Atom Inventions Now Under Rules

WASHINGTON, May 10 (AP)—Note to atomic bomb inventors:

The atomic energy commission has just published the rules under which it proposes to pay for new atomic devices. The proposed rules appeared in the Federal Register.

First a patent compensation board will be appointed. If you have a new atomic explosive you can't patent it, but you can get paid. The compensation board will decide how much. Non-military atomic devices can be patented.

Under the proposed regulations, atomic inventors must submit applications to the board for confidential hearings. Applicants can study the board's decisions and file objections if they disagree. Then the board will make a final decision.

Five - year - old Nancy Orrell, daughter of Mr. and Mrs. Lewis Orrell Jr., played hostess to 16 little boys and girls on her birthday, April 27. The young tots attending the birthday party were, Jamie Baisiger, Klamath Falls; Judy, Sandra, Karen and Cynthia Bricco, and their cousin, Wayne, all from Modoc Point, Peggy Jo and Donna Jean Buck, Lynn and Reed Zirkle, Mike McClurg and Nancy's brother, Frank.

Sewing and fancy work was done by the ladies and a discussion of what sort of a project to take up at the next meeting was indulged in. It was generally agreed that something constructive to all concerned would be started at that time. Mrs. Orrell Jr. served refreshments to: Mrs. Zack Wiseman, Mrs E. L. Kelly, Mrs. Earl Potter, Mrs. Archie McClurg, Mrs. Floyd Underhill, Mrs. Paul Buck, Mrs. Robert Johnson, Mrs. Harry Keasey, Mrs. Don Veatch, Mrs. John Blevins, Mrs. A. E. Due to employment in Sacramento being on the down grade, Bill will remain here, where he will be employed in the McCollum mill as soon as it reopens. Lack of new machinery is the cause of the shut-down at the mill. It is expected the machinery will arrive soon.

Friends of Joe Ivie are sorry to learn of his illness, which has confined him to his home for the past three weeks. A bad case of flu is the cause.

Cold weather and flurries of snow during the month of April have not kept Albert Barrett from doing his gardening work. Anyone driving by the Barrett place can see Mr. Barrett working the soil from early morn to late evening, and pretty, straight rows of vegetation are already beginning to make their appearances through the finely worked terra firma.

The large amount of traveling done the past week-end by Camp 6 people seems to indicate a final fling before fishing season starts. Beginning next Saturday, May 1, it will be out of the stream, into the frying pan for many unwary trout—we hope. This is where we have it over you city folks, with fishing right in our own back yard, so to speak.

The road through camp has been well gravelled and is now in excellent condition.

Campaign Statements From Candidates At The May 21 Primary Election

By JOHN REBER

Republican Candidate for County Commissioner

I have served Klamath county as a member of the county court for two terms, and this year am asking for re-election. I am a candidate for republican nomination on the May 21st ballot.

In making a bid for re-election I stand on my record of sincere service to the welfare of the county. In the seven and one-half years that I have been on the court, I have sought at all times to give my best to the business of the county and to solve the many problems coming before us with the good of the county as a whole always in mind.

Shortly after I took office our country went to war, and many new problems were placed before the county government in the war years. I feel that the county court took care of these emergencies in a business-like way, and the county managed to get through those years without exceeding the six per cent limitation on county taxation.

The county road organization has built up to the place where it is a real credit to Klamath county and rendering the best possible service to the public within the limits of finances permitted it. If elected to office again, I will devote my best to continuing a program designed to give Klamath county a modern road system serving farms, homes and industry.

A man who has served two terms in office does not need to go into a lot of detail about his record. People know him by that time. If Klamath voters want to return me to office, they are already informed about the general policies I will follow. I earnestly ask support of republicans for the nomination and all voters for election in the fall.

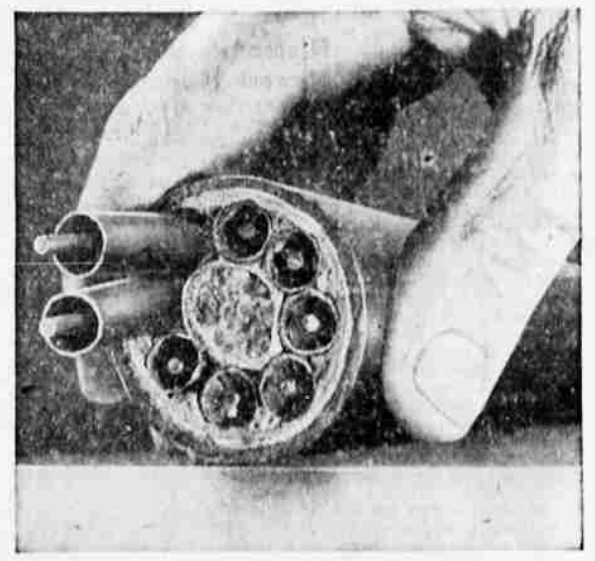
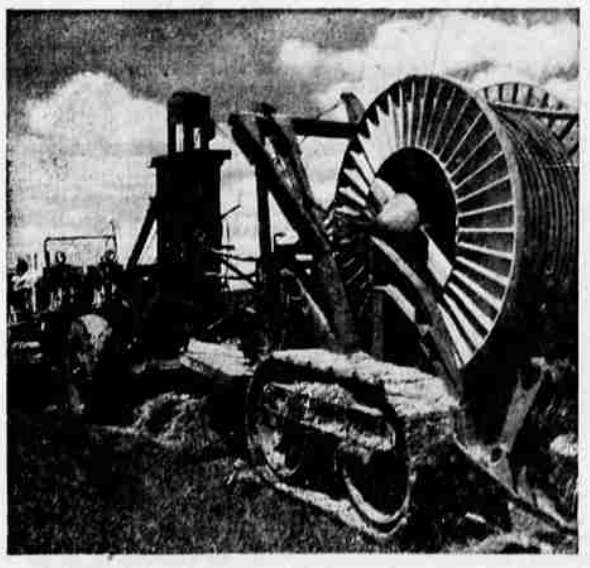
"WORLD'S LONGEST SPEAKING TUBE" now pipes calls East



1. Imagine packing 500 voices together in a tube no bigger than a pencil and sorting them out distinctly at the end! That's what we're doing with coaxial cable. Radio-type waves whisk calls through pipes...instead of on wires...allowing one "co-ax" to do the work of a number of the more usual kinds of long distance cable.



2. We plant "co-ax" with giant plows like this. Every eight miles a "booster station" keeps calls going through clearly. For—incredible as it seems—high frequency waves fade so rapidly in the cable that all the sun's energy, if it could be funneled into the pipes, would not carry half-way across the country.

3. "End of the line"...huge panels of equipment like this sort out the calls carried in one cable. Since December, calls have been going back and forth from the Coast to the East over 2300 miles of "co-ax." And we're adding still more cables to augment long distance service for the Coast's growing telephone population.

4. Millions of new working dollars, needed to bring you more and better service, must come—not from telephone bills—but from thousands of people who put their savings to work in the telephone business. To attract these working dollars, we must pay a reasonable amount for their use. We can do this only if we sell our services at fair and adequate prices.
