of the day for Rotary.

MINE ASHORE

DEPOE BAY, April 24 (AP)—Another floating mine rolled onto the beach five miles north of here yesterday. It was the second on the Oregon coast in two days.

Looked at and looked up to

This is the one, of course, that you spot at a glance.

This is the one that sends a string of facts racing through your mind — if you know automobiles — the instant you see the name ROADMASTER spelled out on its fender.

Up to one hundred and fifty Fireball horsepower. Eighteen feet big — and spring-coil lively.

Gorgeously finished. Coil-spring cradled on all four wheels. Shod with oversize tires that take extra low pressures for added comfort.

Convenient too — with push-button controls not only for the top, but for door windows and the front-seat adjustment as well.

This, too, is the only passenger car in this country where the power plant does what gears used to do.

Here's the one place you'll find Dynaflo Drive,* in which liquid replaces not only the clutch and manually operated low, second and high, but mechanical gear-changers as well.

In short — here's liquid ease and smoothness in delightful new degree, through a sort of "magic muscle" that lets you forget about gear-changing practically entirely.

No wonder, then, this car is looked up to.

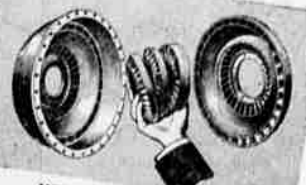

Looked up to for impressive appearance — looked up to for superlative ability.

Looked up to for what's newest in engineering advances.

If your standards call for a real performer — and for quality a cut above the ordinary good — specify ROADMASTER when you see your dealer (with or without a car to trade) about getting an order in.

BUICK alone has all these features

- * DYNAFLOW DRIVE (Optional, Roadmaster Series)
- * TAPER-THRU STYLING (Super and Roadmaster)
- * VIBRA-SHIELDED RIDE * SAFETY-RIDE RIMS
- * HI-POISED FIREBALL POWER
- * ROAD-RITE BALANCE * RIGID TORQUE-TUBE
- * QUADRIFLEX COIL SPRINGING
- * SOUND-SORBER TOP LINING (Super and Roadmaster)
- * DUOMATIC SPARK ADVANCE * FLEX-FIT OIL RINGS
- * TEN SMART MODELS * BODY BY FISHER

WHAT'S DIFFERENT ABOUT DYNAFLOW DRIVE?

To an efficient new pump (left above), Buick engineers have added a true turbine (right) and an ingenious new supercharging assembly (in hand) which produces a torque boost result in starting and accelerating. The result is the first device on any American passenger car which employs liquid to fill the function of both the clutch and the usual manual selection of power ranges and direction.

When better automobiles are built
BUICK
will build them
