

City Engineer Proposes \$119,598 Plan For City Streets Improvement

An ambitious project was introduced to councilmen by City Engineer E. A. Thomas Monday night calling for repairing pavements throughout the entire city.

Estimated cost, according to Thomas, is \$119,598.

No action was taken, but councilmen plan to look into the project and check possibilities for reducing cost by doing essential repairing first before reaching a decision.

Thomas will accompany councilmen on a tour of the streets needing repair.

Horace E. Getz was appointed to the budget committee, replacing Russell Tisdale, who was ineligible when it was found that he lives outside the city limits.

The city received \$2780.05 from the state liquor control commission as its percentage of permit fees collected. Incorporated cities are given a portion of the sum on a quarterly basis.

Action Rescinded

Previous action to grant firemen 10 full 24-hour days vacation time was rescinded. Councilmen said that the action must be reconsidered because the city will soon have to hire more firemen and change the working hour set-up.

In line with the "Keep Klamath Clean" campaign, councilmen are considering getting new trash receptacles for the streets in the business district. Officials will investigate the possibility of having the receptacles made by Oregon Vocational school metal and drafting classes. Police Judge Howard Strode was given permission to see about obtaining the hard-to-get type of metal needed and making arrangements for OVS students to construct two or three receptacles on a test basis.

Councilmen reported that while many merchants in the downtown area have posted 100 per cent support signs to the cleanup campaign, they still sweep dirt from the sidewalks in front of their places of business into the street. The city said agreed that the public should be made conscious that keeping dirt off the streets is one of the major items in keeping the city clean.

Fireplace Request

A request was read from the Teen-Age center adult council that teenagers be allowed to use the fireplace in their new building. Originally the council decided that the fire place might prove to be hazardous.

Fire Chief Keith K. Ambrose said that the only thing which might make the fire place dangerous is if it should not be properly taken care of. City Recreation Director Sam Smith told councilmen that the fire place would help a great deal in heating the building. Heating facilities are not connected, he added, because the center has been unable to get plumbers or the type of pipe required.

After some discussion, councilmen agreed that the teen-agers may use the fireplace until such a time as the council sees fit to rescind its action.

LAWRENCE SLATER INSURANCE AGENCY
U. S. National Bank Bldg.

Here is another view of the Klamath Model Railroad club's new building in the basement of the U. S. National bank building. The club has invited the public to inspect the trains and track set-up Friday evening, Saturday afternoon and evening, and Sunday afternoon and evening. Most proceeds from a small admission charge will go to the Klamath county cancer fund.

Chiloquin

The number of high school students on the fifth period honor roll was an increase over the fourth period six weeks. The juniors and seventh graders each placed five but the sophomores named only two. The full list follows: 7th, Stanley Webb, Gene Gentry, Carol Wilson, Kay Heglund and Joanne Sise; 8th, David McKell, James David, Barbara Cookman and Dorothy Kennington; 9th, Jerry Monks, Kenneth Miller and Betty Wright; 10th, Betty Johnson and Joe Ball; 11th, Elaine Mangum, Lorna Roser, Juanita Oates, Virginia Shorey and Bill Norval; 12th, Jack Jones, Jean McKell, Catherine Knox, Ann McKell and Pat Buell.

Mrs. Myrtle Stevenson of Lakeview was a guest last week of Mr. and Mrs. Henry Wolf.

Mr. and Mrs. Eugene Schuck of Ontario returned home last week-end. Mrs. Schuck had been here for two weeks with her sister and brother-in-law, Mr. and Mrs. Lou Kellison.

Mrs. Charles Warren of Redding, Calif., was a guest on Tuesday of Mr. and Mrs. Gerry Wolf.

Mr. and Mrs. Kelly and children moved last week-end to Grass Valley.

No school was held on Friday as buses were needed to transport the fifth, sixth, seventh and eighth graders and the high school glee club to the spring music festival at the Oregon Vocational school gymnasium. A change in the weather made it nearly a winter festival but otherwise, it was a decided success.

Roland Walloppe has been working at a lumber mill in Lapine the past two weeks and comes home over Saturdays and Sundays.

Mr. and Mrs. Paul Mudge of Ma-

dera, Calif., are back in Chiloquin for the summer months. They have been greeting friends from a flashy new red pickup.

So many inquiries have been made about the member of the reporter's family, who supposedly underwent a four-hour operation, had to be given several shots to sustain life and had gone without food or water for 40 hours prior to the operation, that an explanation follows. It is all true and two legs were broken, but only two out of four. It was Timber Wolf, registered Chesapeake, who was injured so seriously when he was hit by a car last Monday night, ran away and returned on two left legs Wednesday morning. He comes home from the hospital this week.

Minor car accidents were in vogue locally the past few days. In a freak occurrence, a commercial semi-trailer outfit caught up with and then ran into a small truck driven and owned by Bob Hall. Hall's vehicle was knocked down the highway a few yards but fortunately no extensive damage was done.

Harold Hatcher's coupe failed to negotiate the turn at the cave site on the Bray mill road and took its second dunking in as many months. The first time was its dip in Williamson river at the time of the shooting of Eugene Lahr—different drivers, however.

Also on the Bray mill road last week a Beckley Livestock transportation truck overturned but was unloaded at the time.

Mr. and Mrs. Sherman Maher were being congratulated this week on the birth of their fourth child at Klamath Valley hospital. It's four boys in the family, too.

What It Takes FOR HEAVY HAULING

When you buy a GMC for heavy hauling you get a truck that's heavy duty and all truck. GMC heavy duties have big, brawny frames . . . with wide, thick-leaved springs to match. They have heavy, husky axles and transmissions that combine to provide as many as 15 forward speeds . . . brakes up to 21 inches diameter . . . heavy disc clutches. Engines are powerful valve-in-heads . . . with extra heavy Tocco-hardened crankshafts and many other durability features. Yes, GMC heavy duties have "what it takes" . . . and many models are now available for quick delivery.

The massive frame, heavy springs and rugged radius rod drive of this dump model typify GMC heavy duty truck design. GMC heavy duties are built in gross weight ratings of 19,000 to 90,000 pounds, for every hauling job. See your GMC dealer.

Historic Events in the ADVANCE of Medical Science

In 1328 Paracelsus, the idol breaker, the swaggering vulgar, and unpleasant genius, the FIRST MODERN DOCTOR, published his "Seven Arguments." He discarded the idea of the 4 humors, introduced mineral baths, laudanum, mercury, lead, arsenic, iron, copper sulphate, strychnine, and alcoholic extracts.
