

Here Are A Few Tips On Buying A Washing Machine:

Should you choose an automatic washing machine? Mary Beth Menden, extension specialist in the field of home management at Oregon State college, suggests that, in answering this question, some of the following points be considered: Cost—there is a great variation in price in both automatic and conventional type machines, but the automatic may cost as much as two to three times that of the conventional type. There may be extra charges for installing the automatic washer.

Family Needs—Is the family wash large enough to make the large investment in the machine worthwhile? **Washday Habits**—Is the family willing to change its washing habits. Use of the automatic machine frequently means that washday comes several times a week rather than once a week.

Water System—Sufficient water pressure and hot and cold running water as well as adequate drainage system are necessary.

Amount of Water—Approximately 20 gallons is used for one washing cycle. This is comparable to the amount used in other machines when fresh water is used for each load. About half the water used is hot water.

Hard Water—Automatic machines may become clogged with soap curd in a hard water area. Water softeners are used to help avoid this difficulty.

Bolting Down—Some machines require a special foundation and must be bolted down. Others have a special spring action that makes bolting unnecessary. The foundation

information—is designed to help homemakers solve the problem that three out of four are finding troublesome: How to feed their families meals that are appetizing and nutritionally adequate when food costs so much. "Money-Saving Main Dishes" offers practical day-to-day ways of stretching food money and inflated food prices.

This booklet may be obtained free of charge by printing your name and address on a penny post card and addressing the card to Food Conservation, Washington 25, D. C. No message is required.

Advantages of the automatic machine are:

1. Saves time and effort.
2. Uses less space since tubs are not necessary.
3. Washing may be done in any room where water pipes and drain are available.
4. Is automatically controlled, but may be set for varying water temperatures and washing times.
5. Is hygienically clean since fresh water is used with each wash.
6. Operating cost is relatively the same as for the conventional type machine.

Recipe Book Proves To Be Popular

"Money-Saving Main Dishes," the department of agriculture's new menu and recipe booklet, is well on its way to being one of the most popular government publications of all times. The booklet—48 pages of recipes, menus, and up-to-date food

Public Shooting Grounds Get OK

PORTLAND, May 19 (AP)—The state game commission reported today it had renewed its agreement with the Chewaucan Land and Cattle company for operation of a public shooting ground on ZX ranch.

About 45,000 acres will be held as a refuge and 2500 acres used as shooting grounds. The commission reported that relatively few hunters were on the ZX ranch last year but their average bag was higher than on the more popular summer lake public shooting grounds. Improvements at the latter place, including road graveling and dike building, are now being made.

Dewey To Visit Seattle On Friday

SEATTLE, May 19 (AP)—Gov. Thomas E. Dewey will visit Seattle Friday, B. Roy Anderson, chairman of the King county Dewey-for-president club, announced Tuesday. He will speak in the Eagles auditorium.

Anderson said Dewey will come from Oregon via Spokane, where he is scheduled for an earlier appearance Friday.

Henry A. Wallace is scheduled to speak the same evening in the Seattle Memorial stadium.
