

# Why we believe in DEWEY

Governor Dewey has given his state the most progressive government in its history. He has increased the state's services to its citizens while cutting taxes. His clean-cut business administration has enabled them to plan and build with confidence, bringing prosperity to all. For example:

**HE** reduced state debt 27% in four years.

**HE** built up a surplus of \$623,000,000 in the state treasury.

**HE** has the confidence of labor because he has fought successfully for sound industrial relations. The State Mediation Board has averted over 2,000 strikes in four years. With 12% of the nation's workers New York has had only 3.7% of the lost man-hours in 1945. Workers have gained many benefits, such as liberalization of Workmen's Compensation and Unemployment Insurance laws.

**HE** has instituted veterans' legislation that has been the most liberal and progressive in the nation.

**HE** provided a powerful incentive to stabilize employment by changing the State Unemployment Insurance Law to allow tax credits to those employers who maintain stable payrolls.

**HE** cut personal income taxes 40%; cut corporate income taxes 25%.

**HE** put state construction on a pay-as-you-go basis, saving a huge interest load.

**HE** built up a tax stabilization fund to maintain state services in the event of a sharp decline in tax revenue.

**HE** built up a reserve of over a billion dollars in the State Unemployment Insurance System.

**Governor Dewey has proved that he can provide government that SERVES the people. His is the capable hand, the sympathetic heart, the incisive brain that we now need in Washington.**
